Shorts Aircraft Since 19:

American Military Helicopters and Vertical/Short Landing and Takeoff Aircraft Since 1941 E.R. Johnson, Ted Williams, 2021-11-15 Over the past eight decades developments in vertical lift aircraft both helicopters and vertical short takeoff and landing V STOL planes have given the American military unparalleled capabilities on the modern battlefield The U S has led the world in vertical lift technologies with the help of some of the brightest minds in this field Igor I Sikorsky Arthur M Young Frank N Piasecki Charles H Kaman and Stanley Hiller Jr to name a few and by having the industrial prowess to make their concepts reality This book provides a concise historical survey including technical specifications drawings and photographs of every type of helicopter and V STOL aircraft developed for the U S military from the earliest examples tested in 1941 and 1942 up to the newest prototypes

Over Empires and Oceans Robert Bluffield, 2014-11-19 This a story of pioneers intrepid aviators adventurers tycoons and innovators It is also a story of dedication and determination for despite fixed wing aircraft proving their value over the battlefields of the Western Front during the First World War convincing governments and public alike that they had a role in peacetime proved far more challenging The Americans as inventors of heavier than air powered flight had briefly courted with a passenger airline across Tampa Bay in 1914 yet it took a further nine years for mail to be flown coast to coast In 1919 a British company made the first international scheduled flight between London and Paris but the continuation of regular services was thwarted by a less than enthusiastic government that allowed its generously subsidised French competition for a short time at least to fly cross Channel passenger schedules unimpeded The British eventually realized that fast links with their Empire were vital followed the example of the French and Dutch who had forged air links with their cousins in North Africa and the Far East Meanwhile in South America the Germans forbidden under the Versailles Treaty from any major aircraft building were establishing cunning supremacy by forming airlines throughout South America and in China While America awaited a transcontinental passenger service Juan Trippe s Pan American Airways was crossing swords with Ralph O Neill of New York Rio Buenos Aires Line NYRBA for air supremacy between the US Brazil Argentina and elsewhere in Latin America that led to the formation of arguably the world s greatest airline In Russia Igor Sikorsky had built a vast passenger carrying aircraft the Il ya Muromets and politicians debated whether giant airships or fixed wing aircraft should rule the skies an issue that was put firmly to bed when the mighty German airship Hindenburg exploded while mooring at Lakehurst in 1937 Robert Bluffield s highly researched and detailed account tells the dramatic stories of explorers such as Kingsford Smith Lindbergh and Cobham and flamboyant entrepreneurs some well known others forgotten who risked fortunes and reputations to follow their dreams of reaching and ruling the skies over empires continents and oceans Against bewildering adversity corruption underhanded deals and dwindling resources these tenacious individuals braved the elements using primitive entirely unsuitable equipment to establish earth shrinking aerial services that criss crossed the great oceans and the globe s most inhospitable territories

These are the stories of those pioneers of A ropostale CNAC Air Orient Imperial Airways KLM Deutsche Luft Hansa Pan Am SCADTA The Condor Syndicat Qantas and others that had a far reaching impact on the way the modern world would travel

The Man Who Built the Swordfish Adrian Smith,2018-04-30 Sir Richard Fairey was one of the great aviation innovators of the twentieth century His career as a plane maker stretched from the Edwardian period to the jet age he lived long enough to see one of his aircraft be the first to break the 1000mph barrier and at least one of his designs the Swordfish holds iconic status A qualified engineer party to the design development and construction of the Royal Navy s state of the art sea planes Sir Richard founded Fairey Aviation at the Admiralty s behest in 1915 His company survived post war retrenchment to become one of Britain s largest aircraft manufacturers The firm built a succession of front line aircraft for the RAF and the Fleet Air Arm including the iconic Swordfish In addition Fairey Aviation designed and built several cutting edge experimental aircraft including long distance record breakers between the wars and the stunningly beautiful Delta 2 which broke the world speed record on the eve of Sir Richard s death in 1956 Fairey also came to hold a privileged position in the British elite courting politicians and policymakers He became a figurehead of the British aviation industry and his successful running of the British Air Commission earned him a knighthood A key player at a pivotal moment Fairey s life tells us much about the exercise of power in early twentieth century Britain and provides an insight into the nature of the British aviation manufacturing industry at its wartime peak and on the cusp of its twilight years *Innovations in Transportable*

And SAM: A Short Operational History Of Ground-Based Air Defense [Illustrated Edition] Dr. Kenneth P.

Werrell,2015-11-06 Includes over 90 illustrations Dr Kenneth Werrell s history of ground based air defense performs an important service both to scholarship and more important to the defense of our nation s freedom It is perhaps human nature

that we tend over time to lose sight of the lessons of the past especially when they do not conform to certain cherished preconceptions of ours That such myopia can be dangerous if not downright disastrous Doctor Werrell s study richly illustrates Without sentimentalism he chronicles a pattern of lessons learned and too quickly forgotten as the marvel of air power was reminded again and again of its limitations and vulnerability In Korea and in Vietnam the American people were stripped of their illusions of national and technical omnipotence The unhappy outcome of those two conflicts were doubly lamentable because the lessons of World War II were or should have been fresh in our minds In that world war as Doctor Werrell shows relatively cheap ground based air defense did make a difference at Ploesti at Antwerp and at the Rhine bridges

The Business of Armaments Joanna Spear,2023-01-19 How did Britain s most prominent armaments firms Armstrongs and Vickers build their businesses and sell armaments in Britain and overseas from 1855 to 1955 Joanna Spear presents a comparative analysis of these firms and considers the relationships they built with the British Government and foreign states She reveals how the firms developed and utilized independent domestic strategies and foreign policies against the backdrop of imperial expansion and the two world wars Using extensive new research this study examines the challenges the two firms faced in making domestic and international sales including the British Government s commitment to laissez faire policies prejudices within the British elite against those in trade and departmental resistance to dealing with private firms It shows the suite of strategies and tactics that the firms developed to overcome these obstacles to selling arms at home and abroad and how they built enduring relationships with states in Latin America Asia and the Middle East

The RAF and Aircraft Design Colin S Sinnott,2014-05-22 This work examines the evolution of the RAF s operational requirements for its home defence air force for bombers to mount a deterrent counter offensive and for fighters to provide direct defence of Britain It discusses the management processes policies and decisions relevant to operational requirements on the basis of a detailed study of Air Ministry papers of the time By tracing the development of operational requirements the author exposes the thinking behind the RAF s quest for effective fighter and bomber aircraft He describes the ideas and concepts of air warfare that were adopted in the 1920s and shows how these evolved into the Air Staff s requirements for the aircraft which the RAF entered and fought in World War II

The Men Who Gave Us Wings Peter Reese,2014-04-02 Why did the British then the leading nation in science and technology fall far behind in the race to develop the aeroplane before the First World War Despite their initial advantage they were overtaken by the Wright brothers in America by the French and the Germans Peter Reese in this highly readable and highly illustrated account delves into the fascinating early history of aviation as he describes what happened and why He recalls the brilliant theoretical work of Sir George Cayley the inventions of other pioneers of the nineteenth century and the daring exploits of the next generation of airmen among them Samuel Cody A V Roe Bertram Dickson Charles Rolls and Tommy Sopwith His narrative is illustrated with a wonderful selection of over 120 archive drawings and photographs which record the men and the primitive flying machines of a century ago As

featured on BBC Radio Surrey and in Essence Magazine **Short Brothers** Philip Macdougall,2019-08-22 Short Brothers was established in 1908 the first British aircraft manufacturer with the company moving to Rochester during the early years of the First World War At Rochester Shorts produced some of their most famous aircraft beginning with a number of designs for the Royal Naval Air Service During the inter war years the company specialised in large flying boats these undertaking pioneering flights while establishing a series of regular over water air routes operated by Imperial Airways At Rochester the Company designed and manufactured the Stirling bomber and Sunderland flying boat Short Brothers the Rochester Years not only looks at the development of those aircraft but is a fascinating account of the early years of long distance aviation and the airmen that used the River Medway at Rochester as a launch pad for flights of hitherto undreamed of distances **Federal Register** ,2013-07 U.S. Commuter Airline Industry United States. International Warbirds John C. Fredriksen, 2001-08-01 In depth descriptions and photographs of the aircraft of 21 nations presented with a unique human dimension that goes behind the machines to the people involved Invaluable for specialists accessible to enthusiasts International Warbirds An Illustrated Guide to World Military Aircraft 1914 2000 puts the most legendary fighter aircraft of the 20th century developed outside the United States on vivid display It offers 336 illustrated biographies of the most significant warplanes used in squadron service from World War I to the Balkan conflict including numerous models from Great Britain France Russia and Japan as well as notable machines from Israel Canada China India Brazil and other nations Entries span the history and scope of military aircraft from bombers and fighters to transports trainers reconnaissance craft sea planes and helicopters with each capsule history combining nuts and bolts technical data with the story of that model s evolution and use Together these portraits offer an exciting well researched tribute to visionary designers and builders as well as courageous pilots and crews across the globe and tell a vivid tale of how air power became such a decisive factor in modern warfare

Speedbird Robin Higham, 2013-05-30 Between 1939 and 1946 BOAC the British Overseas Airways Corporation was the nationalised airline of Great Britain and between 1946 and 1974 as such it exclusively operated all long haul British flights With its iconic Speedbird logo and its central role in the glamorous jet age of the 1950s and 1960s BOAC achieved a near cult status with admirers around the globe Yet to date there has been no comprehensive history of the organisation covering its structure fleet and the role it played in the critical events of the age from World War II to the end of empire a period when BOAC played a pivotal part in projecting British political power even as that power was waning During World War II BOAC operated a limited wartime service and prepared for the return of commercial flight in the postwar era But it was in the service of Britain s colonies and latterly the process of decolonisation that BOAC achieved its most pivotal role The development of flight technology enabled much faster connections between Britain and her imperial possessions as the colonies prepared for independence BOAC ferried diplomats politicians and colonial administrators between London and the far flung corners of Africa and Asia in much faster times than had previously been possible In this book acclaimed historian Robin Higham presents a unique comprehensive study of BOAC from the early jet travel of the de Havilland Comet and the Vickers VC10 to the dawn of supersonic passenger aviation Highly illustrated and meticulously researched using previously unseen sources this book will be essential reading for all aviation enthusiasts and anyone interested in the history of modern Britain

British Naval Aviation Dr Tim Benbow, 2013-07-28 In 1909 the British Admiralty placed an order for a rigid airship marking the beginning of the Royal Navy s involvement with airpower This collection charts the Navy s involvement with aviation over the following century and the ways in which its rapid expansion and evolution radically altered the nature of maritime power and naval strategy Drawing on much new historical research the collection takes a broadly chronological

approach which allows a scholarly examination of key themes from across the history of British naval aviation The subjects tackled include long standing controversies over the control of naval air power crucial turning points within British defence policy and strategy the role of naval aviation in limited war and discussion of campaigns such the contribution of the Fleet Air Arm in the Mediterranean and Pacific theatres of the Second World War that have hitherto received relatively little attention The collection concludes with a discussion of recent debates surrounding the Royal Navy s acquisition of a new generation of carriers setting the arguments within an historical context Taken as a whole the volume offers fascinating insights into the development of a key aspect of naval power as well as shedding new light on one of the most important aspects of Britain s defence policy and military history By simultaneously addressing historical and current political debates it is sure to find a ready audience and stimulate further discussion

The New Coastal History David Worthington, 2017-10-17 This book provides a pathway for the New Coastal History Our littorals are all too often the setting for climate change and the political refugee and migration crises that blight our age Yet historians have continued in large part to ignore the space between the sea and the land Through a range of conceptual and thematic chapters this book remedies that Scotland a country where one is never more than fifty miles from saltwater provides a platform as regards the majority of chapters in accounting for and supporting the clusters of scholarship that have begun to gather around the coast The book presents a new approach that is distinct from both terrestrial and maritime history and which helps bring environmental history to the shore Its cross disciplinary perspectives will be of appeal to scholars and students in those fields as well as in the environmental humanities coastal archaeology human geography and anthropology
