IMPROVING SCHOOLS FOR AFRICAN AMERICAN STUDENTS Sheryl J. Denbo, Lynson Moore Beaulieu, 2002-01-01 Improving Schools for African American Students is designed to provide educational leaders with a

better understanding of how to recognize the diversity of strengths that Black students bring with them to school and how to use these strengths to improve achievement. The articles contained in this book discuss generic education issues such as policy reform, the importance of high quality teaching and the improvement of schools from the perspective of the academic achievement of African American students. Part I explores institutional racism in the context of America's public schools and provides suggestions for educational leaders to eliminate harmful policies and practices within educational institutions and settings. Part II discusses the kinds of institutional and instructional changes that are needed to support successful schooling of African American children and youth. Part III focuses on the challenges presented to African American students by the current high stakes testing environment that surrounds standards assessment and accountability. A review of the literature on schools that have succeeded in improving achievement for African American students at the elementary, middle and high school levels with districts moving towards narrowing the achievement gap is included. This text examines a wide variety of policies, programs, practices and research that will provide valuable insight. The emphasis throughout the book is on the ability of educators to successfully restructure their schools, offer high quality teaching and learning standards for African American students and to make the kinds of changes that will result in high achievement for all students.
