Marriage, Family, and Kinship Melvin Ember, Carol R. Ember, 1983-01-01 *The Household* Robert C.

Ellickson, 2010-08-02 Some people dwell alone many in family based households and an adventuresome few in communes The Household is the first book to systematically lay bare the internal dynamics of these and other home arrangements Legal underpinnings social considerations and economic constraints all influence how household participants select their homemates and govern their interactions around the hearth Robert Ellickson applies transaction cost economics sociological theory and legal analysis to explore issues such as the sharing of household output the control of domestic misconduct and the ownership of dwelling units Drawing on a broad range of historical and statistical sources Ellickson contrasts family based households with the more complex arrangements in medieval English castles Israeli kibbutzim and contemporary cohousing communities He shows that most individuals when structuring their home relationships pursue a strategy of consorting with intimates This he asserts facilitates informal coordination and tends ultimately to enhance the quality of domestic interactions He challenges utopian critics who seek to enlarge the scale of the household and legal advocates who urge household members to rely more on written contracts and lawsuits Ellickson argues that these commentators fail to appreciate the great advantages in the home setting of informally associating with a handful of trusted intimates The Household is a must read for sociologists economists lawyers and anyone interested in the fundamentals of domestic life

Bioarchaeologists Speak Out Jane E. Buikstra, 2018-10-26 Bioarchaeologists who study human remains in ancient historic and contemporary settings are securely anchored within anthropology as anthropologists yet they have not taken on the pundits the way other subdisciplines within anthropology have Popular science authors frequently and selectively use bioarchaeological data on demography disease violence migration and diet to buttress their poorly formed arguments about general trends in human behavior and health beginning with our earliest ancestors While bioarchaeologists are experts on these subjects bioarchaeology and bioarchaeological approaches have largely remained invisible to the public eye Current issues such as climate change droughts warfare violence famine and the effects of disease are media mainstays and are subjects familiar to bioarchaeologists many of whom have empirical data and informed viewpoints both for topical exploration and also for predictions based on human behavior in deep time The contributions in this volume will explore the how and where the data has been misused present new ways of using evidence in the service of making new discoveries and demonstrate ways that our long term interdisciplinarity lends itself to transdisciplinary wisdom We also consider possible reasons for bioarchaeological invisibility and offer advice concerning the absolute necessity of bioarchaeologists speaking out through social media

grasslands of southeastern New Mexico into a community heavily engaged in long distance bison hunting and intense exchange with the Puebloan world to the west Bibliographie Internationale D'anthropologie Sociale Et Culturelle International Committee for Social Science Information and Documentation,1986-11-20 First published in 1986 Routledge is an imprint of Taylor Francis an informa company **Troubled Times** David W. Frayer,Debra L. Martin,2014-05-01 Evidence amassed in *Troubled Times* indicates that much like in the modern world violence was not an uncommon aspect of prehistoric dispute resolution From the civilizations of the American Southwest to the Mesolithic of Central Europe the contributors examine violence in hunter gatherer as well as state societies from both the New and Old Worlds Drawing upon cross cultural analyses archaeological data and skeletal remains this collection of papers offers evidence of domestic violence homicide warfare cannibalism and ritualized combat among ancient peoples Beyond the physical evidence various models and explanations for violence in the past are explored **Cross-Cultural Research Methods** Carol R. Ember,Melvin Ember,2009-07-16 Without ethnography cross cultural comparison would not be possible But without cross cultural comparison we would know nothing of what may be universal or variable across human cultures or why variation exists *Cross Cultural Research Methods* is an introductory teaching tool that shows students and potential researchers how to describe compare and analyze patterns that occur in different cultures that is how to form and test anthropological sociological psychological medical or political hypotheses about cultural variation *Biosocial Evolutionary Analysis* Jonathan H. Turner,Alexandra Maryanski,2024-01-18 This authoritative book proposes a methodological and theoretical strategy for developing sociological explanations of the socio cultural universe Jonathan H Turner and Alexandra Maryanski discuss the problems that persist in explaining the socio cultural universe using only biological and psychological approaches and outline new strategies for understanding the evolution of human beings and their biological nature Family Structure and Interaction Gary R. Lee,1977 *The First Institutional Spheres in Human Societies* Seth Abrutyn,Jonathan Turner,2022-03-15 Few concepts are as central to sociology as institutions Yet like so many sociological concepts institutions remain vaguely defined This book expands a foundational definition of the institution one which locates them as the basic building blocks of human societies as structural and cultural machines for survival that make it possible to pass precious knowledge from one generation to the next ensuring the survival of our species The book extends this classic tradition by first applying advances in biological evolution neuroscience and primatology to explain the origins of human societies and in particular the first institutional sphere kinship The authors incorporate insights from natural sciences often marginalized in sociology while highlighting the limitations of purely biogenetic Darwinian explanations Secondly they build a vivid conceptual model of institutions and their central dynamics as the book charts the chronological evolution of kinship polity religion law and economy discussing the biological evidence for the ubiquity of these institutions as evolutionary adaptations themselves **Research Grants Index** National Institutes of Health (U.S.).
