*Shifting Sovereignties* Moritz Mihatsch, Michael Mulligan, 2025-01-27 *Shifting Sovereignties* explores practical manifestations of sovereignty from antiquity to the Anthropocene Taking a global history perspective and centring Africa the Middle East and Asia it destabilises overly neat theoretical notions of the concept *Shifting Sovereignties* shows that in practice sovereignty is far from absolute perpetual indivisible or supreme rather it is fuzzy compromised fragmented and layered From these observations the authors derive a historical conceptualisation which makes change and contingency core aspects of the understanding of sovereignty Rather than understanding sovereignty as a characteristic of individual states Mihatsch and Mulligan propose the notion of sovereignty regimes frameworks of legitimation enforced through mutual recognition These regimes are created and managed by more or less institutionalised structures which embody what the authors call system sovereignty Sovereignty regimes and system sovereignty are like sovereignty itself continuously changing and contingent This process of change forms the core of the book *Shifting Sovereignties* thus contributes a practical historical perspective on a concept which is foundational in political science international relations and international law

**Stratified Modernism** Sasha Colby, 2009 This book proposes an alternative modernist tradition a line of writers captured by the archaeological project and the poetic possibilities it created This tradition spans from Théophile Gautier's mid nineteenth century passion for Egyptology to Charles Olson's literal excavations on the Yucatan peninsula in the 1950s With attention to the historical development of archaeology the author argues that the archaeological became a rich site of cultural fantasy a location where modernity's alternatives could be considered imagined and transcribed These models taking their cue from new archaeological dynamics include the ushering of primal intensities into the present the tapping of the subterranean unconscious and the decipherment of an original poetic language Ranging from psychic excavations to the reactivation of political templates the plumbing of the archaeological landscape became a key posture in modernist development which the author pursues through the work of both twentieth century modernists and their nineteenth century substrata Ambitious in scope this book provides a compelling argument about the role of archaeology in the modernist literary imagination and the century long evolution of the poetics of excavation
