The Great Reversal: How We Let Technology Take Control of the Planet David Tabachnick,2013-01-01 Every day we are presented with new technologies that can influence human thought and action such as psychopharmaceuticals new generation performance enhancing drugs elective biotechnology and gastric bypass surgery Have we let technology go too

far in this respect In *The Great Reversal* David Edward Tabachnick contends that this question may not be unique to contemporary society Through an assessment of the great works of philosophy and politics Tabachnick explores the largely unrecognized history of technology as an idea *The Great Reversal* takes the reader back to Aristotle's ancient warning that humanity should never allow technical thinking to cloud our judgment about what makes for a good life It then charts the path of how we began to relinquish our deeply rooted intellectual and practical capacities that used to allow us to understand and regulate the role of technologies in our lives As the rise of technology threatens our very humanity Tabachnick emphasizes that we still may have time to recover and develop these capacities but we must first decide how far we want to allow technology to determine our existence and our future

Reverse Your Diabetes in 12 Weeks George King, Royce Flippin, 2016-10-21 A groundbreaking program to avoid control and even reverse diabetes through diet and exercise The research of Dr George King chief scientific officer of Harvard Medical School's Joslin Diabetes Center is widely recognized in the medical community as the gold standard In *Reverse Your Diabetes in 12 Weeks* previously published in hardcover as *The Diabetes Reset* Dr King transforms the center's cutting edge research including the discovery of brown fat and how it enhances the effects of the body's own insulin into a program of eight proven strategies Foremost is diet but the real surprise is that the diet that actually works a modified rural Asian diet derives 70% of its calories from carbohydrates Dr King disentangles the myths and confusion surrounding carbohydrates fats protein and fiber and shows why not all carbs are bad and why sugar is not the root of all evil Losing weight is also key but in a very doable way significant changes happen with a 5 to 7% reduction of body weight He emphasizes the importance of exercise it increases the muscles glucose absorbing ability and gives an easy to follow program of aerobic and strength exercises And he shows why diabetics especially need those seven hours of sleep a night chronic lack of sleep causes insulin resistance A twelve week plan shows how to put all of it into action to take charge of blood glucose levels and significantly improve your health
