A Revolution in Eating James E. Pumpkin Cindy Ott, 2012-12-01 Why do so many Americans drive for miles each autumn to buy a vegetable that they are unlikely to eat While most people around the world eat pumpkin throughout the year North Americans reserve it for holiday pies and other desserts that celebrate the harvest season and the rural past They decorate their houses with pumpkins every autumn and welcome Halloween trick or treaters with elaborately carved jack o lanterns Towns hold annual pumpkin festivals featuring giant pumpkins and carving contests even though few have any historic ties to the crop In this fascinating cultural and natural history Cindy Ott tells the story of the pumpkin Beginning with the myth of the first

Thanksgiving she shows how Americans have used the pumpkin to fulfill their desire to maintain connections to nature and to the family farm of lore and ironically how small farms and rural communities have been revitalized in the process And while the pumpkin has inspired American myths and traditions the pumpkin itself has changed because of the ways people have perceived valued and used it Pumpkin is a smart and lively study of the deep meanings hidden in common things and their power to make profound changes in the world around us Running, Eating, Thinking Martin Rowe, 2014-05-06 In recent years endurance athletes bodybuilders and long distance runners such as Ruth Heidrich Scott Jurek Rich Roll Brendan Brazier Robert Cheeke and many others have destroyed the notion that you cannot be a top flight competitor on a plant based diet and upended the stereotype that veganism means weakness placidity and passivity But are there deeper connections between veganism and running for example that reach beyond attaining peak performance to other aspects of being vegan such as living lightly on the land caring for other than human life and connecting to our animal bodies The fifteen writers in Running Eating Thinking wager that there are and they explore in manifold ways how those connections might be made From coping with cancer to reflecting on the need of the confined animal to run free from Buddhist ideas of nonviolence to harnessing the breath for singing and running and from extolling the glories of lentils to committing oneself to the long run in animal activism Running Eating Thinking is a pioneering anthology that may redefine your thinking about veganism and running The Routledge History of American Foodways Michael D. Jordan, 2015-04-14 Each week during the growing season farmers markets offer up such delicious treasures as brandywine tomatoes cosmic purple carrots pink pearl apples and chioggia beets varieties of fruits and vegetables that are prized by home chefs and carefully stewarded by farmers from year

to year These are the heirlooms and the antiques of the food world endowed with their own rich histories While cooking techniques and flavor fads have changed from generation to generation a Ribston Pippin apple today can taste just as flavorful as it did in the eighteenth century But how does an apple become an antique and a tomato an heirloom In *Edible Memory* Jennifer A Jordan examines the ways that people around the world have sought to identify and preserve old fashioned varieties of produce In doing so Jordan shows that these fruits and vegetables offer a powerful emotional and physical connection to a shared genetic cultural and culinary past Jordan begins with the heirloom tomato inquiring into its botanical origins in South America and its culinary beginnings in Aztec cooking to show how the homely and homegrown tomato has since grown to be an object of wealth and taste as well as a popular symbol of the farm to table and heritage foods movements She shows how a shift in the 1940s away from open pollination resulted in a narrow range of hybrid tomato crops But memory and the pursuit of flavor led to intense seed saving efforts increasing in the 1970s as local produce and seeds began to be recognized as living windows to the past In the chapters that follow Jordan combines lush description and thorough research as she investigates the long history of antique apples changing tastes in turnips and related foods like kale and parsnips the movement of vegetables and fruits around the globe in the wake of Columbus and the poignant perishable world of stone fruits and tropical fruit in order to reveal the connections the edible memories these heirlooms offer for farmers gardeners chefs diners and home cooks This deep culinary connection to the past influences not only the foods we grow and consume but the ways we shape and imagine our farms gardens and local landscapes From the farmers market to the seed bank to the neighborhood bistro these foods offer essential keys not only to our past but also to the future of agriculture the environment and taste By cultivating these edible memories Jordan reveals we can stay connected to a delicious heritage of historic flavors and to the pleasures and possibilities for generations of feasts to come

Small Farm Republic John Klar, 2023-06-29 From farmer lawyer and political activist John Klar comes a bold solutions based plan for Conservatives that gets beyond the fatuous pipe dreams and social justice platitudes of the dominant Liberal Green agenda offering a healthy way forward for everyone While many on the Left have taken up the mantle of creating a green future through climate alarmism spurious new energy sources and technocratic control many on the Right continue to deny imminent environmental threats while pushing for unbridled deregulation of our most destructive industrial forces Neither approach promises a bright future In a time of soil degradation runaway pollution food insecurity and declining human health the stakes couldn't be higher and yet the dominant political voices too often overlook the last best hope for our planet supporting small regenerative farmers In fact politicians on all sides continue to sell out the interests of small farmers to the devastating power of Big Ag and failed renewable energy incentives It's time for a new vision It's time for bold new agriculture policies that restore both ecosystems and rural communities In *Small Farm Republic* John Klar an agrarian conservative in the mold of Wendell Berry and Joel Salatin offers an alternative that puts small farmers regenerative

Against Sustainability Michelle Neely, 2020-06-02 *Against Sustainability* responds to the twenty first century environmental crisis by unearthing the nineteenth century U S literary cultural and scientific contexts that gave rise to sustainability recycling and preservation Through novel pairings of antebellum and contemporary writers including Walt Whitman and Lucille Clifton George Catlin and Louise Erdrich and Herman Melville and A S Byatt the book demonstrates that some of our most vaunted strategies to address ecological crisis in fact perpetuate environmental degradation Yet Michelle C Neely also reveals that the nineteenth century offers useful and generative environmentalisms if only we know where and how to find them Henry David Thoreau and Emily Dickinson experimented with models of joyful anti consumerist frugality Hannah Crafts and Harriet Wilson devised forms of radical pet keeping that model more just ways of living with others Ultimately the book explores forms of utopianism that might more reliably guide mainstream environmental culture toward transformative forms of ecological and social justice Through new readings of familiar texts *Against Sustainability* demonstrates how nineteenth century U S literature can help us rethink our environmental paradigms in order to imagine more just and environmentally sound futures

Native Foods Michael D. Wise, 2023-06-22 Native foods are ubiquitous in America but they often go unrecognized and unidentified So too do the countless farms gardens and other places created by Native American people to feed and nourish their families and communities over generations Over the last five centuries of settler colonialism this inconspicuousness of Native American food and agriculture has helped configure Americans imaginations of food and agriculture in ways that require critical identification Drawing attention to this issue *Native Foods* brings to bear approaches from the fields of food studies and Indigenous studies to explore how biophysical patterns of settler colonial land use have worked as narrative frames for structuring historical views of Native agriculture Following the lead of Indigenous food sovereignty advocates and activists the book emphasizes the presence and persistence of Native American cuisine and documents how Native foods and agricultural techniques were never lost but only obscured by the peregrinations of colonialism capitalism and various other historical transformations
