Body Geographic Barrie Jean Borich, 2019-05-15 A memoir from the award winning author of *My Lesbian Husband* Barrie Jean Borich's *Body Geographic* turns personal history into an inspired reflection on the points where place and person intersect where running away meets running toward and where dislocation means finding oneself One coordinate of Borich's story is Chicago the prototypical Great Lakes port city built by immigrants like her great grandfather Big Petar and the other is her own port of immigration Minneapolis the combined skylines of these two cities tattooed on Borich's own back Between Chicago and Minneapolis Borich maps her own Midwest a true heartland in which she measures the distance between the dreams and realities of her own life her family's and her fellow travelers in the endless American migration Covering rough terrain from the hardships of her immigrant ancestors to the travails of her often drunk young self longing to be madly awake in the world from the changing demographics of midwestern cities to the personal transformations of coming out and living as a lesbian *Body Geographic* is cartography of high literary order plotting routes real and imagined and putting an alternate landscape on the map

Aereality William Fox, 2009-05-01 William Fox's writing for the last several years has been focused on how we construct aerial views either physically by flying or in our imaginations In *Aereality* he flies over earthworks in Nevada and Utah soars through the world's largest open pit mine and surveys Los Angeles circumnavigating large swaths of true American urban sprawl On the East Coast he examines the elevated art of the Hudson River Valley and New York City And finally in Australia Fox examines the history and current practice of both Euro Australian and Aboriginal aerial views and searches for the cognitive roots of our aerial imagination Accompanying Fox throughout his travels is a rolling cast of enlightened fliers geographers museum curators landscape photographers anthropologists and artists He traverses the sky in prop planes helicopters and hot air balloons all with the ultimate goal of knowing and experiencing the earth from the air

Photography and Flight Denis Cosgrove, William L. Fox, 2010-04-01 Used for everything from geographic evaluation to secret spy missions aerial photography has a rich and storied history ably recounted here in *Photography and Flight* Aerial photography is marked by its dependency on technological developments in both photography and aerospace and the authors chart the history of this photography as it tracked the evolution of these technologies Beginning with early images taken from hot air balloons fixed platforms and subsequent handheld camera technology Denis Cosgrove and William Fox then explain how military reconnaissance and governmental projects were instrumental in catalyzing these and other innovations in the field They

examine pivotal historical moments in which aerial photography began to establish itself as essential tool such as in World War II military strategies high altitude photography taken from postwar rockets and aircraft and the use of aerial photography during the cold war and the Cuban Missile Crisis The book also explores the advancement of geographic scholarship through aerial photography ranging from military excursions into Antarctica to the images of the curvature of the earth taken during the Apollo space missions While digital technology and remote sensing have changed the landscape of photography Photography and Flight argues that they have not diminished the significance of aerial photography in providing images of the earth Rather new technologies and resulting innovations such as Google Earth have enabled the mass democratization of access to such information Photography and Flight ultimately reveals how the camera lens from far away continues to unearth telling details about the land and those who live upon it

political power necessary for supporting an aggressive program of construction that focused on signature projects along the city's lakefront including especially Millennium Park Navy Pier the Museum Campus Northerly Island Soldier Field and two major expansions of McCormick Place the city's convention center During this period Daley also presided over major residential construction in the Loop and in the surrounding neighborhoods devoted millions of dollars to beautification efforts across the city and increased the number of summer festivals and events across Grant Park As a result of all these initiatives the number of tourists visiting Chicago skyrocketed during the Daley years Daley has been harshly criticized in some quarters for building a tourist oriented economy and infrastructure at the expense of other priorities Daley left his successor Rahm Emanuel with serious issues involving a long standing pattern of police malfeasance underfunded and uneven schools inadequate housing opportunities and intractable budgetary crises Nevertheless Spirou and Judd conclude because Daley helped transform Chicago into a leading global city with an exceptional urban culture he also left a positive imprint on the city that will endure for decades to come
