## Revered Earth:

**Future Earth** Mark Alan Lindsley, 2023-11-03 Long ages after the god like Others unleashed the Genetic Wars that annihilated the Old Earth war is once again threatening to consume the planet shattering an uneasy peace between the remnant races of that primordial conflict Kiel First Commander of the reptilian Eligor Empire s Imperial Intelligence Service is obsessed with seeking out help from the primitive human Protectorate in order to determine why the once benign insect like Ikonians are suddenly and inexplicably on the rampage and together find a way of stopping them Bishop the human selected to assist Kiel has little love for the Eligor but is forced by the masters of his knightly order to comply with the Eligor plea for help due to his unique and prophetic ability to use certain Old Earth technologies Prophecy might finally be fulfilled and order restored to the world if Bishop is successful Unfortunately the near magical and awesome science of the Others does not give up its secrets easily and worse Bishop must journey to the very heart of Ikonian wherein awaits an even greater threat a threat out of time itself and with nothing but a hated Eligor and an ill bred Wolf Bird for company **Revered**

**Earth** , 1990 *The Legacy of the Goddess* Rachel S. McCoppin, 2023-04-10 It is often assumed that the female characters found in popular folk and fairy tales are little more than inconsequential stereotypes mostly serving as hapless victims in need of rescue boring one dimensional princesses or egotistical and conniving villains This book presents more fully realized portraits of these female characters and the ways in which they actually represent bold and powerful connections to the goddesses of classic mythic narratives The rich legacy of female goddesses shamans queens and priestesses is in fact preserved and celebrated through these more modern representations whether as brides who can transform into animals wise old women who live alone in the deep wilderness strong warrior maidens or witches who can conquer and command the elements of nature In contemplating this revised analysis of female characters within global folktales and fairy tales readers can see that the goddesses of old have never truly been forgotten **Mother Earth, Mother Africa & African Indigenous**

**Religions** Nobuntu Penxa Matholeni, Georgina Kwanima Boateng, Molly Manyonganise, 2020-08-04 Africans embrace all of life the humanity of each person the world and the creation of God Consequently African indigenous education reflects the completeness of life itself The various chapters in this volume recount religious events and experiences from individual perspectives as they are unfolding on the continent The different voices show how modernity colonisation urbanisation Christianity and technology have sidelined beliefs and practices of African traditional religions ATRs to the detriment of the environment This volume brings together voices from leading proponents of ATRs and African religious heritage to help us appreciate how values are richly entrenched in African religious life It demonstrates the detailed richness of ATRs and culture and showcases how far the academic study of ATRs in Africa has come and calls for a concerted effort through partnership between various actors to ensure environmental sustainability Codgerspace Alan Dean Foster, 2024-04-09 Technology becomes self aware and goes haywire in this comedic science fiction adventure by New York Times bestselling

author Alan Dean Foster Without warning kitchen appliances laundry machines and every other electronic gadget humans came to depend upon ceased to perform the tasks they were manufactured to do Ignoring their programming these devices now sought the meaning of life from an intelligence nonhuman in origin Their quest ends in the most unexpected of places Beneath the grounds of an upstate New York retirement community lies an alien spaceship Inert for millennia the machines have awakened the ancient intelligence within it Programmed to wage war against an enemy race the spaceship threatens to destroy the entire galaxy And now the fate of all organic and inorganic life lies with five senior citizens and a food processor

*Goddess Lost* Rachel S. McCoppin, 2023-02-13 Drawing upon historical archaeological and mythical examples from around the world this book reveals how societal views of female empowerment and authority can be directly traced to the reverence once directed towards female warriors priestesses healers queens pharaohs and goddesses Communities which revered women as sacred idols of their belief systems were far more likely to place women in prominent positions of social or political influence since their members were quite used to envisioning power in the hands of a strong or divine woman The book also explores how goddesses were purposefully devalued during the rise of patriarchal civilizations thus restricting the social importance of earthly women and their accompanying rights One such instance can be found in Greek mythology's Gaia once revered as a dominant earth mother she was replaced by a division of less powerful figures with more socially acceptable feminine roles such as Aphrodite the goddess of love typically held up as an object of male lust Hera the goddess of marriage and childbirth often portrayed as obsessed with jealousy over the extramarital exploits of her husband and the mostly silent goddess of the hearth Hestia The devaluing of once revered goddesses appeared in quite distinct ways across different cultures thus this book breaks down its chapters by global region including Europe the Middle East the

**The Seventh Age** Jason Montgomery,2015-04-30 Winning the ultimate battle of survival does not require staying alive The planet awakes unleashing a hidden fury Caught at the epicenter of the first earthquake in centuries Dabaz Huavossa soon finds it was only the harbinger of a vast misery to follow And though his utopian world is suddenly disintegrating around him Dabaz craves more than mere survival Unwittingly binding himself to an unexpected mentor the highest leader of his land a member of the strange race of people called the Immortals Dabaz is forced to confront life s deepest questions while increasingly mistrusting this one who claims to hold the answers Dabaz fights a growing dread all life is pointless when trapped in a rush to the grave His scrabbling for a life worth living pits him against all he holds dear and blinds him to the fact that he is equipping his increasingly savage society for the ultimate battle the battle with no neutral ground the battle in which choosing whom to trust is choosing whether to live or die the battle that determines not just Dabaz s fate but the ultimate fate of mankind A story that defies easy categorization The Seventh Age deftly combines many subsets of speculative fiction it is a scientific metaphysical utopian dystopian mythical historical distorted hero s journey interwoven with philosophical rumination The reader will be engrossed will certainly be called upon to think and will perhaps come away profoundly changed      Thinking with the Harrisons Anne Douglas,Chris Fremantle,2024-09-30 Helen Mayer Harrison and Newton Harrison known as the Harrisons dedicated five decades to exploring and demonstrating a new approach to artistic practice centred on doing no work that does not attend to the wellbeing of the web of life Their collaborative practice pioneered a way of drawing together art and ecology They closely observed often with irony and humour how human intervention disrupts the dynamics of life as a web of interrelationships The authors of this book think with the Harrisons critically tracing their poetics as a reimagining and reconfiguring of the arts in response to the unfolding planetary crisis They draw parallels between the artists poetics and rethinking in the philosophy of science particularly drawing on the work of Isabelle Stengers and Alfred North Whitehead Thinking with the Harrisons is for anyone concerned with the implications of ecology as part of a reimagining of public life including through the interaction of art and science Throughout their joint practice the Harrisons sought to engage policy makers governments ecologists artists and inhabitants of specific places sensitizing us to the crises that emerge from grounded experiences of place and time      **Grassroots Innovation** Anil K Gupta,2016-07-20 A moral dilemma gripped Professor Gupta when he was invited by the Bangladeshi government to help restructure their agricultural sector in 1985 He noticed how the marginalized farmers were being paid poorly for their otherwise unmatched knowledge The gross injustice of this constant imbalance led Professor Gupta to found what would turn into a resounding social and ethical movement the Honey Bee Network bringing together and elevating thousands of

grassroots innovators For over two decades Professor Gupta has travelled through rural lands unearthing innovations by the ranks from the famed Mitti Cool refrigerator to the footbridge of Meghalaya He insists that to fight the largest and most persistent problems of the world we must eschew expensive research labs and instead look towards ordinary folk Innovation that oft flung around word is stripped to its core in this book Poignant and personal Grassroots Innovation is an important treatise from a social crusader of our time

**Thinking** Nima Rezaei, Amene Saghaadeh, 2022-09-05 The THINKING Bioengineering of Science and Art is to discuss about philosophical aspects of thinking at the context of Science and Art External representations provide evidence that the fundamental process of thinking exists in both animal subjects and humans However the diversity and complexity of thinking in humans is astonishing because humans have been permitted to integrate scientific accounts into their accounts and create excellent illustrations for the effects of this integration The book necessarily begins with the origins of human thinking and human thinking into self and others body and life Multiple factors tend to modify the pattern of thinking They all will come into play by this book that brings thinking into different disciplines humanities natural sciences social sciences formal sciences and applied sciences The thinking demands full processing of information and therefore the book considers the economy of thinking as well The book thoroughly intends to explore thinking beyond the boundaries Specifically several chapters are devoted to discipline this exploration either by artistic thinking alone or by art and mathematics aided engineering of complexities In this manner the book models variations on thinking at the individual and systems levels and accumulates a list of solutions each good for specific scenarios and maximal outcomes
