A Century Of The History Of Shotgun Cartridges Guy N Smith,2019-12 Prior to the 1960s very few shooters bothered to collect shotgun cartridges Cartridges were fired and the spent cases disposed of Gradually However an interest in old brands began They cropped up in drawers attics and innumerable places where they had been put aside sometimes by the family of a deceased sportsman or by the shooter himself who considered them too old to fire So a new hobby was born As the sixties progressed it grew steadily It incorporated all manner of shooting ephemera but sadly monetary values infiltrated this type of collecting In due course a relatively common brand from a past era cost a few pounds Nowadays it can become an expensive past time The majority of newcomers today rely upon swapping with fellow enthusiasts Apart from the pleasure of owning a collection of vintage brands it is also a history of the sport There were thousands of different brands many becoming forgotten or unknown brands from the first half of the 20th century even earlier This book details but a

Use of the "First Sale Rule" for Customs Valuation of U.S. Imports, Inv. 332-505 , *Forensic Firearms in Criminal Trials* J. K. Sinha, 2024-06-21

Over the last two plus decades the scientific validity of the principles that underpin identifying a firearm from recovered fired ammunition has been a core issue for the admissibility of expert evidence in criminal trials in the United States. The issues that dominated the determinative points as they related to the scientific and technological analysis centered around the following: the validity of uniqueness of firearms subjective methodology, the potential rate of error, unknown statistical certainty and unsatisfactory proficiency tests. These issues have essentially become the legal requirement for admissibility of experts' opinion on the linkage of firearms with fired ammunition, an important forensic opinion that connects the crime with the perpetrator through the weapon of offence.

In *Forensic Firearms in Criminal Trials: Legal Investigative and Scientific Aspects*, internationally renowned forensic firearm expert Dr J K Sinha provides demonstrative explanations and helpful clarifications using simple illustrative examples from scientific casework and everyday life. The goals are to:

- Prove the scientific validity of the uniqueness of identifying features of firearms.
- Identify the statistical threshold to qualify and determine a corresponding match.
- Debunk the misconception of subjective methodology and the potential rate of error thereof in experts' decision making and opinions.
- Clarify the prevailing perception of similar, dissimilar and insufficient marks and consequential interpretation.

With certain non-technical readers in mind as well, the book provides a basic understanding of the general make up of firearms and ammunition, the evidentiary values of commonly used firearms, fired empties, fired bullets and pellets, and scientific investigative leads that result from visual and physical evidence. Chapters cover related topics such as proficiency tests, identifying competent experts, admitted firing and reliable and testable methodology. The book also reviews the admissibility of expert evidence in India and explains the proviso of admissibility of ballistic expert report in criminal trials. Throughout, the author emphasizes the need for requisite forensic knowledge by the investigator and aided by a competent expert for effective scientific investigation of gunfire crimes such as would aid in the proper presentation of scientific evidence at criminal trial for a successful outcome.
