Sommers-flanaga,2012-10-23 **Toward Effective Counseling and Psychotherapy** Charles B. Truax,Robert Carkhuff,2007-09-01 The field of counseling and psychotherapy has for years presented the puzzling spectacle of unabating enthusiasm for forms of treatment whose effectiveness cannot be objectively demonstrated With few exceptions statistical studies have consistently failed to show that any form of psychotherapy is followed by significantly more improvement than would be caused by the mere passage of an equivalent period of time Despite this practitioners of various psychotherapeutic schools have remained firmly convinced that their methods are effective Many recipients of these forms of treatment also believe that they are being helped The series of investigations reported in this impressive book resolve this paradoxical state of affairs The investigators have overcome two major obstacles to progress in the past lack of agreement on measures of improvement and difficulty of measuring active ingredients of the psychotherapy relationship The inability of therapists of different theoretical persuasions to agree on criteria of improvement has made comparison of the results of different forms of treatment nearly impossible The authors have solved this intractable problem by using a wide range of improvement measures and showing that regardless of measures used in different studies a significantly higher proportion of results favor their hypothesis than disregard it Overall this book represented a major advance at the time of its original publication and is of continuing importance The research findings resolve some of the most stubborn research problems in psychotherapy and the training program based on them points the way toward overcoming the shortage of psychotherapists Charles B Truax is in addition to this book author of Counseling and Psychotherapy Process and Outcome The Process of Group Psychotherapy Relationships between Hypothesized Therapeutic Conditions and Intrapersonal Exploration Toward a Tentative Measurement of the Central Therapeutic Ingredients and Talking Won't Help A Study of the Process and Outcome of Psychotherapy with Hospitalized Schizophrenics Robert R Carkhuff is president of Human Technology Inc and chairman of Carkhuff Institute of Human Technology He is the author of The Possibilities Leader The Possibilities Mind and Beyond Counseling and Therapy

It is the first such attempt to bring together the findings from a widely scattered literature and as such will serve as a major reference work both for those already familiar with PCT and for those with little knowledge of it. Guidelines are provided for clinicians wishing to employ methods derived from the theory such as the repertory grid technique. The author is highly respected in the field and has employed PCT in his clinical research and practice for the past twenty years. **Cengage Advantage Books: Theories of Psychotherapy and Counseling** Richard S.
