Return Of Grand Theory In Humanities:

The Return of Grand Theory in the Human Sciences Quentin Skinner, 1990-09-13 Gadamer Derrida Foucault Habermas Althusser and L vi Strauss are among the major figures discussed in a volume of essays that surveys the most influential developments in social and political thought over the past twenty five years Humanizing Humanity Bidyut Chakrabarty, 2024-07-20 Humanizing Humanity is distinctively framed advocacy of the ways in which the concept of humanity has been defended by various ideologues of India like Tagore Gandhi and Ambedkar By grounding itself in the epistemology of intellectual history the book delineates how these three major thinkers visualised the ways in which society can be better humanized Such a process of humanization for these thinkers forms the bedrock of the trajectory in which humanity may be preserved amidst intense authoritarianism and the violent quest for power by a small minority in the society The book is an attempt at exploring the strands of inter textuality that exist when Tagore Gandhi and Ambedkar s thinking is situated in the ontic and epistemic context of a few humans tendency to destroy humanity and the efforts of another section to create conditions for its preservation Bidyut Chakrabarty does this by comparing the ways in which the Federalist Papers of the United States of America and the Indian Constitution manifest as quintessential texts that uphold the principles of liberty equality justice and the protection of the weaker sections of society from structured strands of domination and exploitation The Humanities in Transition from Postmodernism into the Digital Age Nigel A. Raab, 2020-05-31 The Humanities in Transition explores how the basic components of the digital age will have an impact on the most trusted theories of humanists Over the past two generations humanists have come to take basic postmodern theories for granted whether on language knowledge or time Yet Michel Foucault Jacques Derrida and similar philosophers developed their ideas when the impact of this digital world could barely be imagined The digital world built on algorithms and massive amounts of data operates on radically different principles This volume analyzes these differences demonstrating where an aging postmodernism cannot keep pace with today s technologies The book first introduces the major influence postmodern had on global thought before turning to algorithms digital space digital time data visuals and the concept to digital forgeries By taking a closer look at these themes it establishes a platform to create more robust humanist theories for the third millennium This book will appeal to graduate students and established scholars in the Digital Humanities who are looking for diverse and energetic theoretical approaches that can truly come to terms with the digital world **The Crisis from Within: Historians, Theory, and the Humanities** Nigel Raab, 2015-05-19 In The Crisis from Within Nigel Raab explores weaknesses that emerge when using interdisciplinary theories in historical analysis With chapters that focus on knowledge language memory imagining and inventing and civil society the analysis reveals how theoretical applications can be the source of interpretive confusion By drawing from a global range of historical works Nigel Raab demonstrates how this problem concerns all historical sub fields From science in the seventeenth century to communism in the twentieth century

theories often overdetermine analysis in a way the historian never intended After the enthusiastic reception of theory for over a generation The Crisis from Within argues that the time has come to pause and think seriously about how we wish to proceed with theory

Theoretical Schools and Circles in the Twentieth-Century Humanities Marina

Grishakova, Silvi Salupere, 2015-04-10 Schools and circles have been a major force in twentieth century intellectual movements They fostered circulation of ideas within and between disciplines thus altering the shape of intellectual inquiry This volume offers a new perspective on theoretical schools in the humanities both as generators of conceptual knowledge and as cultural phenomena The structuralist semiotic phenomenological and hermeneutical schools and circles have had a deep impact on various disciplines ranging from literary studies to philosophy historiography and sociology The volume focuses on a set of loosely interrelated groups with a strong literary linguistic and semiotic component but extends to the fields of philosophy and history the interdisciplinary conjunctions arising from a sense of conceptual kinship It includes chapters on unstudied or less studied groups such as Tel Aviv School of poetics and semiotics or the research group Poetics and Hermeneutics The volume presents a significant supplement to the standard historical accounts of literary critical and related theory in the twentieth century It enhances and complicates our understanding of the twentieth century intellectual and academic history by showing schools and circles in the state of germination dialogue controversy or decline in their respective historical and institutional settings while reaching simultaneously beyond those dense settings to the new cultural and ideological situations of the twenty first century

Unifying Biology Vassiliki Betty Smocovitis,1996-12 Unifying Biology offers a historical reconstruction of one of the most important yet elusive episodes in the history of modern science the evolutionary synthesis of the 1930s and 1940s For more than seventy years after Darwin proposed his theory of evolution it was hotly debated by biological scientists It was not until the 1930s that opposing theories were finally refuted and a unified Darwinian evolutionary theory came to be widely accepted by biologists Using methods gleaned from a variety of disciplines Vassiliki Betty Smocovitis argues that the evolutionary synthesis was part of the larger process of unifying the biological sciences At the same time that scientists were working toward a synthesis between Darwinian selection theory and modern genetics they were according to the author also working together to establish an

autonomous community of evolutionists Smocovitis suggests that the drive to unify the sciences of evolution and biology was part of a global philosophical movement toward unifying knowledge In developing her argument she pays close attention to the problems inherent in writing the history of evolutionary science by offering historiographical reflections on the practice of history and the practice of science Drawing from some of the most exciting recent approaches in science studies and cultural studies she argues that science is a culture complete with language rituals texts and practices Unifying Biology offers not only its own new synthesis of the history of modern evolution but also a new way of doing history Human Sciences Jens Hoyrup,2000-06-08 Offers historical and philosophical arguments for treating the humanities as sciences

From Moral Theology to Moral Philosophy Tim Stuart-Buttle,2019 Tim Stuart Buttle offers a fresh view of British moral philosophy in the 17th and early 18th centuries In this period of remarkable innovation philosophers such as Hobbes Locke and Hume combined critique of the role of Christianity in moral thought with reconsideration of the legacy of the classical tradition of academic scepticism *The Cambridge Companion to Foucault* Gary Gutting,2005-07-18 For Michel Foucault philosophy was a way of questioning the allegedly necessary truths that underpin the practices and institutions of modern society He carried this out in a series of deeply original and strikingly controversial studies on the origins of modern medical and social scientific disciplines These studies have raised fundamental questions about the nature of human knowledge and its relation to power structures and have become major topics of discussion throughout the humanities and social sciences The essays in this volume provide a comprehensive overview of Foucault's major themes and texts from his early work on madness through his history of sexuality Special attention is also paid to thinkers and movements from Kant through current feminist theory that are particularly important for understanding his work and its impact This revised edition contains five new essays and revisions of many others and the extensive bibliography has been updated

Postmodernism: Disciplinary texts : humanities and social sciences Victor E. Taylor,Charles E. Winquist,1998 V 1 Foundational essays V 2 Critical Texts V 3 Disciplinary texts Humanities and social sciences V 4 Legal studies psychoanalytic studies visual arts and architecture *Pilgrims in Medicine: Conscience, Legalism and Human Rights* Thomas Faunce,2005-02-01 This arrestingly novel work develops a normative synthesis of medical humanities virtue ethics medical ethics health law and human rights It presents an ambitious complex and coherent argument for the reconceptualisation of the doctor patient relationship and its regulation utilising approaches often thought of as being separate if not opposed virtue based ethics and universal human rights The case is argued gracefully with moderation but also with respect for opposing positions The book's analysis of the foundational professional virtue of therapeutic loyalty is an original departure from the traditional discourse of patient autonomy and the ethical and legal duties of the medical practitioner The central argument is not merely presented as bookends in the introduction and conclusion It is cogently represented in each chapter and section and measured against the material considered A remarkable feature is the use of aptly selected canonical literature to inform

the argument These references run from Hesse s The Glass Bead Game in the abstract to Joyce s Ulysses in the conclusion They include excerpts from and discussion about Bergman Borges Boswell Tolstoy de Beauvoir Chekhov Dostoevsky Samuel Johnson Aristotle Orwell Osler Chaucer Schweitzer Shakespeare Thorwalds Kafka and William Carlos Williams Such references are used not merely as an artistic and decorative leitmotif but become a critical narrative element and another complex and rich layer to this work The breadth and quality of the references are testimony to the author s clear understanding of the modern law and literature movement This work provides the basis of a medical school course As many medical educators as possible should also be encouraged to read this work for the insights it will give them into using their own personal life narratives and those of their patients to inform their decision making process This thesis will also be of value to the judiciary whose members are often called upon to make normatively difficult judgments about medical care and medical rules The human rights material leads to a hopeful view of an international movement toward a universal synthesis between medical ethics and human rights in all doctor patient relationships
