Rights And Deprivation:

Rights and Deprivation Lesley A. Jacobs, 1993 Many welfare state programs redistribute resources from some citizens to others This book discusses whether such a redistribution can be justified by a theory of moral rights Lesley Jacobs maintains that while many orthodox rights based defenses of state welfare are misconceived it is nevertheless possible to defend programs such as universal access to health care and social security on the grounds that they are required to fulfill the moral rights of individual citizens

Rights and Deprivation Lesley A. Jacobs, 1990 **A New Study on the Judicial Administrative System with Chinese Characteristics** Yong'an Ren, Xianyang Lu, 2020-05-13 This book offers a comprehensive introduction to China's judicial administration system It presents in depth analyses of the country's current judicial administration system as well as a new theory on the system that is based on the realities of today's China and provides guidance on reform The book examines the system as a whole as well as various specific aspects of judicial administration putting forward bold theoretical proposals for improving China's judicial administration system and judicial system in general

EXCLUDED AND VICTIMIZED CITY MAKERS: ECONOMIC, SOCIAL AND CULTURAL RIGHTS OF DALITS AMONG DALITS Joseph Xavier, **HUMAN RIGHTS of the Vulnerables** Dr. A. A. GADWAL, 2020-06-26
Meaning and Concepts Human rights are universal norms framed for and rights granted to the of the people of the whole world against the political social and legal abuse All human beings irrespective of their sex race religion language place of birth are entitled to enjoy their human rights The provisions and practice of human rights protects all human beings from exploitation humiliation deprivation violence and injustice Human rights emphasizes on humanitarian approach towards all human being it believes in and promotes human values ethics morals dignity justice liberty equality and integrity of all human beings Human rights are supported by constitution and legal machinery of the state The origin of the human rights is traced to framed back in in Magana Carta under Declaration of Human Rights Before understanding the origin nature and provision in human rights one must know the basic concepts used in hence an attempt is made here to explain the concepts used in the draft of human rights some of them are as following Human Values In common parlance it is said that an individual has value or importance or an object of use has this much value the two usages have different meaning Human values is immeasurable and distinctive from the value of an object Human values have been employed so distinctively in different ways and times The term Value is originated from the Latin word Valere Which means to be of worthy The concise Oxford dictionary defines the term Value as the worth desirability or utility of a thing In other words Value means Relative worth or importance Monetary or material worth Values are the ideas customs institutions etc of a society towards which the people of the group have an effective regard These values may be positive as cleanliness freedom or education negative as security crime or blasphemy The aim of education is concerned with values of all kinds modern education itself is value oriented The social aims and believes which are regarded as the important aspect of a culture then the different aspects of

culture are also values The Idea of Human Rights Charles R. Beitz, 2009-08-06 The international doctrine of human rights is one of the most ambitious parts of the settlement of World War II Since then the language of human rights has become the common language of social criticism in global political life This book is a theoretical examination of the central idea of that language the idea of a human right In contrast to more conventional philosophical studies the author takes a practical approach looking at the history and political practice of human rights for guidance in understanding the central idea The author presents a model of human rights as matters of international concern whose violation by governments can justify international protective and restorative action ranging from intervention to assistance He proposes a schema for justifying human rights and applies it to several controversial cases rights against poverty rights to democracy and the human rights of women Throughout the book attends to some main reasons why people are sceptical about human rights including the fear that human rights will be used by strong powers to advance their national interests The book concludes by observing that contemporary human rights practice is vulnerable to several pathologies and argues the need for international collaboration to avoid them **Litigating the Politics of Human Rights** Sonja C. Grover, 2025-02-24 The cases analysed involve litigation concerning a disparate range of contemporary US culture wars including equity in access to public services unrestricted by religious bias resistance to the teaching of historical facts relating to racial tensions in America including the so called critical race theory debate the right of schoolchildren to exposure concerning a diversity of views current USSC litigation about US university admissions policy that considers race ethnicity as one factor amongst many in admission contemporary cases concerning the constitutionality of US abortion law grounded on Roe v Wade and the scope of State and indigenous sovereign powers These contemporary culture war US landmark cases are then compared to similar cases in non US jurisdictions and courts to consider in more depth the underlying core issues in these cases The book highlights the risk to a democracy of recasting fundamental human rights litigation as essentially nothing more than the sorting out of political quagmires and cultural conflicts best left to the discretion of government rather than the courts Then the major risk is that constitutional controversies will increasingly not be decided by an independent judiciary but rather by self interested politicians as the courts more often than not decline to weigh in on highly sensitive human rights controversies A further risk is that instead such cases will be decided through a judicial majoritarian political lens rather than a largely apolitical consensus judicial opinion constructed by both philosophically left leaning so called liberal and right leaning so called conservative jurists **The Rights of Refugees under International Law** James C. Hathaway, 2021-04-22 The only comprehensive analysis of international refugee rights anchored in the hard facts of refugee life around the world *Human Rights* Adam Etinson, 2018 Over the past decade or so philosophical speculation about human rights has tended to fall into two streams On the one hand there are Orthodox theorists who think of human rights as natural rights moral rights that we have simply in virtue of being human On the other hand there are Political theorists who think of human rights as rights that

play a distinctive role or set of roles in modern international politics setting universal standards of political legitimacy serving as norms of international concern and or imposing limits on the exercise of national sovereignty This edited volume explores this disagreement its underlying sources and related issues in the philosophy of human rights Using the Orthodox Political debate as a springboard for broader reflection the volume covers a diverse range of questions about the relevance of the history of human rights to their philosophical comprehension how to properly understand the relationship between human rights morality and law how to balance the normative character of human rights their description of an ideal world with the requirement that they be feasible in the here and now the role of human rights in a world shaped by politics and power and how to reconcile the individualistic and communitarian aspects of human rights All chapters are accompanied by useful and probing commentaries which help to create dialogues throughout the entire volume

Human Rights in Translation

Michal Jan Rozbicki, 2018-10-26 This volume reflects on what happens when the idea and practice of universal human rights cross the cultural borders between different communities of knowledge Although such rights are usually presumed to be founded on certain globally shared beliefs the norms and values of many cultures are often incommensurable with these universal principles and hence the need to translate and vernacularize them Any law that would successfully institutionalize them must frame human rights in a way that defers to the historically constituted cultural capital of the society in which it is to function The essays in this book seek to illuminate different cognitive contexts that produce different meanings of rights identify spaces of intercultural crossings where differences can coexist and offer usable narratives and metaphors that could help mediate between distinct cultures They show that the path forward does not lead through a unified theory of human rights that can be applied globally nor through mere repackaging of rights in a more understandable language What is needed is a deep understanding of the process of intercultural dialogue the cultural grammar involved in relationships of difference

Reconstructing Human Rights Joe Hoover, 2016 We live in a human rights world The language of human rights claims and numerous human rights institutions shape almost all aspects of our political lives yet we struggle to know how to judge this development Scholars give us good reason to be both supportive and sceptical of the universal claims that human rights enable alternatively suggesting that they are pillars of cross cultural understanding of justice or the ideological justification of a violent and exclusionary global order All too often however our evaluations of our human rights world are not based on sustained consideration of their complex ambiguous and often contradictory consequences Reconstructing Human Rights argues that human rights are only as good as the ends they help us realise We must attend to what ethical principles actually do in the world to know their value So for human rights we need to consider how the identity of humanity and the concept of rights shape our thinking structure our political activity and contribute to social change Reconstructing Human Rights defends human rights as a tool that should enable us to challenge political authority and established constellations of political membership by making new claims possible Human rights mobilise the identity of humanity to

make demands upon the terms of legitimate authority and challenges established political memberships In this work it is argued that this tool should be guided by a democratising ethos in pursuit of that enables claims for more democratic forms of politics and more inclusive political communities While this work directly engages with debates about human rights in philosophy and political theory in connecting our evaluations of the value of human rights to their worldly consequences it will also be of interest to scholars considering human rights across disciplines including Law Sociology and Anthropology

Global Development and Human Rights Paul J. Seriously in International Criminal Law Evelyne Schmid,2015-04-02 Evelyne Schmid demonstrates how violations of economic social and cultural rights can overlap with international crimes *Multinational Enterprises and Human Rights*

Alexandra Gatto,2011-01-01 This well researched book examines how the European Union could do more to ensure that EU based multinational enterprises MNEs respect human rights when operating in third world countries Alexandra Gatto

identifies the primary obligations of MNEs as developed by international law and investigates how the EU has promoted the respect of human rights obligations by the MNEs to date The significant gap between the EU s commitment to the respect and promotion of human rights the potential to regulate the conduct of MNEs and the EU s reluctance to impose human rights obligations on MNEs is thoroughly explored It is suggested that the current human rights law should be developed and this timely book recommends that the EU should firmly link the promotion of MNEs human rights obligations to international human rights law thereby supporting the constitution of an international law framework within the UN Multinational

Enterprises and Human Rights will be of very great interest to scholars of EU or international human rights as well as NGOs and policymakers in international organizations and corporations that support corporate social responsibility and human rights *Human Rights Law Directions* Howard Davis,2013-04-04 Innovative stimulating and easy to read Human Rights
