International Sport Richard William Cox, 2004 There has been an explosion in the quantity of sports history literature published in recent years making it increasingly difficult to keep abreast of developments The annual number of publications has increased from around 250 to 1 000 a year over the last decade This is due in part to the fact that during the late 1980s and 90s many clubs leagues and governing bodies of sport have celebrated their centenaries and produced histories to mark this occasion and commemorate their achievements It is also the result of the growing popularity and realisation of the importance of sport history research within academe This international bibliography of books articles conference proceedings and essays in the English language is a one stop for the sports historian to know what is new

Science in the Romantic Era David Knight, 2016-03-31 First published in 1998 The Romantic Era was a time when society religion and other beliefs and science were all in flux The idea that the universe was a great clock and that men were little clocks all built by a divine watchmaker was giving way to a more dynamic and pantheistic way of thinking A new language was invented for chemistry replacing metaphor with algebra and scientific illustration came to play the role of a visual language deeply involved with theory A scientific community came gradually into being as the 19th century wore on The papers which compose this book have appeared in a wide range of books and journals together with the new introduction they illuminate science and its context in the Romantic Era and follow its effects in the 19th century
