L'auteur est ainsi conduit à faire observer que le phénomène de l'inconscient qui précède l'émergence du mot dans une langue donnée est régi par des lois linguistiques qui n'ont rien d'universel mais qui varient au contraire selon la typologie résumée de l'auteur.

Analytical lexicon of human anatomy Guy Bordin, 2003. Les lexiques et dictionnaires sont des ouvrages que l'on consulte à la fois par intérêt et par plaisir. Le présent lexique anatomique trilingue inuktitut français anglais ne fait pas exception à la règle. Il comble tout d'abord un manque existant dans le champ de l'anatomie inuit en rassemblant un corpus d'environ 570 termes provenant de l'Arctique oriental canadien Nunavik et Nunavut oriental. Il permet ensuite d'aborder ce domaine lexical dans une perspective ethnolinguistique reliant les faits de langue aux choix culturels. Ce travail met ainsi en avant le caractère hautement motivé de la langue inuit. Ouvrage thématique à vocation pratique illustré de planches anatomiques, il met en évidence divers modes de désignation des organes et zones du corps et contribue de la sorte à une meilleure connaissance de certains mécanismes de conceptualisation chez les Inuit. Dictionaries are reference works we consult them both for interest and for pleasure. This trilingual Inuktitut French English anatomical dictionary is no exception to this rule. It fills first and foremost a gap that exists in the field of Inuit anatomy by bringing together a set of some 570 terms from the Canadian Eastern Arctic Nunavik and Eastern Nunavut. It then provides an ethnolinguistic approach to this area of lexicography that links the facts of language to cultural choices. This work accordingly illustrates the highly motivated character of the Inuit language. This lexicon is dedicated to a specific theme with practical intent and is illustrated with anatomical plates. It shows as far as possible various ways in which organs and areas of the body are designated and contributes thereby to an enhanced understanding of some of the conceptualization mechanisms used by the Inuit.

Canadian Reference Sources Mary E. Bond, Martine M. Caron, 1996. This bibliography cites those Canadian and foreign reference sources that describe Canadian people, institutions, organizations, publications, art, literature, languages and history. It lists books of a general nature as well as works in the disciplines of history and the humanities. These large divisions are then broken down by subject, genre, type of document and province or territory. Titles of national, provincial, territorial or regional interest are included in every subject area when available. The contents of the book are indexed four ways: by name, title, French subject and English subject. And to facilitate browsing, the major reference books, those dealing with more than one subject or a large geographical region, are also cross-referenced. Two entries have been created for each bilingual document in order to provide access and bibliographical descriptions in both of Canada's official languages. Entries for unilingual works include citation in the language of the publication and a bilingual

annotation The annotations are descriptive and provide information on the content arrangements and indexing of works the availability of non printformats previous editions and title changes and related works Canadian Reference Sources will be an invaluable referencetool for future scholars and researchers Canadiana ,1986 *Introduction à la psychomécanique du langage* Ronald Lowe,2007 **The Kugaluk Site and the Nuvorugmiut** David A. Morrison,Canadian Museum of Civilization,Archaeological Survey of Canada,1988 Description of the archaeological excavation and analysis of the Kugaluk site located near Eskimo Lakes east of Tuktoyaktuk Northwest Territories The area was inhabited by the Nuvorugmiut one of the branches of the Mackenzie Inuit who seasonally exploited the caribou and whale and may have had a stratified social structure
