Environmental Science and Technology Stanley E. Manahan,2006-10-20 Formally established by the EPA nearly 15 years ago the concept of green chemistry is beginning to come of age Although several books cover green chemistry and chemical engineering none of them transfer green principles to science and technology in general and their impact on the future Defining industrial ecology Environmental Science and Technology A Sustainable Approach to Green Science and Technology provides a general overview of green science and technology and their essential role in ensuring environmental sustainability Written by a leading expert the book provides the essential background for understanding green science and technology and how they relate to sustainability In addition to the hydrosphere atmosphere geosphere and biosphere traditionally covered in environmental science books this book is unique in recognizing the anthrosphere as a distinct sphere of the environment The author explains how the anthrosphere can be designed and operated in a manner that does not degrade environmental quality and in most favorable circumstances may even enhance it With the current emphasis shifting from end of pipe solutions to pollution prevention and control of resource consumption green principles are increasingly moving into the mainstream This book provides the foundation not only for understanding green science and technology but also for taking its application to the next level

Webster's Collegiate Dictionary ,1916 **Trees, forests and land use in drylands: the first global assessment** Food and Agriculture Organization of the United Nations,2019-11-29 Drylands cover 41 percent of the Earth s land surface This publication presents the results of the first global assessment of trees forests and land use in these lands The assessment breaks new methodological ground it relies on the visual interpretation of freely available satellite images carried out by more than 200 experts in a series of regional workshops Using a tool called Open Foris collect Earth developed by FAO in collaboration with Google participants gathered and analysed information for more than 200 000 sample plots worldwide For each region the report summarizes the distribution of forests other wooded land and other land uses including grasslands croplands built up areas and barren land across all drylands and by aridity zone It

also estimates tree canopy cover shrub cover forest type and presence of trees outside forest Indicating that the global drylands contain more than one quarter of the world's forest area and that trees are present on 31 percent of the world's dryland area the report provides a baseline for future monitoring and will support countries in their efforts to identify appropriate investments for the restoration and sustainable management of drylands
