Messianism and Sociopolitical Revolution in Medieval Islam Said Amir Arjomand, 2025-10-28 This study of messianism and revolution examines an extremely rich though unexplored historical record on the rise of Islam and its sociopolitical revolutions from Muhammad's constitutive revolution in Arabia to the Abbasid revolution in the East and the Fatimid and Almohad revolutions in North Africa and the Maghreb Bringing the revolutions together in a comprehensive framework Sa d Amir Arjomand uses sociological theory as well as the critical tools of modern historiography to argue that a volatile but recurring combination of apocalyptic motivation and revolutionary action was a driving force of historical change time and again In addition to tracing these threads throughout 500 years of history Arjomand also establishes how messianic beliefs were rooted in the earlier Judaic and Manichaean notions of apocalyptic transformation of the world By bringing to light these linkages and factors not found in the dominant sources this text offers a sweeping account of the long arc of Islamic history

Information Revolutions in the History of the West Leonard Dudley, 2008-01-01 a well researched and well written book with some nice anecdotal detail and a crisp turn of phrase The contextual detail of events is excellent Toni Weller Library and Information History In this tour de force Leonard Dudley makes a persuasive and exciting case that changes in information and communication technologies were a driving force behind a series of political social and economic transformations over the last millennium starting with the collapse of the Carolingian Empire and ending with the dissolution of the Soviet block His case that the relevant ICT change was an important cause in each transformation seems overwhelming to me while his more contentious implied case that each was the prime cause deserves serious consideration Richard Lipsey Simon Fraser University Canada Readers who love sweeping history bold ideas and provocative arguments will find a treasure trove here Dudley examines major revolutions in communications technology standardized written script printing radio TV and the internet and demonstrates their impact on how societies have been organized throughout history Taking us from Charlemagne's Empire and the Norman invasion of England to the collapse of communism and the rise of post 9 11 global terrorism Dudley demonstrates how innovations in communications have moved states and empires Jack A Goldstone George Mason University US Can new information technologies explain the discontinuities in the history of the West This innovative book presents evidence of an overall pattern generated by radical changes in media arguing that the major social revolutions in the West have been preceded by innovations that drastically alter the relative importance of informational scale economies the impact of production volume on unit cost and network effects the gain to each member of a network when a new agent joins These factors establish the optimal structure of a society by determining whether decision making is centralized decentralized or instead distributed across multiple agents Dudley contends that an innovation that alters the balance between scale economies and network effects initially has a dramatic result blasting apart existing interpersonal networks however later out of the debris a new society emerges The latest of these innovations the integrated circuit is currently

generating a wave of creative destruction that is spilling over into the rest of the world To understand the rebirth that seems likely to follow we must examine not the recent past but the Dark Ages of European history and the intervening centuries With detailed case studies addressing the sources of innovation in information technology along with a conceptual framework to explain their effects this book will be of interest to students and teachers of Western economic and social history as well as to the general reader with an interest in the social impact of innovation Revolutions in the Desert Steven

called color revolutions while the fifth discusses the second wave the Arab Spring 2010 2013 as an important turning point The sixth part is dedicated to analyzing revolutions and revolutionary movements beyond the Arab Spring and some revolutionary events from the third wave that began in 2018 The seventh and final part offers forecasts on the future of revolutions Given its scope the book will appeal to scholars and students from various disciplines interested in historical trends sociopolitical change contentious politics social movements and revolutionary processes involving both nonviolent campaigns and political violence Once again this volume demonstrates the kind of open minded systematic analysis that the field of revolutionary studies requires Prof George Lawson Department of International Relations Australian National University Canberra
