**Out of the Blue** Randy Lippincott, 2017-01-09 This book is an exciting autobiography about Randy's gripping skydiving career that began in the 60s His adventure started where Charles Lindbergh made his first three jumps Inspired by a Medal of Honor recipient Randy joined Special Forces and trained as a combat medic Assigned to the Seventh Army Parachute Team in Europe Randy fell desperately in love and later felt beguiled He used sex drugs and alcohol to drown his sorrows Randy jumped in a thunderstorm and through a ten thousand foot cloud narrowly surviving each This captivating story is about death hijacking murder flat spins drugs counterfeiting a deadly motorcycle accident a high speed car chase and a time loss experience Lippincott started skydiving again in preparation to write this book it was 13 852 days between jumps Randy's fantastic tale is a story filled with passion failure determination success heartache awakening and at last sweet redemption It is about skydiving adventures but it is much more than that It describes a generation the baby boomers that rebelled in the 60s with free love The narrative chronicles a person who did not want to live in quiet desperation but would rather push the envelope and test the waters

**Talespins** Edith Dodd Culver, 1986 This first hand account of early aviation days includes the beginning of air mail service in the United States It also includes stories about air pioneers and their training and exploits as well as authentic accounts of the women who were aviation enthusiasts and in some cases pilots themselves The author points out that these women played a vital part in early aviation history Publishers Weekly reported Culver's late husband Paul one of the country's earliest pilots was a member of the team that carried the first bags of air mail Here his wife recalls those days when to be a pilot was to court death and when marriage to a pilot presumed early widowhood

**Texas Takes Wing** Barbara Ganson, 2014-01-01 A history of aviation in Texas that brilliantly demonstrates the evolution of flight technology as a harbinger of social change Technology and Culture In this book pilot and historian Barbara Ganson brings to life the colorful personalities that shaped the phenomenally successful development of the aviation industry in the Lone Star state Weaving stories and profiles of aviators designers manufacturers and those in related services Texas Takes Wing covers the major trends that propelled Texas to the forefront of the field Covering institutions from San Antonio's Randolph Air Force Base the West Point of this branch of service to Brownsville's airport with its Pan American Airlines instrument flight school which served as an international gateway to Latin America as early as the 1920s to Houston's Johnson Space Center home of Mission Control for the US space program the book provides an exhilarating timeline and engaging history of dozens of unsung pioneers as well as their more widely celebrated peers Drawn from personal interviews as well as major archives and the collections of several commercial airlines including American Southwest Braniff Pan American Airways and Continental this sweeping history captures the story of powered flight in Texas since 1910 With its generally favorable flying weather flat terrain and wide open spaces Texas has more airports than any other state and is often considered one of America's most aviation friendly places Texas Takes Wing also

explores the men and women who made the region pivotal in military training aircraft manufacturing during wartime general aviation and air servicing of the agricultural industry The result is a soaring history that will delight aviators and passengers alike Includes photos *Flight: An Epic of the Air* Irwin R. Franklyn, 2019-12-18 In *Flight An Epic of the Air* Irwin R Franklyn captures the majesty and peril of aviation through a masterful blend of lyrical prose and vivid imagery The narrative sweeps across the skies chronicling not just the technological advancements of flight but also the emotional landscapes of those who dare to soar Franklyn employs a rich cinematic literary style drawing readers into the exhilarating and often treacherous world of aviation while also situating it within a broader historical and social context in the 20th century an era marked by both innovation and existential threat Irwin R Franklyn an aviation enthusiast and historian brings a unique perspective to this epic tale His extensive research into the history of flight combined with his personal experiences as a pilot informs the authenticity and depth of the narrative Franklyn's passion for aviation can be traced back to his childhood where he first envisioned the possibilities of human flight imbuing his storytelling with an infectious sense of wonder and nostalgia Readers who are captivated by tales of adventure and human ingenuity will find *Flight An Epic of the Air* to be an essential addition to their library Franklyn's exploration of the skies not only entertains but also invites reflection on the very nature of human aspiration This book is perfect for anyone yearning to understand the interplay between humanity and the vastness of the air above

*Akron Aviation* James I. Pryor II, 2014-02-17 Everyone loves a good adventure story The history of Akron aviation provides all the real life pathos of any adventure novel It all began in 1875 when a young farmer named Jack C Johnston launched himself and his balloon on one of the wildest flights ever recorded In 1906 John Gammeter an Akron inventor built his own airplane and began making regular flights over the city In Akron the Goodyear Tire and Rubber Company saw the future of air commerce and would go on to write its own chapter in aviation history on a global scale The story of Akron aviation is one of incredible triumphs and unspeakable tragedies It is the story of men and women determined to conquer the air Akron aviation matured along with the city and the two intertwined to become a major influence in northern Ohio as well as the country

*Grandchildren of the Pioneers* Marie Kramer, 2004 True compelling Nebraska stories including the Roaring 20s Depression World War II and Blizzards of 1949 are narrated by the people who lived them

Combat in the Stratosphere Steven Taylor, 2024-05-31 The first book devoted exclusively to exploring the development and use of aircraft designed specifically for high altitude operations in World War II In the summer of 1940 a new German aircraft began appearing in the skies over the British Isles Unlike the rest of the Luftwaffe's fleet in the Battle of Britain these aircraft were flying at a height of 40 000 feet and higher way beyond the reach of the RAF's defending fighters These virtually untouchable intruders were examples of the Junkers Ju 86P The world's first operational combat aeroplane equipped with a pressurized cabin they were able to reach a maximum altitude of 42 000 feet The Ju 86P's introduction ushered in a new era of aerial warfare where combat would take place at previously unimaginable heights The Ju 86P was just one of many high altitude aircraft projects developed by both the Axis and Allied powers during the Second World War Others included the Vickers Wellington Mk VI Vickers Windsor Boeing B 29 Superfortress Junkers Ju 388 Heinkel He 274 and Henschel Hs 130 With pressurized cabins such aircraft offered obvious tactical advantages bombers and reconnaissance aircraft could operate safely above the maximum ceiling of the opposing side's fighters prompting intense development especially by the British and Germans of pressurized interceptors to meet the threat they posed

*Combat in the Stratosphere* is the first book devoted exclusively to exploring the fascinating story of the development and operational history of aircraft designed specifically for high altitude operations during the Second World War But this is not a book solely about the machines themselves It also focuses on the men who flew these revolutionary aircraft both in the testing phase and in combat and the physical challenges these courageous airmen faced as they pushed themselves to the very edge of physical endurance in this desperate race to reach ever higher altitudes Drawing on a wide range of sources including air combat

reports British Cabinet files and Air Ministry documents as well as first hand accounts of aeronautical engineers and the pilots who flew these aircraft

**Combat in the Stratosphere** reveals the full story of this largely overlooked aspect of Second World War air warfare high above the skies of Europe North Africa the Soviet Union and Japan     From Bouncing Bombs to Concorde Robert Gardner,2006-06-22 For a quarter of a century from 1950 George Edwards was the dominant figure in British aviation both civil and military His name is synonymous with the Vickers Viscount the world s first turboprop airliner and the Concorde for which he led the British team throughout its formative period to customer delivery During the Second World War Edwards worked closely with Barnes Wallis and was responsible for making the dam busters famous bouncing bomb bounce After the war he was appointed chief designer at Vickers and designed Britain s first V bomber the Valiant which was delivered to the RAF in just four years Edwards then took the lead in the most ambitious military aircraft programme of the period TSR2 until it was controversially cancelled in 1965 Against this setback his successes included the VC10 airliner still in service today with the RAF and the legendary Anglo French Concorde Edwards s patience and perseverance when dealing with politicians and with his counterparts across the Channel were critical to the success of the Concorde project     American Aviation Joe Christy,1987     Hero of the Angry Sky David S. Ingalls,2013-01-16 Hero of the Angry Sky draws on the unpublished diaries correspondence informal memoir and other personal documents of the U S Navy s only flying ace of World War I to tell his unique story David S Ingalls was a prolific writer and virtually all of his World War I aviation career is covered from the teenager s early informal training in Palm Beach Florida to his exhilarating and terrifying missions over the Western Front This edited collection of Ingalls s writing details the career of the U S Navy s most successful combat flyer from that conflict While Ingalls s wartime experiences are compelling at a personal level they also illuminate the larger but still relatively unexplored realm of early U S naval aviation Ingalls s engaging correspondence offers a rare personal view of the evolution of naval aviation during the war both at home and abroad There are no published biographies of navy combat flyers from this period and just a handful of diaries and letters in print the last appearing more than twenty years ago Ingalls s extensive letters and diaries add significantly to historians store of available material     **The Alcalde** ,1967-01 As the magazine of the Texas Exes The Alcalde has united alumni and friends of The University of Texas at Austin for nearly 100 years The Alcalde serves as an intellectual crossroads where UT s luminaries artists engineers executives musicians attorneys journalists lawmakers and professors among them meet bimonthly to exchange ideas Its pages also offer a place for Texas Exes to swap stories and share memories of Austin and their alma mater The magazine s unique name is Spanish for mayor or chief magistrate the nickname of the governor who signed UT into existence was The Old Alcalde     **Montana and the Sky** Frank W.
