## Revisiting Reform Lessons From Georgia:

Razmyslâ o reforme energetičeskogo sektora, 2004      Analyzing the Distributional Impact of Reforms: A practitioner's guide to trade, monetary and exchange rate policy, utility provision, agricultural markets, land policy, and education World Bank, 2005 This publication is a practitioner's guide for analyzing the distributional impact of reforms to trade monetary and exchange rate policy utility provision agricultural markets land policy and education These six areas of policy reform are the ones most likely to have an impact on distribution and poverty Such analysis helps in policy formulation and development and for implementing poverty reduction strategies in developing countries Each chapter in this volume provides an overview and guidance on the specific issues arising in the analysis of the distributional impacts of policy and institutional reforms in selected sectors      **Deregulation and Its Discontents** M. Ramesh, Michael Howlett, 2006-01-01 an extremely interesting collection full of insights and institutional detail The book definitely deserves the attention of those interested in one of the most debated issues of the last 20 years in economics and political science Herb Thompson Journal of Contemporary Asia Deregulation and its Discontents examines the different ways in which the issues related to deregulation and reregulation have been addressed in Asia The role of government in business has gone through distinct if overlapping cycles regulation deregulation and reregulation However little is known about deregulation and even less about reregulation particularly in relation to Asia The contributors to this book examine the links between the cycles through detailed analyses of the electricity market pensions and stock markets in the Asia Pacific They also offer an explanation of regulatory cycles This unique and inter disciplinary book is thoroughly accessible and will be suitable for specialist as well as non specialist readers It will appeal to academics and researchers of public sector economics Asian studies and the political economy of Asia in particular as well as public officials dealing with regulatory issues      **Razmyshliâ o Reforme Energeticheskogo Sektora** Julian A. Lampietti, 2004 One of the harsher realities of independence for the former Soviet republics has been the loss of subsidized transfers from the center for fuel and utilities In the years since independence Georgians with other energy poor republics have been subject to higher costs and declining service levels for household utilities particularly energy The combination of low household incomes high international prices for fuel the need for utilities to rely on internally generated funds for capital investment low household incomes and the political ramifications of removing subsidies at a time of general economic decline have led to a worst of all worlds situation Revisiting Reforms reviews the changes in the supply of electricity and gas in Georgia from the perspective of households utility operators and the government It highlights lessons from the reforms implemented and applies them to the future reform program planned for the rest of the energy sector The title concludes that improved service quality and the increased supply of clean and subsidized natural gas have offset the potentially negative impact of higher electricity prices      *Poverty and Social Impact Analysis of Reforms* Aline Coudouel, Anis A. Dani, Stefano Paternostro, 2006-01-01 Poverty and Social Impact Analysis PSIA is an approach used

increasingly by governments civil society organizations the World Bank and other development partners to examine the distributional impacts of policy reforms on the well being of different stakeholders groups particularly the poor and vulnerable PSIA has an important role in the elaboration and implementation of poverty reduction strategies in developing countries because it promotes evidence based policy choices and fosters debate on policy reform options Poverty and Social Impact Analysis of Reforms presents a collection of case studies that illustrate the spectrum of sectors and policy reforms to which PSIA can be applied it also elaborates on the broad range of analytical tools and techniques that can be used for PSIA The case studies provide examples of the impact that PSIA can have on the design of policy reforms and draw operational lessons for PSIA implementation The case studies deal largely with policy reforms in a single sector such as agriculture crop marketing boards in Malawi and Tanzania and cotton privatization in Tajikistan energy mining sector in Romania and oil subsidies in Ghana utilities power sector reform in Ghana Rwanda and transition economies and water sector reform in Albania social sectors education reform in Mozambique and social welfare reform in Sri Lanka taxation reform Nicaragua as well as macroeconomic modeling Burkina Faso For Protection and Promotion Margaret Grosh, Carlo Del Ninno, Emil Tesliuc, Azedine Ouerghi, 2008-08-25 Safety nets are noncontributory transfer programs targeted to the poor or vulnerable They play important roles in social policy Safety nets redistribute income thereby immediately reducing poverty and inequality they enable households to invest in the human capital of their children and in the livelihoods of their earners they help households manage risk both ex ante and ex post and they allow governments to implement macroeconomic or sectoral reforms that support efficiency and growth To be effective safety nets must not only be well intended but also well designed and well implemented A good safety net system and its programs are tailored to country circumstances adequate in their coverage and generosity equitable cost effective incentive compatible and sustainable Good safety nets are also dynamic and change over time as the economy changes or as management problems are solved and new standards are set Drawing on a wealth of research policy and operational documents from both academia and the World Bank's work in over 100 countries For Protection and Promotion provides pragmatic and informed guidance on how to design and implement safety nets including useful information on how to define eligibility and select beneficiaries set and pay benefits and monitor and evaluate programs and systems The book synthesizes the literature to date and enriches it with new examples on various program options cash transfers conditional and unconditional in kind transfers price subsidies fee waivers and public works It concludes with a comprehensive diagnostic for fitting safety net systems and programs to specific circumstances **The Distributional Incidence of Residential Water and Electricity Subsidies**, 2006 Subsidies to residential utility customers are popular among policymakers utility managers and utility customers alike but they are nonetheless the subject of much controversy Utility subsidies are seen as a way to help make utility service affordable for poor households and as an alternative mechanism for income redistribution These arguments in favor of subsidies are countered by serious concerns

about their adverse effects on consumer behavior utility operations and the financial health of utilities Both the affordability and redistributive arguments for subsidies are based on the presumption that poor households benefit disproportionately from water and electricity subsidies that they are well targeted to the poor The authors test this assumption by examining the extent to which the poor benefit from consumption and connection subsidies for water and electricity services Their analysis of a wide range of subsidy models from around the developing world shows that the most common form of utility subsidy quantity based subsidies delivered through the tariff structure are highly regressive Geographically targeted or means tested subsidies do better and in many cases have a progressive incidence but large numbers of poor households remain excluded Low levels of coverage and metering severely limit the effectiveness of consumption subsidy schemes to reach the poor Simulations suggest that connection subsidies are an attractive alternative for low coverage areas but only if utilities have the means and motivation to extend network access to poor households and only if those households choose to connect World Bank web site

**Water, Electricity, and the Poor** Kristin Komives, World Bank, 2005 This book reviews the prevalence and variants of consumer subsidies found in the developing world and the effectiveness of these subsidies for the poor It places consumer subsidies in a broader social protection framework and compares them with poverty focused programmes in other sectors using a common metric It concludes that the most common subsidy instruments perform poorly in comparison with most other transfer mechanisms Alternative consumption and connection subsidy mechanisms show more promise especially when combined with complementary non price approaches to making utility services accessible and affordable to poor households The many factors contributing to those outcomes are dissected identifying those that can be controlled and used to improve performance

**The World Bank Research Program 2004** World Bank, 2005 The World Bank s research is intended to address critical issues and problems facing member governments in developing and transition economies How can the governments of the poorest countries generate enough revenue to provide the education and health services essential to reducing poverty and promoting growth and development How can poor countries attract investors to build the infrastructure their economies need How can they

develop systems to bring clean water to the 2 billion people without it today How can they train teachers and bring to class the 115 million children who have not yet received any education And how can rich countries be persuaded to lower market barriers helping to reverse the decline in export prices for poor countries that has left them earning less from trade today than in the 1970s These are the types of questions that are addressed in this edition of The World Bank Research Program Abstracts from Current Studies This volume reports on research projects initiated under way or completed from July 2003 through June 2004 It covers 151 research projects on several broad development related issues including agriculture health education environment infrastructure investment climate and more The abstract for each project describes the questions addressed the analytic methods used the findings to date and policy implications

**People and Power** Julian A. Lampietti, Sudeshna Ghosh Banerjee, Amelia Branczik, 2007 Empirical insights on household behavior and electricity consumption patterns in this book reveal that in Europe and Central Asia the erosion of tariff based subsidies has disproportionately affected the poor while direct transfers through social benefit systems have often been inadequately targeted The book suggests alternative strategies for achieving cost recovery in the electricity sector in a socially and politically acceptable manner providing lessons that are equally relevant for other utilities and regions

Civil Society Revisited Kerstin Jacobsson, Elzbieta Korolczuk, 2017-06-01 In much social scientific literature Polish civil society has been portrayed as weak and passive This volume offers a much needed corrective challenging this characterization on both theoretical and empirical grounds and suggesting new ways of conceptualizing civil society to better account for events on the ground as well as global trends such as neoliberalism migration and the renewal of nationalist ideologies Focusing on forms of collective action that researchers have tended to overlook the studies gathered here show how public discourse legitimizes certain claims and political actions as true civil society while others are too often dismissed

Taken together they critique a model of civil society that is made from above

**Russian Imperialism Revisited** Domitilla Sagramoso, 2020-03-05 This book examines the nature of Russia's relations with the former Soviet states (FSS) in particular with countries which formed the Commonwealth of Independent States in order to assess whether there has been a resurgence of Russian imperialism since the collapse of the USSR. The book sets out to determine whether Russian leaders have attempted to restore a sphere of influence over the former Soviet republics or whether Russia's policies reflect a genuine desire to establish normal state to state relations with the new states. It adopts a comprehensive approach analysing Russia's policies towards the FSS across a broad range of areas: energy, trade and investment, military assistance, security provision and peacekeeping, conflict management, political support and alliance formation. While not denying the Kremlin's assertive role in the FSS, this book challenges the assumption that Russia has always intended to restore a sphere of influence over its Near Abroad. Rather, it argues that Russia's policies are much more complex, multi-faceted and often more incoherent than is often assumed. In essence, Russia's actions generally reflect a combination of legitimate state interests, enduring Soviet legacies and genuine concerns over events unfolding along Russia's borders. This book also shows that at times Great Power nostalgia and a real difficulty with discarding Russia's imperial legacy shapes Russia's behaviour towards the FSS. This book will be of great interest to students of Russian politics and foreign policy, east European politics and International Relations in general.
