outstanding work develops and extends Schenker's approach. More than 500 examples of music from the Middle Ages to the 20th century complement the detailed discussions and analyses. Teaching Music Theory Jennifer Snodgrass, 2020-04-01. In recent years music theory educators around the country have developed new and innovative teaching approaches reintroducing a sense of purpose into their classrooms. In this book author and veteran music theory educator Jennifer Snodgrass visits several of these teachers observing them in their music theory classrooms and providing lesson plans that build upon their approaches. Based on three years of field study spanning seventeen states coupled with reflections on her own teaching strategies *Teaching Music Theory: New Voices and Approaches* highlights real life teaching approaches from effective and sometimes award winning instructors from a wide range of institutions: high schools, community colleges, liberal arts colleges and conservatories. Throughout the book Snodgrass focuses on topics like classroom environment, collaborative learning, undergraduate research and professional development and curriculum reform. She also emphasizes the importance of a diverse, progressive and inclusive teaching environment throughout, from encouraging student involvement in curriculum planning to designing lesson plans and assessments so that pedagogical concepts can easily be transferred to the applied studio performance ensemble and other courses outside of music. An accessible and valuable text designed with the needs of both students and faculty in mind, *Teaching Music Theory* provides teachers with a vital set of tools to rejuvenate the classroom and produce confident, empowered students.

**The Moving Body in the Aural Skills Classroom** Diane J. Urista, 2016-08-30. Inspired by Dalcroze eurhythmics, this book is a practical guide for teachers and students interested in integrating the moving body into the aural skills classroom. Author Diane J. Urista focuses on movement to music as a tool for developing musical perception and the kinesthetic aspects of performance. As this book demonstrates, moving to music and watching others move cultivates an active, multi-sensory learning experience in which students learn by discovery and from each other. The book features a wealth of exercises that teach rhythmic, melodic, harmonic and formal concepts including improvisation and expressive exercises. These exercises not only develop the ear but also awaken the muscular and nervous system, foster mind-body connections, strengthen the powers of concentration, develop inner hearing, short and long term memory, multi-tasking skills, limb autonomy and expressive freedom. Exercises are presented in a graded but flexible order allowing readers to select individual exercises in any sequence. Activities involve movement through space as well as movement in place for those teaching in small classrooms. The book can be used as a teacher's manual, a supplementary aural skills textbook or as a stand-alone reference in a course dedicated to eurhythmics. Many exercises also provide an effective aural sensory tool in the music theory classroom to complement verbal explanations. The approach integrates easily into any traditional college or conservatory classroom and is compatible with fixed-do, moveable-do and scale degrees. A companion website features undergraduate students performing select exercises.
