## **Range Rovers East:**

**Range Rover Second Generation** James Taylor, 2018-09-23 The second generation Range Rover was arguably Land Rover's first model designed as a luxury vehicle. It was a major leap for the company but a very successful one as well. Despite controversy over its looks and some initial teething problems, it became a worthy successor to the much-loved original Range Rover. **Range Rover Second Generation The Complete Story** draws on the memories of designers and engineers as well as on a wide variety of factory sources to provide the most authoritative history of the model yet. The book covers the full development history, the changes during eight years of production, Range Rovers for the North American market, full technical specifications, and finally Range Rovers and the emergency services. A companion volume to the author's **Range Rover First Generation The Complete Story** Crowood 2018.

**Range Rover First Generation** James Taylor, 2018-04-23 The Range Rover's designers intended it to be a more comfortable and road-friendly passenger-carrying Land Rover, but customers quickly saw something much more in it. During the 1970s, while its immense practicality and capability were appreciated and acknowledged, a Range Rover became a sought-after and prestigious possession. It went on to change the face of Land Rover forever. **Range Rover First Generation The Complete Story** delves into the real story of the Range Rover, examining what lay behind the multiple changes in its twenty-six years of production. The book covers the full development story, custom and utility conversions, Range Rovers for the US market, full technical specifications, and Range Rovers assembled overseas. If ever a car deserved the over-used epithet 'iconic', the first generation Range Rover is it. The book provides an insight into the little-known difficulties and problems that were so well concealed by the Range Rover's makers and is a must-read for all Range Rover and Land Rover enthusiasts. Superbly illustrated with 223 colour and 97 black and white photographs.

**Dead Still** T.F. Muir, 2020-02-06 St Andrews, Scotland. When a man's preserved body is discovered in a whisky ageing cask in the local Gleneden Distillery, DCI Andy Gilchrist and his partner DS Jessie Janes are assigned to the investigation. But when the dead man is identified as Hector Dunmore, the once-heir apparent of Gleneden Distillery, their investigation takes a dramatic turn. For Dunmore was reported missing 25 years earlier when his Land Rover was found abandoned on the outskirts of Mallaig, almost two hundred miles away on the Scottish west coast. Why hide a body in a 25-year ageing cask? And who would want Dunmore dead? Suspicion falls on Duncan Milne, the distillery manager at the time, but when Gilchrist learns that Milne died under suspicious circumstances the year Dunmore disappeared, he suspects they are looking at a double murderer. Gilchrist's efforts to resolve the murders force him to dig deep into the Dunmore family's past, only to come up against a frightening killer who will stop at nothing to keep the darkest of family secrets from ever coming to light.

**PRAISE FOR T F MUIR** Rebus did it for Edinburgh, Laidlaw did it for Glasgow. Gilchrist might just be the bloke to put St Andrews on the crime fiction map. *Daily Record*. A truly gripping read with all the makings of a classic series. Mick Herron. Gripping and grisly with plenty of twists and turns that race along with black humour. Craig Robertson. DCI Gilchrist gets under your skin. Though determined and a bit vulnerable.

**The Political Economy of Automotive Industrialization in East Asia** Richard F. Doner, Gregory W. Noble, John Ravenhill, 2021 East Asia is a powerhouse of automobile production Yet across the region national automobile industries have had strikingly different patterns of development Despite starting from equally low levels of performance and initially similar strategies countries have experienced vastly different results From Thailand's success as an assembly hub for foreign automakers and China's unexpected achievements in building its own car industry to South Korea's impressive development of an integrated industry to the Philippines persistent weakness these divergent paths offer a fascinating window into the determinants of economic growth The Political Economy of Automotive Industrialization in East Asia provides a political explanation for why development strategies and performance have been so uneven within one of the world's most important regions Utilizing interviews and original language research from multiple nations this book explains that factors such as market size and neoclassical economic policies alone cannot explain these patterns of development Richard F Doner Gregory W Noble and John Ravenhill instead highlight the significance of two sets of factors countries very different capabilities for implementing policies and the political forces that help to explain the emergence of effective institutions Through cross national analyses of China Taiwan South Korea Indonesia Malaysia the Philippines and Thailand the book sets up a clear structure for understanding industrial development and how it enables or constrains the capabilities of domestic firms Brief comparisons with Brazil Mexico and other developing countries confirm the utility of the analytic framework and demonstrate how it is superior both to accounts in mainstream economics and much of political science which fail to give sufficient emphasis to the role of public and public private institutions or provide an explanation of the political bases of those institutions In a world where auto assemblers and suppliers are facing new challenges in an ever evolving industry such as the transition to electric and autonomous vehicles this book offers a crucial perspective on the centrality of institutional capacities and political economy By tracing the divergent trajectories of seven nations The Political Economy of Automotive Industrialization in East Asia offers lessons beyond the automobile industry that illustrate the broader importance of institutions to economic growth
