Felix Guattari Gary Genosko, 2002-08-01 This is the first detailed assessment of the life and work of Felix Guattari Mr Anti as the French press labelled him the friend of and collaborator with Gilles Deleuze Jacques Lacan and Antonio Negri and one of the 20th Century's last great activist intellectuals Guattari is widely known for his celebrated writings with Deleuze but these writings do not represent the true breadth and impact of his thinking writing and activism Guattari's major work as a clinical and theoretical innovator in psychoanalysis was closely linked to his participation in struggles against European right wing politics Felix Guattari introduces the reader to the diversity and sheer range of Guattari's interests from anti psychiatry to Japanese culture political activism and his theorizing of subjectification Highlighting why Guattari's work is of increasing relevance to contemporary political psychoanalytical and philosophical thought Felix Guattari An Aberrant Introduction presents the reader with an adventurous and provocative introduction to this radical thinker

Phenomenology, Language and the Social Sciences Maurice Roche, 2013-10-23 This book looks at two revolutions in philosophy phenomenology and conceptual analysis which have been influential in sociology and psychology It discusses humanistic psychiatry and sociological approaches to the specific area of mental illness which counter the ultimately reductionist implications of Freudian psychoanalytic theory The book originally published in 1973 concludes by stating the broad underlying themes of the two forms of humanistic philosophy and indicating how they relate to the problems of theory and method in sociology

Sociology and the Real World Stephen Lyng, David D. Franks, 2002 In this new book Lyng and Franks argue that contemporary sociology has lost its connection to human realities Addressing the conceptual underpinnings of sociological practice they offer ways for sociology

to reclaim lost concepts of objectivity reality and truth The authors deconstruct these terms in modern and postmodern contexts yet they look beyond the usual predicaments espoused by these traditions in an effort to rebuild concepts of reality and truth more coherently for contemporary social relations and social problems **Ministry After Freud** Allison

Stokes,2020-07-31 **Ministry After Freud** tells the fascinating story of the impact of Freud s depth psychological discoveries on the practice of American Protestant ministry It focuses on the lives and work of leaders such as Elwood Worcester Anton Boisen Flanders Dunhar Smiley Blanton Norman Vincent Peale Seward Hiltner and Paul Tillich who were pioneers in the Religion and Health Movement which brought together religion and psychology in healing ministry and greatly influenced the practice of pastoral care and counseling Never before chronicled and described this Movement paralleled the Social Gospel Movement The book also tells the story for the first time of the New York Psychology Group which met on Manhattan in the early 1940s Members of this exclusive group including Paul Tillich Seward Hiltner Erich Fromm Rollo May David Roberts Gotthard Booth Violet De Laszlo shared ideas about the bearing of psychology on religion ideas that later deeply influenced American intellectual and religious life through the articles and books these people wrote The author identifies religion and health as a movement in theological liberalism which historically seeks to interpret the gospel for each generation The Ernest Becker Reader Daniel Liechty,2017-09-01 Ernest Becker 1924 1974 was an astute observer of

society and human behavior during America s turbulent 1960s and 1970s Trained in social anthropology and driven by a transcending curiosity about human motivations Becker doggedly pursued his basic research question What makes people act the way they do Dissatisfied with what he saw as narrowly fragmented methods in the contemporary social sciences and impelled by a belief that humankind more than ever needed a disciplined rational and empirically based understanding of itself Becker slowly created a powerful interdisciplinary vision of the human sciences one in which each discipline is rooted in a basic truth concerning the human condition That truth became an integral part of Becker s emerging social science Almost inadvertently he outlined a perspective on human motivations that is perhaps the most broadly interdisciplinary to date His perspective traverses not only the biological psychological and social sciences but also the humanities and educational political and religious studies Ernest Becker is best known for the books written in the last few years before his death from cancer including the highly praised Pulitzer Prize winning volume *The Denial of Death* 1974 and *Escape from Evil* 1975 These late works however were built on a distinguished body of earlier books essays and reviews The power and strength of Becker s ideas are fully present in his early works which underlie his later contributions and give direction for interpreting the development of his ideas Although Ernest Becker s life and career were cut short his major writings have remained continually in print and have captured the interest of subsequent generations of readers *The Ernest Becker Reader* makes available for the first time in one volume much of Becker s early work and thus places his later work in proper context It is a major contribution to the ongoing interest in Becker s ideas **Routledge Library Editions: Phenomenology**

Richard Snyder,2000-06-07 Hope has previously been a construct more of interest to philosophy and religion than in psychology New research has shown however that hope is closely related to optimism feelings of control and motivation toward achieving one's goals The Handbook of Hope presents a comprehensive overview of the psychological inquiry into hope including its measurement its development in children how its loss is associated with specific clinical disorders and therapeutic approaches that can help instill hope in those who have lost theirs A final section discusses hope in occupational applications how the use of hope can make one a better coach teacher or parent Defines hope as a construct and describes development of hope through the lifespan Provides multiple instruments for measuring hope Guides professionals in how to assess hope levels discusses the importance of hope to relationships achieving goals and success at work **The Autonomous Child** Ivar Frønes,2015-10-14 The social sciences offer a variety of theories on how children develop and various theories and disciplines apply their own vocabularies and conceptualise different aspects of the processes of socialization This book looks at the theorizing of socialization in sociology anthropology psychology in the life course approach and as the interplay of genetics and environmental factors It analyses the dominant perspectives and viewpoints within each discipline and field and shows how the various theories and disciplines apply their own vocabularies and conceptualise different aspects of the processes of socialization It argues that socialization does not represent a fixed trajectory into a static social order and that different disciplines meet the challenges of complex developmental processes and changing environments in different ways Socialization is a fundamental concept in sociology but sociology has only to a limited degree sought to produce a coherent

understanding of the processes of socialization which has to encompass the interplay of societal psychological and genetic factors This book draws the threads together and by doing so offers a general framework for our understanding of the socialization process At the centre of this process is the child as a subject in an interplay with the patterns and significant others of the micro environment as well as with the macro conditions of the modern knowledge based economies

Necromedia Marcel O'Gorman,2015-04-15 In Necromedia media activist Marcel O Gorman takes aim at the collusion of death and technology drawing on a broad arsenal that ranges from posthumanist philosophy and social psychology to digital art and handmade objects to think with Throughout O Gorman mixes philosophical speculation with artistic creation personal memoir and existential dread He is not so much arguing against technoculture as documenting a struggle to embrace the technical essence of human being without permitting technology worshippers to have the last word on what it means to be human Inspired in part by the work of cultural anthropologist Ernest Becker O Gorman begins by suggesting that technology provides human beings with a cultural hero system built on the denial of death and a false promise of immortality This theory adds an existential zest to the book allowing the author not only to devise a creative diagnosis of what Bernard Stiegler has called the malaise of contemporary technoculture but also to contribute a potential therapy one that requires embracing human finitude infusing care into the process of technological production and recognizing the vulnerability of all things human and nonhuman With this goal in mind Necromedia prescribes new research practices in the humanities that involve both written work and the creation of objects to think with that are designed to infiltrate and shape the technoculture that surrounds us

Nonviolent Communication: A Language of Life Marshall B. Rosenberg,Deepak Chopra,2015-09-01 5 000 000 COPIES SOLD WORLDWIDE TRANSLATED IN MORE THAN 35 LANGUAGES What is Violent Communication If violent means acting in ways that result in hurt or harm then much of how we communicate judging others bullying having racial bias blaming finger pointing discriminating speaking without listening criticizing others or ourselves name calling reacting when angry using political rhetoric being defensive or judging who s good bad or what s right wrong with people could indeed be called violent communication What is Nonviolent Communication Nonviolent Communication is the integration of four things Consciousness a set of principles that support living a life of compassion collaboration courage and authenticity Language understanding how words contribute to connection or distance Communication knowing how to ask for what we want how to hear others even in disagreement and how to move toward solutions that work for all Means of influence sharing power with others rather than using power over others Nonviolent Communication serves our desire to do three things Increase our ability to live with choice meaning and connection Connect empathically with self and others to have more satisfying relationships Sharing of resources so everyone is able to benefit Asylum Ways of Seeing Heather Murray,2022-01-04 Asylum Ways of Seeing is a cultural and intellectual history of people with mental illnesses in the twentieth century United States While acknowledging the fraught and often violent histories of American psychiatric

hospitals Heather Murray also suggests that it is in these hospitals that patients became more intense observers they gave more conscious consideration to institutional and broader kinds of citizenship to the nature and needs of communities versus those of individuals to scientific modernity and to human rights and solidarities among the suffering All of these ideas have animated twentieth century America and as Murray shows have not just flowed into psychiatric hospitals but outward from them as well These themes are especially clear within patients intimate creative and political correspondence writings and drawings as well as in hospital publications and films This way of thinking and imagining contrasts with more common images of the patient as passive resigned and absented from the world in the cloistered setting of the hospital that have animated psychiatry over the course of the twentieth century Asylum Ways of Seeing traces how it is that patient resignation went from being interpreted as wisdom in the early twentieth century to being understood as a capitulation in scientific and political sources by mid century to being seen as a profound violation of selfhood and individual rights by the century s end In so doing it makes a call to reconsider the philosophical possibilities within resignation
