## **Revival In The Rust Belt:**

Revival in the Rust Belt Daniel R. Denison, Stuart L. Hart, *Global Change and Local Places* Association of American Geographers GCLP Research Team, 2003-06-26 This comprehensive book explores the ways people and biota contribute to climate change in four localities of the United States This volume summarizes the findings of the Global Change in Local Places GCLP project initiated by the Association of American Geographers to investigate the contribution of local factors to global change how and why these factors change over time and how the effects might be controlled and mitigated locally The sources and driving forces for greenhouse gas emissions vary widely among the four research sites as do the possibilities and propensities to mitigate emissions and adapt to the local changes global warming could bring Policy makers and legislators will be unable to address human induced climate change effectively without the insights revealed by examining and understanding the daily routines that are simultaneously the sources of climate change and the keys to reducing its severity and coping with its effects **The Revival of the Rust Belt** Murray L. C.

Cella,2016-10-12 This book includes a collection of essays that explore the relationship between Disability Studies and literary ecocriticism particularly as this relationship plays out in American literature and culture The contributors to this collection operate from the premise that there is much to be gained for both fields by putting them in conversation and they do so in a variety of ways In this manner the collection contributes to what Joni Adamson and Scott Slovic have referred to as a third wave of ecocriticism Adamson and Slovic attribute the rise of this third wave to the richly diverse contributions to ecocriticism over the past decade by scholars intent on including postmodernism ecofeminism transnationalism globalization and postcolonialism into ecocritical discussions The essays in *Toward an Ecosomatic Paradigm* extend this approach of this third wave by analyzing disability from an environmental point of view while simultaneously examining the environmental imagination from a disability studies perspective More specifically the goal of the collection is to investigate the role that literary narratives play in fostering the ecosomatic paradigm As a theoretical framework the ecosomatic paradigm underscores the dynamic and inter relational process wherein human mind bodies interact with the places both built and wild they inhabit That is the ecosomatic paradigm proceeds from the assumption that nature and culture are meshed in an ongoing and deep relationship that has implications for both the human subject and the natural world An ecosomatic approach highlights the profound overlap between embodiment and emplacement and is therefore enriched by both disability studies and ecocritical insight By drawing on points of confluence between disability studies and ecological criticism the various ecosomatic readings in this collection challenge normative even ableist constructions of the body environment dyad by complicating and expanding our understanding of this relationship as it is represented in American literature and culture Collectively the essays in this book augment the American environmental imagination by highlighting the relationship between disability and the environment as reflected in American literary texts across multiple periods and genres
