Learning To Read Laurence Rieben, Charles

A. Perfetti, 2013-12-16 How does a young child begin to make sense out of squiggles on a page Is learning to read a process of extending already acquired language abilities to print What comprises this extension How children learn to read and especially how children are taught to read are problems of sustained scientific interest and enduring pedagogical controversy This volume presents conceptual and theoretical analyses of learning to read research on the very beginning processes of learning to read as well as research on phonological abilities and on children who have problems learning to read In so doing it reflects the important discovery that learning to read requires mastering the system by which print encodes the language The editors hope that some of the work offered in this text will influence future research questions and will make a difference in the way instructional issues are formulated **Fifth Annual Workshop on Space Operations Applications and Research (SOAR '91)**, 1992

Schizophrenia Bulletin, 2008 **Linguistic Analyses of Aphasic Language** Wolfgang U. Dressler, Jaqueline A. Stark, 2012-12-06 Linguistic Analyses of Aphasic Language represents results from linguistic and neurolinguistic research on aphasic language performance The contributions encompass all linguistic levels ranging from phonetics to discourse and

present results on languages other than English The findings and applied methods are both relevant to the study of aphasia in general and to cross linguistic analyses Furthermore they have clear implications for language and speech therapy and thus show the importance of linguistic concepts for language testing and therapeutic intervention *Automatic Regulation and Control* B. I. Andreichikov, 1966 **NASA Technical Translation**, 1965 **Basic Functions of Language, Reading and Reading Disability** Evelin Witruk, Angela D. Friederici, Thomas Lachmann, 2012-12-06 The present book contains selected contributions from the international conference Basic Mechanisms of Language and Language Disorders This conference was held in Leipzig in September 1999 and was organized by the Department of Psychology at the University of Leipzig in collaboration with the Max Planck Institute of Cognitive Neuroscience and the Max Planck Institute for Evolutionary Anthropology It was held to commemorate the 120th anniversary of the foundation of the world's first institute of experimental psychology by Wilhelm Wundt in Leipzig This edition examines new results from different fields of psychology and neuro psychology of language reading and reading disability The presented book focuses on the following main topics BASIC FUNCTIONS OF LANGUAGE ACQUISITION AND LANGUAGE COMPREHENSION BASIC FUNCTIONS OF READING BASIC FUNCTIONS OF READING DISABILITY The title Basic Functions of Language Reading and Reading disability expresses the interdisciplinary character of the book It aims not only at bringing together different theoretical approaches but also at connecting these approaches with applied work Since it is necessary to understand basic functions of language and reading in order to understand reading disability the present book strives to foster a scientific exchange and to promote the emergence of synergy effects between the different fields **The Nature of Mathematical Thinking** Robert J. Sternberg, Talia Ben-Zeev, 2012-10-12 Why do some children seem to learn mathematics easily and others slave away at it learning it only with great effort and apparent pain Why are some people good at algebra but terrible at geometry How can people who successfully run a business as adults have been failures at math in school How come some professional mathematicians suffer terribly when trying to balance a checkbook And why do school children in the United States perform so dismally in international comparisons These are the kinds of real questions the editors set out to answer or at least address in editing this book on mathematical thinking Their goal was to seek a diversity of contributors representing multiple viewpoints whose expertise might converge on the answers to these and other pressing and interesting questions regarding this subject The chapter authors were asked to focus on their own approach to mathematical thinking but also to address a common core of issues such as the nature of mathematical thinking how it is similar to and different from other kinds of thinking what makes some people or some groups better than others in this subject area and how mathematical thinking can be assessed and taught Their work is directed to a diverse audience psychologists interested in the nature of mathematical thinking and abilities computer scientists who want to simulate mathematical thinking educators involved in teaching and testing mathematical thinking philosophers who need to understand the qualitative aspects of logical thinking

anthropologists and others interested in how and why mathematical thinking seems to differ in quality across cultures and laypeople and others who have to think mathematically and want to understand how they are going to accomplish that feat

Other Children, Other Languages Yonata Levy, 2013-05-13 This volume investigates the implications of the study of populations other than educated middle class normal children and languages other than English on a universal theory of language acquisition. Because the authors represent different theoretical orientations, their contributions permit the reader to appreciate the full spectrum of language acquisition research. Emphasis is placed on the principle ways in which data from pathology and from a variety of languages may affect universal statements. The contributors confront some of the major theoretical issues in acquisition.
