Transactions on Rough Sets VIII, 2008-08-06 Volume VIII of the Transactions on Rough Sets TRS contains a wide spectrum of contributions to the theory and applications of rough sets. The pioneering work by Prof Zdzisław Pawlak led to the introduction of knowledge representation systems during the early 1970s and the discovery of rough sets during the early 1980s. During his lifetime he nurtured worldwide interest in approximation, approximate reasoning and rough set theory and its applications. Evidence of the influence of Prof Pawlak's work can be seen in the growth in the rough set literature that now includes over 4000 publications by more than 1900 authors in the rough set database as well as the growth and maturity of the International Rough Set Society. This volume of TRS presents papers that introduce a number of new advances in the foundations and applications of artificial intelligence, engineering, logic, mathematics and science. These advances have significant implications in a number of research areas. In addition, it is evident from the papers included in this volume that rough set theory and its application form a very active research area worldwide. A total of 58 researchers from 11 countries are represented in this volume, namely Australia, Canada, Chile, Germany, India, Poland, P.R. China, Oman, Spain, Sweden and the USA. Evidence of the vigor, breadth and depth of research in the theory and applications of rough sets can be found in the articles in this volume. This volume contains 17 papers that explore a number of research streams.
