Divine Mania Yulia Ustinova, 2017-10-16

Our greatest blessings come to us by way of mania provided it is given us by divine gift says Socrates in Plato's Phaedrus. Certain forms of alteration of consciousness considered to be inspired by supernatural forces were actively sought in ancient Greece. Divine mania comprises a fascinating array of diverse experiences; numerous initiates underwent some kind of alteration of consciousness during mystery rites; sacred officials and inquirers attained revelations in major oracular centres; possession states were actively sought; finally some thinkers such as Pythagoras and Socrates probably practiced manipulation of consciousness. These experiences, which could be voluntary or involuntary, intense or mild, were interpreted as an invasive divine power within one's mind or illumination granted by a superhuman being. Greece was unique in its attitude to alteration of consciousness. From the perspective of individual and public freedom, the prominent position of the divine mania in Greek society reflects its acceptance of the inborn human proclivity to experience alteration of consciousness interpreted in positive terms as god sent. These mental states were treated with cautious respect and in contrast to the majority of complex societies, ancient and modern, were never suppressed or pushed to the cultural and social periphery.

Encountering Ability: On the Relational Nature of (Human) Performance Scott DeShong, 2016-07-18. In *Encountering Ability*, Scott DeShong considers how ability and its correlative disability come into existence. Besides being articulated as physical, social, aesthetic, political, and specifically human, ability signifies and is signified such that signification itself is always in question. Thus the language of ability and the ability of language constitute discourse that undermines foundations including any foundation for discourse or ability. Drawing on Gilles Deleuze's theory of primary differentiation and Emmanuel Levinas's philosophy of ethical relationality, *Encountering Ability* finds implications of music, theology, and cursing in the signification of ability and also examines various literary texts including works by Amiri Baraka and Marguerite Duras.

Mental Health Ethics Phil Barker, 2010-11-09. *Mental Health Ethics* provides an overview of traditional and contemporary ethical perspectives and critically examines a range of ethical and moral challenges present in contemporary psychiatric mental health services.

The Cambridge Companion to Fairy Tales Maria Tatar, 2014-12-11. Fairy tales have never known geographical, disciplinary, or cultural borders. In many ways they provide a model for thinking about storytelling on a transnational level long before comparative literature began transforming itself into world literature. As the simple expression of complex thought, fairy tales have increasingly become the focus of intense scholarly inquiry. In this Companion, international scholars from a range of academic disciplines explore the historical origins, cultural dissemination, and psychological power of fairy stories and offer model interpretations of tales from a variety of traditions and sources including Charles Perrault, the Brothers Grimm, and the *One Thousand and One Nights*. Rather than disenchanting the stories, the essays in this volume broaden our understanding of them and deepen our appreciation of the cultural work they do. A chronology and guide to further reading contribute to the usefulness of the volume for students and

Wilkin, 2016-12-05 Grounded in medical juridical and philosophical texts of sixteenth and seventeenth century France this innovative study tells the story of how the idea of woman contributed to the emergence of modern science Rebecca Wilkin focuses on the contradictory representations of women from roughly the middle of the sixteenth century to the middle of the seventeenth and depicts this period as one filled with epistemological anxiety and experimentation She shows how skeptics including Montaigne Marie de Gournay and Agrippa von Nettesheim subverted gender hierarchies and or blurred gender difference as a means of questioning the human capacity to find truth while positivists who strove to establish new standards of truth for example Johann Weyer Jean Bodin and Guillaume du Vair excluded women from the search for truth The book constitutes a reevaluation of the legacy of Cartesianism for women as Wilkin argues that Descartes opening of the search for truth even to women was part of his appropriation of skeptical arguments This book challenges scholars to revise deeply held notions regarding the place of women in the early modern search for truth their role in the development of rational thought and the way in which intellectuals of the period dealt with the emergence of an influential female public **The Routledge Companion to Art and Disability** Keri Watson, Timothy W.
