The Range Cattle Industry Edward Everett Dale, 1960 *The Range Cattle Industry* Edward Everett Dale, 1930 **The Range Cattle Industry** Edward Everett Dale, 1960 *The Kansas Beef Industry* Charles L. Wood, Joshua Specht, 2021-10-08

This book relates the modern development of the Kansas beef cattle industry combining both the history of production including specific business problems and the significant work in upbreeding and an examination of the marketing aspects of the industry that became so important during the twentieth century Sharpest focus is on the period 1890 to 1940 after the Western beef industry had passed through the transition from using the expansive open range method of beef production to the more rational and organized methods of today Wood presents a detailed discussion of the history of upbreeding He points out the little known fact that the fine blooded animals especially Herefords that moved out from the Midwest were probably more important in stocking the ranges of the Plains and the Southwest than the many thousands of Longhorns driven from Texas He emphasizes the interregional aspect of beef production and the unique role played by Kansas On the threshold of the Great Plains Kansas received cattle from both the Midwest and the Southwest for many years upbred cattle moving South and stocker cattle moving from the South or Southwest into Kansas for additional maturing before being shipped to the Midwest for fattening or for slaughter Wood also looks closely at the relationship of cattlemen to government and to big business railroads stockyards and packers He sees the cattlemen as agricultural producers and business managers rather than as romantic self reliant giants of the earth Taking issue with the popular myth that cattlemen were and are ruggedly individualistic and disdainful of outside help Wood discusses the cattlemen s repeated demands for aid especially during the 1930s Included in the book is the history of the Kansas Livestock Association which the author credits as being one of the most significant stock associations in the West during this century Wood sets the KLA s growth within the context of the larger organizational revolution in the nation s business world A concluding chapter surveys major developments after World War II including the development of feedlots and irrigation the new cross breeding decentralization of packers and the advent of trucking to replace railroads There has been scant information on these topics in the general literature of the Great Plains

The Taft Ranch A. Ray Stephens, 2014-03-07 For fifty years the progressive Coleman Fulton Pasture Company popularly known as the Taft Ranch led in the development of South Texas and in the early twentieth century achieved national and international repute for its contributions to agriculture The story of the ranch reaches its climax as the firm is absorbed into the community growing up around it the same community the ranch had nurtured to an unprecedented prosperity In 1961 A Ray Stephens visited Taft Texas and received permission to use the dust covered records which for thirty years had been closed to historians These records plus the valuable supplementary material in the Fulton Collection at the University of Texas have enabled the author to tell the complete story of the ranch from its inception in 1880 to its dissolution in 1930 In 1880 with a fifty year charter the Coleman Fulton Pasture Company was legally born as a private corporation For the duration of its history this company aided the advancement of South Texas through effective utilization of the fertile land through development of agriculture and related industries and through encouragement of settlers and curious visitors to the Coastal Bend region Its history is a long determined fight against severe drought cattle disease and financial insolvency Guided by farsighted men who believed in experimentation in agriculture and who also promoted the establishment of stores schools colleges churches and industrial plants the company not only survived but prospered and by 1920 its owners could survey their vast properties with well earned satisfaction The struggling cattle firm of 1880 had expanded into a multi interest profitable corporation that had established and supervised most of the industries in Taft Texas Stephens well documented 1964 study had been long needed During the three decades preceding it the ranch had been well nigh forgotten only the handful of people then still living who had worked on the ranch had kept its memory fresh while the voluminous company records remained inaccessible The author supplemented his study of company records and newspapers with archival material government records and information obtained during hours of interviewing His book will insure for the Taft Ranch its deservedly prominent position in Texas history The lively introduction was written by Joe B Frantz 1917 1993 who in his role of Professor of History at the University of Texas encouraged the study and watched its development

The Great Plains, Second Edition Walter Prescott Webb, 2022-08 Published in Cooperation with the William P Clements Center for Southwest Studies Southern Methodist University This iconic description of the interaction between the vast central plains of the continent and the white Americans who moved there in the mid nineteenth century has endured as one of the most influential widely known and controversial works in western history since its first publication in 1931 Arguing that the Great Plains environment constitutes a geographic unity whose influences have been so powerful as to put a characteristic mark upon everything that survives within its borders Walter Prescott Webb identifies the revolver barbed wire and the windmill as technological adaptations that facilitated Anglo conquest of the arid treeless region Webb draws on history anthropology geography demographics climatology and economics in arguing that the 98th Meridian
