Raising A Reader:

Raising A Reader Jennie Nash, 2013-07-30 What were my kids born to do That is the question I hope to help them answer And because reading is the thing I love most it s only natural for me to hope it will become something they love too The trouble is that reading is a particularly slippery passion to want to pass along because it s a skill most parents would agree their children have to master to one degree or another from *Raising a Reader* Can passion be passed along from parent to child Can you in other words make someone love baseball ballet or books Of course you can t but that doesn t stop parents from trying Jennie Nash was one of those parents a parent so obsessed about getting her kids to read that her desire sometimes strayed into desperation her hope often became an obsession and instead of helping her resolve got in the way In the end she found that like so many of the things we do as parents passing along a passion for reading happens in the push and pull of digging in and letting go day in and day out both because of and in spite of our efforts Nash shares stories and misadventures from the years when her young daughters were learning what it meant to have a relationship with words and she was learning to let them She reminds us how the magic moments happen in their own sweet time by being together in the presence of good books and seeing each child as unique Each chapter of *Raising a Reader* ends with personal practical tips and games that spring straight from the narrative A comprehensive index discusses many of the books Nash has enjoyed with her children providing a year s worth of titles for parents and their children to explore **Raising a Reader** Bonnie D.

Raising a Child, Raising a Reader , 2007 Educational hurrying has ignited a pushing down of curriculum which has resulted in higher expectations placed on kindergarteners As their children s first teachers parents are expected to prepare their children for these new demands prior to their entrance into formal schooling Parents who are concerned about these increased demands may postpone sending their child to kindergarten in order to ensure that their child will not be among those left behind Many

parents fall prey to the misconception that literacy is introduced in kindergarten or grade one This school of thought shortchanges young learners who require years of literacy experiences prior to the outset of kindergarten Many parents are not aware of the profound effect they can have on their children s literacy development There are many strategies that parents can employ as they try to provide the building blocks necessary for their children s literacy acquisition Activities which are usually reserved for older learners can be adapted in order to enhance the parent child literacy partnership The extensive research contained within this Applied Thesis is intended to highlight the crucial role that parents play in their children s early literacy learning In addition this Applied Thesis contributes strategies and resources which parents may find useful as they accompany their children on the quest for literacy Ultimately parents have the responsibility of immersing their children in literacy related activities and of transferring to their children a love of books and reading which will last a lifetime
