Cotos,2014-09-02 Research writing and teaching is a great challenge for novice scholars especially L2 writers This book presents a compelling and much needed automated writing evaluation AWE reinforcement to L2 research writing pedagogy *Crossing Borders, Writing Texts, Being Evaluated* Anne Golden,Lars Anders Kulbrandstad, Lawrence Jun Zhang,2021-12-14 This book provides critical perspectives on issues relating to writing norms and assessment as well as writing proficiency development and suggests that scholars need to both carefully examine testing regimes and develop research informed perspectives on tests and testing practices In this way schools institutions of adult education and universities can better prepare learners with differing cultural experiences to meet the challenges The book brings together empirical studies from diverse geographical contexts to address the crossing of literacy borders with a focus on academic genres and practices Most of the studies examine writing in countries where the norms and expectations are different but some focus on writing in a new discourse community set in a new discipline The chapters shed light on commonalities and differences between these two situations with respect to the expectations and evaluations facing the writers They also consider the extent to which the norms that the writers bring with them from their educational backgrounds and own cultures are compromised in order to succeed in the new educational settings **International Student Adaptation to Academic Writing in Higher Education** Ly Thi Tran,2014-07-08 Academic writing is a key practice in higher education and central to international students academic success in the country of education International Student Adaptation to Academic Writing in Higher Education addresses the prominent forms of adaptation emerging from international students journey to mediate between disciplinary practices cultural norms and personal desires in meaning making It introduces new concepts that present different patterns of international student adaptation including surface

adaptation committed adaptation reverse adaptation and hybrid adaptation Drawing on these concepts of adaptation this book provides readers with new and deeper insights into the complex nature of international students adjustment to host institutions It works through many unresolved issues related to cross border students intellectual cultural linguistic and personal negotiations This book presents a trans disciplinary framework for conceptualising international students and lecturers practices within the institutional structure This framework has been developed by drawing on a modified version of Lillis heuristic of talk around text and positioning theory The framework enables an exploration of not only the reasons underpinning international students specific ways of meaning making but also their potential choices in constructing knowledge A distinctive contribution of the book is the development of a dialogical pedagogic model for mutual adaptation between international students and academics rather than the onus being on exclusive adaptation from the students Existing research on international education indicates the significance of reciprocal adaptation between international students and academics Yet very little has been done to conceptualise what mutual adaptation means and what is involved in this process The dialogical model introduced in this book offers concrete steps towards developing reciprocal adaptation of international students and academics within the overarching institutional realities of the university It can be used as a tool to enhance the education of international students in this increasingly internationalised environment This book is a significant contribution to the field of international education It takes a critical stance on contemporary views of globally mobile students The insights into international students voices hidden intentions and their potential choices in meaning making presented in this book will attract dialogues about the critical issues related to inclusive practices internationalised curriculum and institutional responses to the diverse needs of international students **Authorial Stance in Research Articles P.**

Pho,2013-09-12 How do I structure a journal article Can I use I in a research article Should I use an active or passive voice Many such questions will be answered in this book which documents the linguistic devices that authors use to show how they align or distance themselves from arguments and ideas while maintaining conventions of objectivity
