Sidney Drell on Arms Control Sidney Drell, Kenneth W. Thompson, 1988-07-19 In the lecture which spurred this volume Sidney Drell equated arms control with the Strategic Defense Initiative and limited his comments exclusively to that subject Drell stands out among scientists who have contributed to the dialogue on arms control He has been an advisor to the U S government on issues of national security and science policy for many years and served on the President s Science Advisory Committee for Presidents Johnson and Nixon Two qualities distinguish the speeches and writings collected here Drell has kept alive the hope of arms control even in its darkest hours and has clearly explained the scientific side of arms control to public policy students

**Nuclear Weapons, Scientists, And The Post-cold War Challenge: Selected Papers On Arms Control** Sidney D Drell, 2007-01-16 This volume includes a representative selection of Sidney Drell s recent writings and speeches circa 1993 to the present on public policy issues with substantial scientific components Most of the writings deal with national security nuclear weapons and arms control and reflect the author s personal involvement in such issues dating back to 1960 Fifteen years after the demise of the Soviet Union the gravest danger presented by nuclear weapons is the spread of advanced technology that may result in the proliferation of nuclear weapons Of most concern would be their acquisition by hostile governments and terrorists who are unconstrained by accepted norms of civilized behavior The current challenges are to prevent this from happening and at the same time to pursue aggressively the opportunity to escape from an outdated nuclear deterrence trap

**Nuclear Statecraft** Francis J. Gavin, 2012-10-11 We are at a critical juncture in world politics Nuclear strategy and policy have risen to the top of the global policy agenda and issues ranging from a nuclear Iran to the global zero movement are generating sharp debate The historical origins of our contemporary nuclear world are deeply consequential for contemporary policy but it is crucial that decisions are made on the basis of fact rather than myth and misapprehension In *Nuclear Statecraft* Francis J. Gavin challenges key elements of the widely accepted narrative about the history of the atomic age and the consequences of the nuclear revolution On the basis of recently declassified documents Gavin reassesses the strategy of flexible response the influence of nuclear weapons during the Berlin Crisis the origins of and motivations for U S nuclear nonproliferation policy and how to assess the nuclear dangers we face today In case after case he finds that we know far less than we think we do about our nuclear history Archival evidence makes it clear that decision makers were more concerned about underlying geopolitical questions than about the strategic dynamic between two nuclear superpowers Gavin's rigorous historical work not only tells us what happened in the past but also offers a powerful tool to explain how nuclear weapons influence international relations *Nuclear Statecraft* provides a solid foundation for future policymaking

*The Nuclear Tipping Point* Kurt M. Campbell, Robert J. Einhorn, Mitchell B. Reiss, 2005-06-22 More than half a century after the advent of the nuclear age is the world approaching a tipping point that will unleash an epidemic of nuclear proliferation Today many of the building blocks of a nuclear arsenal scientific and engineering expertise precision machine tools software design information are more readily available than ever before The nuclear pretensions of so called rogue states and terrorist organizations are much discussed But how firm is the resolve of those countries that historically have chosen to forswear nuclear weapons A combination of changes in the international environment could set off a domino effect with countries scrambling to develop nuclear weapons so as not to be left behind or to develop nuclear hedge capacities that would allow them to build nuclear arsenals relatively quickly if necessary *The Nuclear Tipping Point* examines the factors both domestic and transnational that shape nuclear policy The authors distinguished scholars and foreign policy practitioners with extensive government experience develop a framework for understanding why certain countries may originally have decided to renounce nuclear weapons and pinpoint some more recent country specific factors that could give them cause to reconsider Case studies of eight long term stalwarts of the nonproliferation regime Egypt Germany Japan Saudi Arabia South Korea Syria Turkey and Taiwan flesh out this framework and show how even these countries might be pushed over the edge of a nuclear tipping point The authors offer prescriptions that would both prevent such countries from reconsidering their nuclear option and avert proliferation by others The stakes are enormous and

success is far from assured To keep the tipping point beyond reach the authors argue the international community will have to act with unity imagination and strength and Washington s leadership will be essential Contributors include Leon Feurth George Wash
