Looking In Seeing Out Consciousness And Cosmos:

Looking In, Seeing Out Minas C. Kafatos, 1991-10-01 Most books on science and mysticism attempt to link modern physics to philosophic views of consciousness This book explores the two as parallel processes one outer one inner Our outward search is for objective reality out there in the world But what we experience as outer is linked to what we can know in ourselves subjectively The inward search is for that level of consciousness that underlies all subjective experience spoken of by the mystics Like other recent others Drs Kafatos and Karatou find parallels between Eastern thought and recent scientific developments in quantum theory and cosmology But they go farther and hold that the realms of consciousness and the objective world are complementary aspect of the same reality Their approach is fresh and unique and shows how we are involved in the cosmic process *Gravitation and Cosmology: From the Hubble Radius to the Planck Scale* Richard L. Amoroso, G. Hunter, Menas Kafatos, J.P. Vigiér, 2006-04-11 Jean Pierre Vigiér continually labeled one of les heretiques de la science l'eternel resistant et le patriarche is yet a pillar of modern physics and mathematics with one leg firmly planted in theory and the other in empiricism spanning a career of nearly 60 years with a publication vitae quickly approaching 400 He wrote of his mentor Louis de Broglie Great physicists fight great battles which perhaps applies even more so to 1 Jean Pierre Vigiér himself If fortune allows a visit to Paris reported to be the city of love and certainly one of the most beautiful and interesting cities in the world one has been treated to a visual and cultural feast For example a leisurely stroll from the Musee du Louvre along the Champs Elysees to the Arc de Triomphe would instill even the least creative soul with the entelechies of a poets muse It is perhaps open to theoretical interpretation but if causal conditions have allowed one to be a physicist visiting Paris one may have taken opportunity to visit the portion of the old Latin quarter in place Jussieu where Pierre et Marie Curie Université reported to be the best university in France is stationed **Astronomy and Civilization in the New Enlightenment** Anna-Teresa Tymieniecka, Attila Grandpierre, 2010-11-18 This volume represents the first which interfaces with astronomy as the fulcrum of the sciences It gives full expression to the human passion for the skies Advancing human civilization has unfolded and matured this passion into the comprehensive science of astronomy Advancing science's quest for the first principles of existence meets the ontopoietic generative logos of life the focal point of the New Enlightenment It presents numerous perspectives illustrating how the interplay between human beings and the celestial realm has informed civilizational trends Scholars and philosophers debate in physics and biology the findings of which are opening a more inclusive wider picture of the universe The different models of the universal order and of life here presented all aiming at the first principles of existence accord with the phenomenology ontopoiesis of life within the logos prompted primogenital stream of becoming and action which points to a future of progressing culture **The Nature of Consciousness, the Structure of Reality** Jerry Davidson Wheatley, 2001 This book describes how understanding the structure of reality leads to the Theory of Everything Equation The equation unifies the forces of nature and enables the

merging of relativity with quantum theory The book explains the big bang theory and everything else *The Nature of Time: Geometry, Physics and Perception* R. Buecheri, Metod Saniga, William Mark Stuckey, 2012-12-06 There are very few concepts that fascinate equally a theoretical physicist studying black holes and a patient undergoing serious mental psychosis Time undoubtedly can well be ranked among them For the measure of time inside a black hole is no less bizarre than the perception of time by a schizophrenic who may perceive it as completely suspended standing still or even reversing its direction The nature of time is certainly shrouded in profound mystery This perhaps since the concept entails multifarious and occasionally incongruous facets No wonder the subject attracts the serious attention of scholars on the one hand and of the lay public on the other Our Advanced Research Workshop is an excellent illustration of this point as the reader will soon discover It turned out to be a unique professional forum for an unusually lively effective and fruitful exchange of ideas and beliefs among 48 participants from 20 countries worldwide selected out of more than a hundred applicants The present book is based on the select talks presented at the meeting and aims to provide the interested layperson and specialist alike with a multidisciplinary sampling of the most up to date scholarly research on the nature of time It represents a coherent state of the art volume showing that research relevant to this topic is necessarily interdisciplinary and does not ignore such delicate issues as altered states of consciousness religion and metaphysics **The Mysteries of Reality** Gayle Kimball, 2021-03-26

Courageous scientists challenge the dominant paradigm of reality Why are they so brave and what does their research reveal What is reality Is there more than we know from our five senses Vanguard scientists believe there is more than we see so they formulate a non materialist paradigm that expands human potential to include mind and matter interaction Since going against the dominant worldview provokes opposition this book explores the personal backgrounds of the scientists to find out why they are so courageous We learn that there is another dimension that allows for enhanced abilities Based on interviews conducted by Gayle Kimball *The Mysteries of Reality Dialogues with Visionary Scientists* reports on the current research and personal characteristics of visionaries from around the world *The Psychology of Yoga* Georg Feuerstein, 2014-01-14

Psychoanalysis itself and the lines of thought to which it gives rise said C G Jung are only a beginner's attempt compared to what is an immemorial art in the East by which he was referring to the millennia old study of the mind found in Yoga That tradition was hardly known in the West when the discipline of psychology arose in the nineteenth century but with the passing of time the common ground between Yoga and psychology has become ever more apparent Georg Feuerstein here uses a modern psychological perspective to explore the ways Hindu Buddhist and Jaina yogas have traditionally regarded the mind and how it works and shows how that understanding can enhance modern psychology in both theory and practice

Supersensible Impulses Rudolf Steiner, 2024-05-08 When you perform a ritual it is an appeal to the spiritual powers of the universe an appeal to the powers that are meant to connect with the earth precisely through what people do Rudolf Steiner With rituals or cultic forms as his central motif Rudolf Steiner refers extensively to Indian Persian and in particular

Egyptian initiation rites and how these enabled people of antiquity to connect with specific spiritual beings He explains the practical purpose of mummification for the religious life of ancient Egypt and of the use of ritual in certain secret societies or brotherhoods today as in turn a mummification of Egyptian rites But he also points to the future describing how truly formulated rituals have a positive effect on human development Whilst inhalation exercises were relevant to cultures of the past the principle of exhalation is important for future evolution On the one hand these extraordinary lectures relate to Rudolf Steiner's ceremonial work in the Esoteric School of 1906 1914 but more significantly they were given in parallel to the founding of the Christian Community for which Rudolf Steiner mediated its sacraments Today he states Christ must be sought through a new access to the spiritual world and any remaining traditional ritualistic forms should be permeated with the power of the Mystery of Golgotha The lectures are accompanied with an introduction by Dale Brunsvold editorial notes and an index Eight lectures Dornach Sept Oct 1922 GA 216 The Ascension to a Higher Level of Consciousness -- How to Cure Everything Kevin Carvalho, 2015-03-12 This book will teach you how to meditate and how to cure any imbalanced energy in your life This book gives you the power to create miracles in your life via Asking believing in yourself and receiving from the cosmos Also this book teaches how to do psycho cybernetics as well as help you ascend to higher level of consciousness **The Philosopher's Index** ,1993 Vols for 1969 include a section of abstracts
