

Long Orbit

George Zebrowski

Long Orbit:

Brute Orbits George Zebrowski, 2014-04-01 Like his previous tales of technocratically engineered futures *Macrolife* *Stranger Suns* etc Zebrowski's latest evokes the pioneering SF of social philosopher Olaf Stapledon In the 21st century Earth incarcerates its undesirables in mined out asteroids launched into new orbits for the duration of their sentences This use of distance as a better prison wall is more than just an ingenious application of technology to the penal system it's also a convenient trick for disposing of the socially misfit since orbits are accidentally miscalculated to prevent their return The narrative follows the histories of several of these rocks as their prisoners fight unite and ultimately set out to create superior self contained cultures free of the taint of earthly ways Individual asteroids house specific groups of offenders ranging from hardened convicts to sexual deviants juvenile delinquents and unwanted foreigners Zebrowski argues his points with conviction Publishers Weekly A brilliant and dramatic philosophical reflection on the nature of society technology and humanity itself Zebrowski is a deep thinker who writes about the big questions in the grand tradition of Wells Stapledon and Clarke Jack M Dann award winning author of *The Silent* and *The Memory Cathedral* High Crimes Call for High Punishment It is the twenty first century Convicts are sentenced to asteroids that move in ever widening solar orbits timed to return when their terms run out But a few ambitious administrators discover that small errors in velocity can rid them of selected groups altogether the hardcore violent the mentally defective and especially the political dissidents Enduring the black void of interstellar space time these human rejects men and women mixed together create their own Darwinian societies struggling to survive Back on Earth a handful of sympathetic and curious scientists have not forgotten these lost citizens When a technological breakthrough makes it possible to overtake these scattered asteroids a courageous team sets out to go where none has willingly gone before What they discover in these brute orbits is both provocative and moving a startling vision of humanity you will never forget

The Militarization and Weaponization of Space Matthew Mowthorpe, 2004-01-01 The militarization of space began as a rivalry between the United States and the Soviet Union and grew to enormous proportions during the height of the Cold War Satellite reconnaissance navigation and weapons guidance and electronic intelligence comprise only a few of the efforts taken to militarize and dominate space Today as the prominence of information technology computing and telecommunications advances so does the concept of space as a battlefield In *The Militarization and Weaponization of Space* Matthew Mowthorpe diligently analyzes the military space policies of the United States the Soviet Union Russia and the People's Republic of China from the Cold War period to the present day Mowthorpe focuses on the development of the ballistic missile defense and other anti satellite systems and aptly assesses to what degree space will become armed This work cogently addresses an issue of increasing urgency to scholars of international politics Majidae D. J. G. Griffin, H. A. Tranter, 1986 Orbital 2100 Paul Elliott, 2016-09-25 *Orbital 2100* is a science fiction setting for *Cepheus Engine* and other Classic 2D6 SF RPGs It has realistic TL 9 feel that is set within our own solar system The Earth is

locked in a Cold War with the people of Luna Both face off 400 000 km apart threatening mutual annihilation whilst they compete to colonise the moons of Jupiter and Saturn Older colonies such as Mars and Mercury are independent and caught up in this struggle for solar system supremacy Spacecraft use nuclear thermal rockets and create gravity by spinning pods or centrifuges this is spaceflight as envisaged today In keeping with the near future and hard science fiction themes role playing campaigns focus on real people doing real jobs The game has rules technology and advice to allow scenarios based around deep space haulage asteroid mining salvage rescue and exploration Colour cover with B W interior Claim a free copy of the full colour PDF by contacting Zozer <https://www.paulelliottbooks.com/contact.html>

Dawn of Small Worlds Michael Moltenbrey, 2015-10-24 This book gives a detailed introduction to the thousands and thousands of smaller bodies in the solar system Written for interested laymen amateur astronomers and students it describes the nature and origin of asteroids dwarf planets and comets and gives detailed information about their role in the solar system The author nicely reviews the history of small world exploration and describes past current and future space craft missions studying small worlds and presents their results Readers will learn that small solar system worlds have a dramatically different nature and appearance than the planets Even though research activity on small worlds has increased in the recent past many of their properties are still in the dark and need further research

Orbital Debris ,1985 *Nonlinear Dynamics of Nanosystems* Günter Radons, Benno Rumpf, Heinz Georg Schuster, 2010-01-12 A discussion of the fundamental changes that occur when dynamical systems from the fields of nonlinear optics solids hydrodynamics and biophysics are scaled down to nanosize The authors are leading scientists in the field and each of their contributions provides a broader introduction to the specific area of research In so doing they include both the experimental and theoretical point of view focusing especially on the effects on the nonlinear dynamical behavior of scaling stochasticity and quantum mechanics For everybody working on the synthesis and integration of nanoscopic devices who sooner or later will have to learn how to deal with nonlinear effects

China Satellite Navigation Conference (CSNC) 2020 Proceedings: Volume II Jiadong Sun, Changfeng Yang, Jun Xie, 2020-06-06 China Satellite Navigation Conference CSNC 2020 Proceedings presents selected research papers from CSNC 2020 held during 22nd-25th November in Chengdu China These papers discuss the technologies and applications of the Global Navigation Satellite System GNSS and the latest progress made in the China BeiDou System BDS especially They are divided into 13 topics to match the corresponding sessions in CSNC2020 which broadly covered key topics in GNSS Readers can learn about the BDS and keep abreast of the latest advances in GNSS techniques and applications
