Food Safety Management Veslemøy Andersen,Huub L. M. Lelieveld,Yasmine

Motarjemi, 2023-03-28 Food Safety Management A Practical Guide for the Food Industry Second Edition continues to present a comprehensive integrated and practical approach to the management of food safety throughout the production chain. While many books address specific aspects of food safety, no other book guides you through the various risks associated with each sector of the production process or alerts you to the measures needed to mitigate those risks. This new edition provides practical examples of incidents and their root causes, highlighting pitfalls in food safety management and providing key insights into different means for avoiding them. Each section addresses its subject in terms of relevance and application to food safety and where applicable, spoilage. The book covers all types of risks, e.g. microbial, chemical, physical, associated with each step of the food chain, making it an ideal resource. Addresses risks and controls at various stages of the food supply chain based on food type, including a generic HACCP study and new information on FSMA. Covers the latest emerging technologies for ensuring food safety. Includes observations on what works and what doesn't on issues in food safety management. Provides practical guidelines for the implementation of elements of the food safety assurance system. Explains the role of different stakeholders of the food supply.

Handbook of Research on Food Processing and Preservation Technologies Megh R. Goyal, Monika Sharma, Preeti Birwal, 2021-11-25 The Handbook of Research on Food Processing and Preservation Technologies is a valuable 5 volume collection that illustrates various design, development and applications of novel and innovative strategies for food processing and preservation. The roles and applications of minimal processing techniques such as ozone treatment, vacuum drying, osmotic dehydration, dense phase carbon dioxide treatment, pulsed electric field and high pressure assisted freezing are discussed along with a wide range of applications. The handbook also explores some exciting computer aided techniques emerging in the food processing sector such as robotics, radio frequency identification, RFID, three dimensional food printing, artificial intelligence etc. Some emphasis has also been given on nondestructive quality evaluation techniques such as image processing, terahertz spectroscopy imaging technique, near infrared, Fourier transform infrared spectroscopy technique etc for food quality and safety evaluation. The significant roles of food properties in the design of specific foods and edible films have been elucidated as well. Volume 4 Design and Development of Specific Foods, Packaging Systems and Food Safety presents new research on health food formulation, advanced packaging systems and toxicological studies for food safety. This volume covers in detail the design of functional foods for beneficial gut microflora, design of specific foods for gut microbiota, composite probiotic dairy products, concepts and design with a focus on millets, encapsulation technology for development of specific foods, prospects of edible and alternative food packaging technologies, recent advancements in edible and biodegradable materials for food packaging, potential of ozonation in surface modification of food packaging polymers, characterization, applications and safety aspects of nanomaterials used in food and dairy industry, toxic effects of tinplate corrosion and mitigation measures in canned foods. Other volumes in the set include Volume 1 Nonthermal and Innovative Food Processing Methods, Volume 2 Nonthermal Food

Preservation and Novel Processing Strategies Volume 3 Computer Aided Food Processing and Quality Evaluation Techniques Volume 5 Emerging Techniques for Food Processing Quality and Safety Assurance The book helps to provide an understanding of different food formulations and development of edible packaging techniques with emphasis on the assessment of food product safety and quality The book also provides information on various methods of formulation for development of new and safe products Together with the other volumes in the set Handbook of Research on Food Processing and Preservation Technologies will be a valuable resource for researchers scientists students growers traders processors industries and others
