Returns of Internally Displaced Persons during Armed Conflict David

James Cantor, 2018-04-24 By 2017 it was estimated that over 40 million people were displaced within their own countries by conflict and violence across at least 56 countries worldwide Solutions to the epidemic of forced internal displacement are frequently premised on the return of internally displaced persons IDPs Indeed as a characteristic need of IDPs such returns benefit from a special protection framework developed by IDP protection instruments such as the Guiding Principles However the legal status of those instruments remains ambiguous generating attendant questions about the congruity of the IDP return framework with existing international law Moreover limited knowledge exists on its practical implementation As a result both inter national agencies and individual scholars have repeatedly issued urgent calls for comprehensive and grounded theoretical investigation into this topic This book answers those long standing calls for research by presenting a detailed study of the return of conflict affected IDPs under international law □□□□□ K. Crossing the Bridge of the

Digital Divide Anthony H. Normore, Antonia Issa Lahera, 2018-09-01 Crossing the Bridge of the Digital Divide A Walk with Global Leaders explores the combined effect of the rapid growth of information as an increasingly fragmented information base a large component of which is available only to people with money and or acceptable institutional affiliations In the recent past the outcome of these challenges has been characterized as the digital divide between the information haves and have nots along racial and socio economic lines that seem to widen as time passes To address the issues of digital equity and digital inequality in an effort to bridge the digital divide educational scholars researchers and practitioners are in positions to ensure equitable opportunities are made available for people of all ages races ability sexual orientation and ethnicity in support of social justice for bridging the digital divide The digital divide addresses issues concerning equal opportunity equity and access that have an effect on the development of marginalized and otherwise disenfranchised populations within and across systems nationally and internationally The contributing authors representing United States Canada South Africa New Zealand and the UK posit that education institutions can serve as the bridge to close the digital divide for students who do not have access to information technology in their homes At a time when more computers are made available in schools

than ever before the digital divide continues to widen and fewer people in the lowest SES groups are given the opportunity to join the world of computer technology and the internet As a result the influence of leadership activity on institutional racism gender discrimination inequality of opportunity inequity of educational processes digital exclusion and justice have gained currency and attention The contributing national and international authors examine the digital divide in terms of social justice leadership equity and access It is within this context that the authors offer discussions from a lens of their choice i e conceptual review of literature epistemological etc By adopting an educational approach to bridging the digital divide researchers and practitioners can connect and extend long established lines of conceptual and empirical inquiry aimed at improving organizational practices and thereby gain insights that might be otherwise overlooked or assumed This holds great promise for generating refining and testing theories of leadership for equity and access and helps strengthen already vibrant lines of inquiry on social justice

International Higher Education's Scholar-Practitioners Bernhard Streitwieser,Anthony C. Ogden,2016-03-01 The idea of the professional who bridges both research and practice has been largely overlooked and at times even disregarded by the academic and administrative structures that govern activity in higher education today In international higher education the number of students who now engage in mobility and exchange has expanded globally along with the administrative cadre that manages all facets of internationalization and the quickly growing scholarly attention to understanding the phenomenon In this process two distinct professional categories have emerged those who study it and those who do it the scholars and the practitioners Practitioners are seen as those who manage the daily logistical flow of students and personnel around the globe while scholars are seen as those who conduct research collect and analyze data and publish findings to inform improve and justify the activity Yet this dichotomy is overly simplistic outdated and excludes the large and growing class of hybrid scholar practitioners who now engage regularly in both kinds of activity It is this rapidly growing population of bridge builders that are profiled and discussed in this book through critical essays on the notion of the scholar practitioner and its implication for the further development of international higher education The chapters include detailed analyses from university faculty senior international officers and other high level administrators directors of research centers key leaders from influential professional associations and private organizations managers of study abroad and exchange and graduate students This book launches a much needed dialogue about the perception and reality potential and promise of the scholar practitioner in higher education today It will be of relevance to a wide variety of readers from those within universities and organizations to those who are outside observers of higher education Cultural Awareness and Competency Development in Higher Education Leavitt, Lynda,Wisdom, Sherrie,Leavitt, Kelly,2017-02-08 As the world becomes more globalized student populations in university settings will continue to grow in diversity To ensure students develop the cultural competence to adapt to new environments universities and colleges must develop policies and programs to aid in the progression of cultural acceptance and understanding Cultural Awareness and Competency Development in Higher Education is an essential reference book on the latest literature regarding multiculturalism in colleges and universities focusing on administration and faculty implementation of culturally aware curriculum to support the development of students global competence Featuring extensive coverage on a range of topics including social constructivism co curricular learning and inclusive pedagogy this publication is ideally designed for academicians researchers and students seeking current research on the inclusion of culturally diverse curriculums in higher education
