Return To Sula:

Return to Sula Lavinia Derwent, 1985 **Sororophobia** Helena Michie, 1992 This book looks at how differences among women have been textually represented at a variety of historical moments and in a variety of cultural contexts including Victorian mainstream fiction African American mulatto novels late twentieth century lesbian communities and contemporary country music Sororophobia designates the complex and shifting relations between women's attempts to identify with other women and their often simultaneous desire to establish and retain difference Michie argues for the centrality to feminism of a paradigm that moves beyond celebrations of identity and sisterhood to a more nuanced notion of women's relations with other women which may include such uncomfortable concepts as envy jealousy and competition as well as more institutionalized ideas of difference such as race and class Chapters on literature are interspersed by inter chapters on the choreography of sameness and difference among women in popular culture *The Compliment* Don Lucas, 2009-08-12

There's more than one fish in the sea so the saying goes For Sula this is certainly true for she lives in an ocean of diverse creatures from tiny to colossal from gentle to aggressive Some being so dangerous they seek to make her part of their daily diet Only the unimaginable and bizarre circumstances of her conception make her existence even possible in this harsh world This diversity and variety add delight and adventure to her charmed life until she becomes of age and realizes that every creature in her vast world has a compliment a mate with which they can produce little ones of their kind That is every creature but her Since they all come from a mating pair where is she to find the pair that produced her Her quest leads to adventures and discoveries both delightful and frightening until it eventually leads her to her mate her compliment in a love story to rival the classics as her life unfolds *Race, Trauma, and Home in the Novels of Toni Morrison* Evelyn Jaffe Schreiber, 2010-12 In this first interdisciplinary study of all nine of Nobel Laureate Toni Morrison's novels Evelyn Jaffe Schreiber investigates how the communal and personal trauma of slavery embedded in the bodies and minds of its victims lives on through successive generations of African Americans Approaching trauma from several cutting edge theoretical perspectives psychoanalytic neurobiological and cultural and social theories Schreiber analyzes the lasting effects of slavery as depicted in Morrison's work and considers the almost insurmountable task of recovering from trauma to gain subjectivity With an innovative application of neuroscience to literary criticism Schreiber explains how trauma whether initiated by physical abuse dehumanization discrimination exclusion or abandonment becomes embedded in both psychic and bodily circuits Slavery and its legacy of cultural rejection create trauma on individual familial and community levels and parents unwittingly transmit their trauma to their children through repetition of their bodily stored experiences Concepts of home whether a physical place community or relationship are reconstructed through memory to provide a positive self and serve as a healing space for Morrison's characters Remembering and retelling trauma within a supportive community enables trauma victims to move forward and attain a meaningful subjectivity and selfhood Through careful analysis of each novel Schreiber

traces the success or failure of Morrison's characters to build or rebuild a cohesive self starting with slavery and the initial postslavery generation and continuing through the twentieth century with a special focus on the effects of inherited trauma on children. When characters attempt to escape trauma through physical relocation or to project their pain onto others through aggressive behavior or scapegoating, the development of selfhood falters. Only when trauma is confronted through verbalization and challenged with reparative images of home can memories of a positive self overcome the pain of past experiences and cultural rejection. While the cultural trauma of slavery can never truly disappear, Schreiber argues that memories that reconstruct a positive self, whether created by people, relationships, a physical place, or a concept, help Morrison's characters to establish subjectivity. A groundbreaking interdisciplinary work, Schreiber's book unites psychoanalytic, neurobiological, and social theories into a full and richly textured analysis of trauma and the possibility of healing in Morrison's novels.

The Cambridge Introduction to Toni Morrison Tessa Roynon, 2013. Lively and accessibly written, this Introduction offers readers a guide to the complex and rewarding literature of Toni Morrison.

Popular Culture in America Paul Buhle, 1987. Essays discuss television, criticism, science fiction, horror, women's humor, sports, novels, country music, comic strips, and television programs.

Black Heart Phillip M. Richards, 2006. *Black Heart* is a provocative and polemical critique of African American literary studies at the beginning of the twenty-first century. Through a series of sharp and insightful essays on a wide range of critical thinkers, Phillip M. Richards traces what he sees as an erosion of moral reflection in African American literary culture, a process that has left contemporary black academic criticism socially, politically, and culturally hollow. Exploring the work of Henry Louis Gates Jr., Michael Dyson, Karla Holloway, and others, *Black Heart* sets forth the rhetorical strategies of present-day African American critical writing and probes the ethical dimensions of its institutional life in the academy, the media, and the public sphere. Richards undertakes to recover the procedures by which cultural and moral value may be recovered for black literary culture and to establish the possibilities for a new humanism in African American writing and literary culture.

The Lever of Riches Joel Mokyr, 1992-04-09. In a world of supercomputers, genetic engineering, and fiber optics, technological creativity is ever more the key to economic success. But why are some nations more creative than others, and why do some highly innovative societies, such as ancient China or Britain, in the industrial revolution pass into stagnation? Beginning with a fascinating, concise history of technological progress, Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome. What emerges from this survey is often surprising: the classical world, for instance, was largely barren of new technology; the relatively backward society of medieval Europe bristled with inventions; and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology, despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution. What were the causes of technological creativity? Mokyr distinguishes between the relationship of inventors and their physical environment, which

determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation's creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential
