**Readicide** Kelly Gallagher, 2023-10-10 Read i cide The systematic killing of the love of reading often exacerbated by the inane mind numbing practices found in schools Reading is dying in our schools Educators are familiar with many of the factors that have contributed to the decline poverty second language issues and the ever expanding choices of electronic entertainment In this provocative book Readicide How Schools are Killing Reading and What You Can Do About It author and teacher Kelly Gallagher suggests it is time to recognize a new and significant contributor to the death of reading our schools Readicide Gallagher argues that American schools are actively though unwittingly furthering the decline of reading Specifically he contends that the standard instructional practices used in most schools are killing reading by Valuing standardized testing over the development of lifelong readers Mandating breadth over depth in instruction Requiring students to read difficult texts without proper instructional support and insisting students focus on academic texts Ignoring the importance of developing recreational reading Losing sight of authentic instruction in the looming shadow of political

pressures. Readicide provides teachers, literacy coaches, and administrators with specific steps to reverse the downward spiral in reading steps that will help prevent the loss of another generation of readers.

*Reading* Mengli Song, Tamara V. Young, 2007-12-01 The past decade saw heightened policy activism in the field of reading at both the federal level and across virtually all 50 states. Initially sparked by disagreements about methods for teaching children to read, the so-called reading wars stirred heated debates on a variety of issues, levels, and trends of reading achievement, pedagogy, standards, and assessment, and education equity among others. Embedded within these debates were the political agendas of state executives and legislatures, the interests of advocacy groups, and the ideologies of reading professionals, which were collectively shaping state reading policy development. Drawing primarily on interviews with 366 policy actors from nine states, this book presents a comprehensive investigation of the state reading policy domain, employing multiple theoretical frameworks and research methods. Using social network analysis, the authors examined the interplay among a plethora of policy actors embedded in reading policy networks. They explored in depth policy actors' divergent beliefs on key reading-related issues, the causal stories told, and the policy solutions proposed. In addition, they examined the variety of lobbying tactics that interest groups utilized to gain influence over the policymaking process and to advance their policy agenda. As the most significant research endeavor in the area of state reading policy to date, this cross-state comparative study sheds light on the multifaceted nature and the intricacies of the policy processes in reading and in education in general. The findings of this study bear important implications for both policy actors and education professionals. This study also makes a substantial contribution to policy research in education by demonstrating how theoretical frameworks and analytic methods that have not been fully utilized in education could serve as powerful tools for exploring educational policy processes.

System-wide Efforts to Improve Student Achievement Kenneth K. Wong, Stacey Rutledge, 2006-03-01 Strong system-wide support is increasingly being identified as playing an important role in policy efforts aimed at increasing student achievement. Hightower, Knapp, March, and McLaughlin (2002) Yet current research often views district and other system-wide support as largely governance changes without substantive linkage to school improvement outcomes. Cuban and Usdan (2003) In this volume, we seek to deepen our understanding of the role of school districts and

system wide initiatives through a series of case studies that focus on how school districts and system wide actors facilitate policy innovation and reform initiatives that are designed to improve student achievement Through both quantitative and qualitative studies from diverse settings across the country chapters in this volume examine the role of instructional technology alternative accountability practices management and partnership reforms and school improvement efforts through new incentive and support practices While challenges remain these case studies demonstrate how districts support and facilitate school change aimed at improving student achievement
