Moellendorf,2009-11-04 The globalization of trade investment and finance continues apace Many have benefited from this but deep inequalities persist This book argues that the interconnections established by globalization make possible a critique of its inequality For those who take seriously human dignity equality is a basic presumption of social institutions Wealth Creation Approach to Reducing Global Poverty Scott Hipsher,2020-05-19 This book takes a unique approach to the topic of poverty reduction primarily employing an international business framework as opposed to the usual economic or political lens Some of the key ideas explored in the book include poverty is primarily the lack of choices not the lack of material possessions attacking inequality of opportunity might be a more effective means to reduce poverty than attacking inequality of wealth political systems matter but individuals and for profit firms also have a vital and indispensable role in helping to create the wealth needed to reduce poverty and an effective corporate social responsibility strategy to help reduce poverty may include finding innovative and creative ways to operate profitably in areas of the world where poverty is currently robbing too many people of the opportunity to live their version of the good life Building on such ideas the book advocates for private companies to expand operations into the least developed regions of the world as part of their corporate social responsibility programs and to reframe the debates away from ones focused on exploitation and economic nationalism to one of creating opportunities across political borders **The Landscape of Global Health Inequity** Barbara W. Inequalities in Sub-Saharan Africa Anda David,Murray Leibbrandt,Vimal Ranchhod,Rawane Yasser,2025-03-25 The growing disparity between the rich and poor remains a critical challenge affecting countries across all continents irrespective of their per capita gross domestic product This widening gap not only impedes efforts to eradicate extreme poverty but also hinders progress toward social justice and resilience building Rising inequalities pose substantial barriers to sustainable development and it is within this context that this book *Inequalities in Sub Saharan Africa Multidimensional Perspectives and Future Challenges* contributes to ongoing debates offering a comprehensive analysis of the current challenges and future perspectives of inequality on the African continent Despite the intensification of calls for wealth taxation and inequality reduction progress has been slow A key challenge lies in creating a viable political path for implementing progressive taxation policies Resistance from those benefiting from the current system often stalls efforts making progress difficult Moreover reducing inequality requires not only ex post redistribution but also pre distribution mechanisms that address inequality at its roots Policies targeting education competition financial market regulation and industrial development all hold the potential to create equitable economic opportunities ensuring access to credit job creation and more balanced economic growth Despite facing unique profound challenges Africa is often overlooked in these global discussions This book seeks to place the continent s issues of income inequality unequal access to education and health care climate vulnerability and inclusive growth at the center of the conversation The book further advocates for innovative policies including competition reforms and bargaining frameworks that shift the balance between capital and labor Given that inequality in Africa is deeply rooted in historical economic and institutional factors a stronger focus on pre distribution policies is necessary These systemic changes can help reshape the conditions under which inequality emerges and persists In addition to policy reforms it is vital to strengthen the research and academic infrastructure that underpins the understanding of inequality Equity concerns must be addressed within the scientific field and African research capabilities must be bolstered This volume written in collaboration with the African Center of Excellence for Inequality Research calls for a greater focus on empowering African researchers as part of a broader development strategy By doing so it aligns with the World Bank s and the Agence Fran aise de D veloppement s commitment to supporting research as a critical tool for sustainable development
