

Introduction: Time for a Change

There's no place like Earth. It's the only planet in this solar system where we can breathe the air and walk around without a spacesuit! Our planet has been an orbiting life-support system for hundreds of millions of years.

People, on the other hand, have only been around for about 100,000 years. Yet today there are more of us than any other animal, fish, or bird. And a lot of our daily habits are adding up to big trouble for the planet:

- Our car habit is fouling Earth's air.
- Our throw-away habit is dirtying Earth's water.
- Our expensive habits (like wearing fur coats and ivory jewelry) are threatening Earth's other animals.

But there's something we can all do to save Earth—change our habits.

And changing our habits means taking action against pollution—action that starts small, like sorting garbage and riding bikes. With thousands of people doing it, we'll have a cleaner and healthier planet.

Saving the planet isn't an easy job—it won't happen overnight. It will take time for all of us to decide to change our habits and put a little Earth Action into our lives. But it's happening already,

and it's happening all over the world.

What's Earth Action? It's when parents stop buying apples and apple juice sprayed with an unhealthy chemical called Alar. It's when people vote for politicians who put the planet's health before company or individual profits. And it's when kids start a save-the-planet club and convince their school to recycle paper.

More people than ever are working to make Earth a cleaner, safer place. You can join them. On nearly every page of this book, you'll find at least one way you can help save the planet. Choose a few to start with and put a little Earth Action in your life today!
