It is designed to introduce the literature on education finance to scholars and prospective scholars and can be used as a textbook for a graduate level education finance class. The topics in the book include the incidence of the property tax as a source of revenue for elementary and secondary education, how much more it costs to reach a state's education targets in a high poverty school district than in a rich district, the design of state education aid programs, the impact of school quality on house values, the cost implications of school district consolidations, and the impact of state aid on school infrastructure. California in a Time of Excellence James Andrew LaSpina, 2009-02-26 Follows California's efforts at reforming the public school system from 1983 to the present.

To What Ends and By What Means Gloria M. Rodriguez, R. Anthony Rolle, 2013-10-31 This unique collection examines the social justice implications of contemporary economic finance and budgeting policies affecting the K-12 education system in the United States. The authors included in this volume provide critiques and explorations of several established theories and policy approaches that undergird contemporary thinking in the field of school finance. These explorations offer themselves as foundations for building new frameworks to understand how school finance policies might better support broader changes needed to improve the educational conditions faced by those individuals and groups traditionally underrepresented in economic, political, and social policy arenas. **California Policy Options**, 2004 **Revenues and Limits** Paul M. Justice, Eric Anthony Scorsone, 2012 Fiscal health of local governments and municipalities has remained an important issue since the crises of the 1970s in places like New York, Philadelphia, and Cleveland. More recently, the bankruptcy of Orange County, California, raised the possibility of a different type of financial failure than earlier ones. The beginning of the 21st century has witnessed two major economic bubbles, including the dotcom and housing bubbles. These economic cycles, combined with increasing health care, pension, and other structural costs, continue to challenge the fiscal viability of many jurisdictions. In particular, the economic and financial crisis of 2007-2008 is
