The UN Secretary-General and the Security Council Manuel Fröhlich, Abiodun Williams, 2018-03-16 The United Nations Secretary General and the United Nations Security Council spend significant amounts of time on their relationship with each other. They rely on each other for such important activities as peacekeeping, international mediation and the formulation and application of normative standards in defense of international peace and security. In other words, the executive aspects of the UN's work. The UN Secretary General and the Security Council fills an important lacuna in the scholarship on the UN system. Although there exists today an impressive body of literature on the development and significance of the Secretariat and the Security Council as separate organs, an important gap remains in our understanding of the interactions between them. Bringing together some of the most prominent authorities on the subject, this volume is the first book-length treatment of this topic. It studies the UN from an innovative angle, creating new insights on the autonomous policy making of international organizations and adds to our understanding of the dynamics of intra-organizational relationships. Within the book, the contributors examine how each Secretary General interacted with the Security Council, touching upon such issues as the role of personality, the formal and informal infrastructure of the relationship, the selection and appointment processes, as well as the Secretary General's threefold role as a crisis manager, administrative manager, and manager of ideas.

Towards a Theory of United Nations Peacekeeping A.B. Fetherston, 1994-12-13 At a time when peacekeepers are struggling to fulfil increasingly demanding mandates and UN peacekeeping is in danger of losing the distinct character that won it the 1988 Nobel Peace Prize, this important book argues for a clear theoretical redefinition within a conflict resolution framework and examines the practical implications for training. This is a valuable and original contribution to the peacekeeping literature. Dr Oliver Ramsbotham, Department of Peace Studies, University of Bradford. Both for the blue helmets on the ground and for the diplomats at UN headquarters, conflict resolution skills are essential for conducting peacekeeping operations. Betts Fetherstone's excellent study points the way forward to a synthesis between conflict management and peacekeeping. Hugh Miall, Research Fellow, European Programme, Royal Institute of International Affairs. The prevailing over-taxed ad hoc system of peacekeeping does not meet the growing demands posed by the post-Cold War world. This volume argues that peacekeeping needs to be placed on firm conceptual footing, directly congruent with its peaceful third-party role. The implications of this conceptualisation of peacekeeping for practice are then discussed. Training is cited as a key means of translating conceptual understanding into practice. Without this foundation work, UN has little chance of changing its existing and largely ineffective system of conflict management. At a time when peacekeepers are struggling to fulfil increasingly demanding mandates and UN peacekeeping is in danger of losing the distinct character that won it the 1988 Nobel Peace Prize, this important book argues for a clear theoretical redefinition within a conflict resolution framework and examines the practical implications for training. This is a valuable and original contribution to the peacekeeping literature.

A United Nations for the Twenty-First Century Dimitris Bourantonis, Marios Evriviades, 2023-09-14 This collective work brings together scholars international civil servants and field practitioners who examine a wide range of theoretical and practical problems as well as challenges confronting the world and the United Nations at the dawn of the twenty first century The papers in this volume have been organized under themes which focus on problem areas and challenges that mankind must unavoidably deal with collectively in the years ahead much as it has attempted to do during the past half century The contributors address the triangular relationship between peace security and development and raise questions about the relevance of the UN system in the decades to come The authors do so through reflection on past experiences and relevant philosophical inquiries They examine specific cases and experiences that are representative of the relevance or irrelevance of past collective actions in the security and non security fields and suggest new ideas and concepts that attempt to marry theory and practice In this connection aspects of peacemaking and peacekeeping arms control economic development human rights and the critical role of education are amongst the topics analyzed and assessed One of the underlying themes of the volume is that the challenges of the twenty first century will be of unprecedented magnitude Unless the UN system is reformed and revitalized it runs the risk of becoming irrelevant

Casualties of the New World Order M. Wesley,1997-07-14 Casualties of the New World Order contends that the high rate of failure among post Cold War UN missions are attributable to common weaknesses which are vulnerable to civil war dynamics These mission weaknesses derive from the high level of control over the missions mandates and operations wielded by combinations of self interested and distracted UN member states The effects of these weaknesses are examined in the failed missions in Bosnia Somalia and Angola while their absence is observed in the successful missions to El Salvador Mozambique and Cambodia
