Neurobiology and Mental Health Clinical Practice Dennis Miehls, Jeffrey Applegate, 2017-10-02 This book illustrates the current findings of interpersonal neurobiology that inform knowledge building and clinical practice Contributions cover an impressive range of material including how neurobiology interfaces with clinical work with children individuals with substance abuse issues couples and clients with trauma histories Leading mental health clinician scholars describe path breaking explorations at the neurobiological frontiers of 21st century clinical theory and practice Representing the fields of social work psychology and psychiatry these authors creatively apply research findings

from the ongoing revolution in social and behaviour neuroscience to a diverse array of clinical issues Contributions include elaborations of theory the evolving social brain new directions in attachment affect regulation and trauma studies practice neurobiologically informed work with children adults couples and in the conduct of supervision and emerging neuroscientific perspectives on broader mental health issues and concerns substance abuse psychotropic medications secondary traumatic stress in clinicians the neurodynamics of racial prejudice the dangers of forfeiting humanism to our current romance with the biological Together these chapters equip readers with state of the art knowledge of the manner in which new understandings of the brain inform and shape today s professional efforts to heal the troubled mind This book was originally published as a special issue of Smith College Studies in Social Work Arts Therapies and the Mental Health of Children and Young People Uwe Herrmann,Margaret Hills de Zarate,Salvo Pitruzzella,2021-05-24 Arts Therapies and The Mental Health of Children and Young People presents innovative research theory and practice in the arts therapies The different social cultural and political contexts and developmental age groups illustrate and underscore the richness and diversity of contemporary arts therapies creative response to the needs of children and young people in contrasting locations The book represents an acknowledgement of the high rates of mental disorders in children and young people and addresses this subject In presenting an array of responses from arts therapists working with children and young people in different contexts and countries the book highlights the particular features of distinct art forms yet also points to the potential dialogue between disciplines Chapters show how the expressive potential and appeal of the arts when facilitated within the therapeutic relationship are crucial in fostering hope in the future and the capacity for trust in self and others This book will be of great interest to arts therapists as well as academics and postgraduate students in the fields of arts therapies social work psychotherapy health psychology and education **The Divided Therapist** Rod Tweedy,2020-10-06 This important new book explores the nature of the divided brain and its relevance for contemporary psychotherapy Citing the latest neuroscientific research it shows how the relationship between the two hemispheres of the brain is central to our mental health and examines both the practical and theoretical implications for therapy Disconnections dissociations and imbalances between our two hemispheres underlie many of our most prevalent forms of mental distress and disturbance These include issues of addiction autism schizophrenia depression anorexia relational trauma borderline and personality disorders psychopathy anxiety derealisation and devitalisation and alexithymia A contemporary understanding of the nature of the divided brain is therefore of importance in engaging with and treating these disturbances Featuring contributions from some of the key authors in the field The Divided Therapist suggests that hemispheric integration lies at the heart of the therapeutic process itself and that a better understanding of the precise mechanisms that underlie and enable this integration will help to transform the practice of psychotherapy and psychoanalysis in the twenty first century The book will be essential reading for any therapeutic practitioner interested in how the architecture of the brain informs and effects their client s issues and

challenges The Person-Centred Approach Louise Embleton Tudor, Keemar Keemar, Keith Tudor, Joanna Valentine, Mike Worrall, 2004-03-08 In this essential text the highly regarded Temenos team present a new introduction to the person centred approach for the 21st century Giving a broad and unbiased account they illustrate how the approach has developed since the death of Carl Rogers and explore how the person centred philosophy can be an effective working model for both counselling and psychotherapy and for understanding living and working in a complex contemporary world The Person Centred Approach is essential reading for trainees whether new to counselling or more experienced and is a vital resource for practitioners wishing to keep at the forefront of the latest developments in the field **Transference and**

Countertransference from an Attachment Perspective Una McCluskey, Michael O'Toole, 2019-08-29 Locating the phenomenon of transference within an evolutionary perspective this important book develops a new form of dynamic therapy that focuses on the dynamics of attachment in adult life and will be of use to a range of mental health professionals and those at all levels in the caring and education professions Transference and Countertransference from an Attachment Perspective A Guide for Professional Caregivers explores the ways in which transferential phenomena can be located in the different aspects of the self that are instinctive goal corrected and interrelated At the centre of the book is the idea that when intrapersonal or interpersonal systems aspects of the self such as careseeking caregiving sharing interests sexuality self defence building a home get aroused the behaviour that follows is only logically and meaningfully connected when the system aspect of the self reaches its goal Placing this new theoretical and clinical approach within the psychoanalytic tradition the work of developmental psychologists and the field of neuroscience the book takes us to the heart of the clinical encounter and explores a range of issues including trauma the effect of early misattunements love and hate in the therapeutic relationship burnout in caregivers and the need for exploratory care for caregivers themselves Building on the therapeutic modality that emerged from the research described in McCluskey's To Be Met as a Person 2005 this book provides a valuable guide for psychologists psychotherapists medical practitioners nurses social workers organisational consultants educators coaches and workplace managers The McCluskey model for exploring the dynamics of attachment in adult life which underlies the work described in this book is currently being practised in a variety of settings and with different ages and communities These include end of life care organizations homelessness mental health dementia care children adolescents and families schools pastoral work training of clinical psychologists and attachment based psychoanalytic psychotherapists occupational therapy art therapy private practice domestic violence police training GP support and consultation nurse training and support pain management clinics foster carers social workers couple relationships supervision of psychotherapists and counsellors therapeutic communities and complex grief and learning disabilities **Writing History** Stefan Berger, Heiko Feldner, Kevin Passmore, 2020-02-20 The third edition of Writing History provides students and teachers with a comprehensive overview of how the study of history is informed by a broader intellectual and analytical framework

exploring the emergence and development of history as a discipline and the major theoretical developments that have informed historical writing Instead of focusing on theory this book offers succinct explanations of key concepts that illuminate the study of history and practical writing and demonstrates the ways they have informed practical work This fully revised new edition comprehensively rewrites and updates original chapters but also includes new features such as new chapters on postcolonial environmental and transnational history chapter introductions setting them within the context of historiography a new substantive introduction from the editors providing a useful road map for students an expanded glossary In its new incarnation Writing History is more than ever an invaluable introduction to the central debates that have shaped history

Understanding and Treating Dissociative Identity Disorder Elizabeth F. Howell, 2011-06-01 Building on the comprehensive theoretical model of dissociation elegantly developed in *The Dissociative Mind* Elizabeth Howell makes another invaluable contribution to the clinical understanding of dissociative states with *Understanding and Treating Dissociative Identity Disorder* Howell working within the realm of relational psychoanalysis explicates a multifaceted approach to the treatment of this fascinating yet often misunderstood condition which involves the partitioning of the personality into part selves that remain unaware of one another usually the result of severely traumatic experiences Howell begins with an explication of dissociation theory and research that includes the dynamic unconscious trauma theory attachment and neuroscience She then discusses the identification and diagnosis of Dissociative Identity Disorder DID before moving on to outline a phase oriented treatment plan which includes facilitating a multileveled co constructed therapeutic relationship emphasizing the multiplicity of transferences countertransferences and kinds of potential enactments She then expands the treatment possibilities to include dreamwork before moving on to discuss the risks involved in the treatment of DID and how to mitigate them All concepts and technical approaches are permeated with rich clinical examples

Adult Attachment in Clinical Social Work Susanne Bennett, Judith Kay Nelson, 2010-09-27 The applicability of attachment theory and research to social work and social policy relating to infants and children is well established Yet its usefulness for enhancing the understanding of adults and their needs both individually and as a group has been less featured in the attachment literature *Adult Attachment in Clinical Social Work Practice* is a wide ranging look at attachment theory and research its application to adults and its natural fit with the social work profession This edited volume covers the applicability of adult attachment theory to the clinical social work profession s various domains that include human behavior practice policy research and social work education It addresses the broad spectrum of clinical social work including practice in a variety of public and private settings and with a number of diverse populations including racial ethnic groups gays and lesbians trauma survivors and child welfare parents The book highlights the underemphasized contribution of the social work profession to the development of attachment theory and research
