El-Yazbi,2024-08-07 The book dissects the role of oxidative stress in the pathogenesis of the leading causes of global morbidity and mortality i e cardiovascular and metabolic diseases The chapters discuss topics related to the role reactive oxygen species ROS play in hypertension atherosclerosis diabetes obesity and related pathologies One chapter discusses the clinical efficacy and safety considerations of GLP 1 receptor agonists and SGLT 2 inhibitors in obesity management and the associated cardiovascular complications Another chapter discusses the context dependent roles of matrix metalloproteases and how their activity can be modulated and utilized for the development of improved drugs for cardiometabolic diseases Moreover how ROS and aging interplay to precipitate cardiovascular metabolic disease is discussed and highlighted Similarly how sex and sepsis interplay in the context of cardiorenal disease is teased out in one of the chapters Preventive measures that can abrogate ROS induced cardiovascular metabolic disease are discussed and clarified in the hope of reducing such a debilitating battery of diseases Another chapter is fully dedicated to the roles of ROS in atherosclerosis while another chapter deals with mechanisms and effect of ROS on various phenotypes of adipose tissues in the context of cardiovascular metabolic disease A chapter also discusses the link between traumatic brain injury TBI and cardiovascular impairments and how ROS plays a significant role in TBI induced cardiovascular disease A section dedicated to antioxidants as potential therapy is also included Given the complexity of the mechanisms implicated in ROS modulated responses it remains challenging to assert a conclusive argument and pre determined regimen for incorporating antioxidants into conventional therapies In all of the chapters the molecular cellular genetic and pharmacological mechanisms implicated are covered from an applied science perspective This is an ideal book for basic researchers in the biomedical field graduate students in biological and biomedical fields medical students instructors in medical and graduate schools and professionals working for pharmaceutical companies *Biogenic Nano-Particles and their Use in Agro-ecosystems* Mansour Ghorbanpour,Prachi Bhargava,Ajit Varma,Devendra K.

Choudhary,2020-03-20 Several nano scale devices have emerged that are capable of analysing plant diseases nutrient deficiencies and any other ailments that may affect food security in agro ecosystems It has been envisioned that smart delivery systems can be developed and utilised for better management of agricultural ecosystems These systems could exhibit beneficial multi functional characteristics which could be used to assess and also control habitat imposed stresses to crops Nanoparticle mediated smart delivery systems can control the delivery of nutrients or bioactive and or pesticide

molecules in plants It has been suggested that nano particles in plants might help determine their nutrient status and could also be used as cures in agro ecosystems Further to enhance soil and crop productivity nanotechnology has been used to create and deliver nano fertilizers which can be defined as nano particles that directly help supply nutrients for plant growth and soil productivity Nano particles can be absorbed onto clay networks leading to improved soil health and more efficient nutrient use by crops Additionally fertilizer particles can be coated with nano particles that facilitate slow and steady release of nutrients reducing loss of nutrients and enhancing their efficiency in agri crops Although the use of nanotechnology in agro ecosystems is still in its early stages and needs to be developed further nano particle mediated delivery systems are promising solutions for the successful management of agri ecosystems In this context the book offers insights into nanotechnology in agro ecosystems with reference to biogenic nanoparticles It highlights the occurrence and diversity of Biogenic Nanoparticles mechanistic approach involved in the synthesis of biogenic nanoparticles synthesis of nanoparticles using photo activation and their fate in the soil ecosystem potential applications of nanoparticles in agricultural systems application and biogenic synthesis of gold nanoparticles and their characterization impact of biogenic nanoparticles on biotic stress to plants mechanistic approaches involved in the antimicrobial effects and cytotoxicity of biogenic nanoparticles role of biogenic nanoparticles in plant diseases management relevance of biological synthesized nanoparticles in the longevity of agricultural crops design and synthesis of nano biosensors for monitoring pollutants in water soil and plant systems applications of nanotechnology in agriculture with special refer to soil water and plant sciences A useful resource for postgraduate and research students in the field of plant and agricultural sciences it is also of interest to researchers working in nano and biotechnology
