Schiller, 1995 The assault on and capture of Fort Pulaski is the story of the elimination of Savannah Georgia as a Confederate seaport Of equal importance was the North's successful use of rifled artillery against that masonry fort a technological turning point equal in significance to the much better known development of ironclad ships The rifled cannon were developed in the mid 1800s and were first used

in siege warfare during the attack against Fort Pulaski In April 1862 three of those formidable new weapons breached Fort Pulaski s walls within thirty six hours forcing the garrison to surrender and closing Savannah s port This is the first modern account of great Federal labors under terrible conditions in difficult terrain to erect the batteries which sealed the Savannah River isolated Fort Pulaski and finally forced its surrender amidst the Union army s infighting over who should receive credit for the operation

Siegecraft - No Fortress Impregnable Harold Skaarup,2003-04-06 It has been said that the taking of a fortress depends primarily on the making of a good plan to take it and the proper implementation and application of the resources to make the plan work Long before a fortress has been besieged and conquered it has to have been outthought before it can be outfought This book outlines some of the more successfully thought out sieges and demonstrates why it is that no fortress is impregnable A siege can be described as an assault on an opposing force attempting to defend itself from behind a position of some strength Whenever the pendulum of technology swings against the status quo the defenders of a fortification have usually been compelled to surrender We must stay ahead of the pendulum and not be out thought long before we are out fought for as it will be shown in this book no fortress is impregnable
