Right Brain And Religion:

The Right Brain and Religion C. W. Dalton, 1990 Complete Idiot's Guide to Understanding Catholicism Bob O'Gorman, Robert Thomas O'Gorman, Mary Faulkner, 2003 No Marketing Blurb *The Last Book* John Williams, 2007-08-27

There have been many attempts to explain life For the most part they are variants on a religious or mystical theme These provide a purpose to life but not the purpose of life A full rational explanation of our existence based on our rapidly accumulating scientific knowledge has eluded us until now The explanation of life which is offered in this book draws on three main components evolution genetics and psychology However something exists in our mind which stops us from seeing clearly what is already before us Once this block is removed we can view life objectively and see it as a special form of information which has arisen through evolution Information is identified as the unifying entity of the universe which is inherent in the spatial arrangement of matter This book relates these findings to our world and our lives It sets out in rational terms where we came from how we got here and finally reveals our destiny www.thelastbook.co.uk *Spiritual Intelligence and the Neuroplastic Brain* Charles W. Mark Ph. D., Charles W. Mark, 2010 Our brains are getting wired differently in the world of digital technology information revolution and in the inter cultural world of global society Think of the new vocabulary Global brain collective intelligence global village and cyberspace That should tell us something about the neural rewiring that is taking place inside of our brains whether or not we are aware of it The fact that the human brain changes throughout a person's life in response to intellectual stimulation physical exercise exposure to new cultural environments learning opportunities and challenges is a revolutionary discovery Till twenty years ago neuroscientists believed in the conventional theory that the brain's ability at making new neural connections stopped before a child entered adolescence That is the old dogma There is a Second Copernican Revolution taking place inside of our brains writes the author quoting Carl Zimmer Some experts are suggesting that we are already living in what Richard Restack calls the neurosociety Ray Kurzweil the futurist is predicting that by 2045 A D human beings will be living in an era of singularity when non biological machines invented by human brains and human ingenuity are going to outsmart human intelligence billions of times What is going to be the fate of the human spirit human spirituality the feeling of connection to a force and power that is greater than us God our ability to use spiritual imagination and our intelligence Are we progressively moving away from religion and community based spirituality into the spirituality of different strokes for different folks In his groundbreaking book *Spiritual Intelligence and The Neuroplastic Brain A Contextual Interpretation of Modern History* Charles W Mark takes the reader on a journey through modern history and shows the glimpse of what is to come <http://www.spiritualityintelligence.com>

Evolution of Faith and Religion Ajit Randhawa, 2009-08 *Religion, Materialism and Ecology* Sigurd Bergmann, Kate Rigby, Peter Manley Scott, 2023-05-31 This timely collection of essays by leading international scholars across religious studies and the environmental humanities advances a lively discussion on materialism in its many forms While there is little

agreement on what materialism means it is evident that there is a resurgence in thinking about matter in more animated and active ways The volume explores how debates concerning the new materialisms impinge on religious traditions and the extent to which religions with their material culture and beliefs in the Divine within the material can make a creative contribution to debates about ecological materialisms Spanning a broad range of themes including politics architecture hermeneutics literature and religion the book brings together a series of discussions on materialism in the context of diverse methodologies and approaches The volume investigates a range of issues including space and place hierarchy and relationality the relationship between nature and society human and other agencies and worldviews and cultural values Drawing on literary and critical theory and queer philosophical theological and social theoretical approaches this ground breaking book will make an important contribution to the environmental humanities It will be a key read for postgraduate students researchers and scholars in religious studies cultural anthropology literary studies philosophy and environmental studies

Living Deeply Fraser Watts, 2018-01-01 Here is a book that takes people on a personal journey a journey that is both spiritual and psychological a three fold journey that leads you the reader to face issues about yourself raises challenges about relationships and points towards what is above and beyond Fraser Watts draws on his own Christian tradition in a way that is relevant to spiritual people everywhere whatever tradition they belong to or if they are of no religious tradition at all It is a book to be read reflectively giving some time to make connections between what is gently written in the pages and your own experience of life if you let it Living Deeply will help you join up a spiritual perspective with your own psychological issues Such a journey could change a life Perhaps it will change yours helping you to see what deeper issues are at stake as you journey through life and give you a spiritual compass to respond to life's challenges This book will help you indeed to be living more deeply

The War of the Ghosts and Machines Mike Hockney, 2015-09 Are you a ghost or a machine You don't need to be a superstitious believer to support the side of the ghosts Machine people reduce everything to lifeless mindless purposeless atoms of matter the ultimate little machines For ghost people reality reduces to dimensionless mathematical singularities which are none other than the hyperirrational monadic souls posited by Pythagoras and Leibniz Ghost people subscribe to atoms minds with atomic number zero i.e. minds/souls are made of massless dimensionless photons Machine people start with hydrogen atoms with atomic number one All ghost entities are associated with zero and infinity All machine people deny the existence of zero and infinity Mathematically these are the two numbers where the ghosts and the machines collide head on This book is all about demonstrating that there are indeed ghosts in the machines

Spirituality Beyond Science and Religion Lillian Stover Wells, Jack McMahan, William Pillow, 2012-05-25 Spirituality means something different to everyone Some may believe it involves participating in organized religion Others may prefer it to be more personal like getting in touch with ones inner self through yoga meditation quiet reflection or even long walks A few may find that it lies in finding a new sense of purpose for their lives Spirituality Beyond Science and Religion addresses all of these and more through a new paradigm about life and death It lifts readers above their daily press for competitive survival and success by going to the heart of all spirituality The book disputes traditional sciences claim that physical matter is the only reality It also helps explain enigmas that have confronted orthodox religion for centuries To do so this book correlates published research from nearly one hundred and fifty authors and professionals in medicine neuroscience psychology theology history and metaphysics It explores new insights being revealed through thousands of subjective experiences around the world all of them beyond the ability of science or religion to explain The book therefore not only offers reassurance that death is not final but it also discloses profound implications for how we live our lives on earth The US Review of Books Spirituality Beyond Science and Religion by William Pillow with Jack McMahan and Lillian Stover Wells iUniverse reviewed by Priscilla Estes but deep inside us is the recognition that life can and should have more meaning one that reaches far beyond traditional science and orthodox religion and one that involves all of us The mind body spirit MBS publishing industry has come a long way since the 1960s and 1970s when Aldous Huxley Hermann Hesse and Carlos Castaneda combined Eastern and Western thought in the best sellers Doors of Perception Siddhartha and The Teachings of Don Juan respectively In fact according to religion and publishing expert Elizabeth Puttick MBS publishing is the fastest growing non fiction genre which a quick examination of virtual and real bookstores supports More than ever before great minds race to close the gap between science and religion to answer the questions of where do we come from why are we here and where do we go after death We search for answers inside the human brain the psyche the fetus gravity energy fields near death experiences NDEs universal consciousness time travel soul travel quantum medicine karma dharma and more it s hard for the average person to comprehend let alone keep up Finally here is a book that helps pull it all together for us written by William Pillow ex US Air Force and retired pharmacist with thirty four years at Eli Lilly William Pillow began a quest to discover where we go after death and why when a long and lingering illness befell his wife and he confronted aging Initially a Southern Baptist and a skeptic about all things metaphysical he changed his mind while reading the incredible body of research on soul survival After prodigious investigation much of which concerns NDEs and studies on fetal awareness Pillow

concluded there is a soul a God and a Heaven His conclusions may challenge your philosophy but parenthetical documentation and a fifteen page bibliography encourage independent verification The book starts slowly and carefully as Pillow builds his case by conscientiously stitching together scientific religious and metaphysical literature both ancient and modern on the nature of God the spark of life souls the human superconsciousness and Heaven the spirit world The brain begins to smoke while chugging through study after study on NDE s shared NDE s life between lives LBL out of body experiences OBE past life regression after death communications ADC pre birth visions neurological pathways the transcendent source of consciousness the ego and more We long for an index a glossary and less use of quotes around words that don t require them Halfway through our mental labors are rewarded with chapter 7 Our Incomparable Souls This is the heart of the book a behind the scenes look at the soul and a parting of the veil of forgetfulness produced by the ego Pillow discusses studies on fetal consciousness which provide the strongest circumstantial evidence for existence of the soul and gives a moving testament to the soul s purpose to instill compassion empathy and benevolence in its human host The second half of the book flies by as we greedily gobble mainstream studies on energy healing brain waves and the need for face to face friendships in an electronically connected world Tucked unobtrusively at the end of chapter 11 are three paragraphs titled For Me Personally in which the author shares his private definition of faith Such unheralded brevity from a man who once considered entering the Christian ministry shows great respect for the reader and for the role of science in decoding religion and spirituality The final chapter implores us to at least consider the possible importance of these concepts and commentaries for your loved ones and for you Pillow believes that by knowing there is a God a soul and a Heaven we can sustain our inner journey toward purpose and meaning in our lives and that by recognizing our shared humanity we can save civilization One hopes and prays this is true as murders by children mass killings by governments greed corruption materialism apathy mental illness addiction and more threaten to suffocate humanity s life force Pillow is an accomplished author having written or edited five educational textbooks several dozen articles one murder mystery involving reincarnation and the paranormal and five books about the search for self and the meaning of life through science self awareness and spirituality Spirituality Beyond Science and Religion is his first book written with theologian Jack McMahan and clinical psychologist Lillian Stover Wells Pillow brilliantly connects his philosophy on the soul God and Heaven with salient literature in the field of science and religion The MBS genre has come a long way from the Indian fables and drug induced journeys of the sixties and seventies Pillow s overall message that the power of love is greater than the love of power points us in the right direction for the twenty first century
