Exploring the cultural, ideological and economic legacies of Euro 2012 Peter Kennedy, Christos Kassimeris, 2016-03-22 European National football came together in the summer of 2012 for the 14th occasion. This book sets out to examine the enduring social tensions between supporters and authorities as well as those between local, national, and European identities which formed the backdrop to the 14th staging of the European National football tournament Euro2012. The context of the tournament was somewhat unique from those staged in previous years, being jointly hosted for the first time by two post-Communist nations still in the process of social and economic transition. In this respect, the decision to stage Euro 2012 in Poland and Ukraine bore its own material and symbolic legacies, shaping the tournament. The unsettling of neo-liberal imaginings and emergent East-West fears about poor infrastructure, inefficiencies, and corruption jostled with moral panics about racism and fears surrounding the potentially unfulfilled consumerist expectations of west European supporters. The book seeks to explore the ideologies and practices invoked by competing national sentiments and examine the social tensions, ambiguities, and social capital generating potentials surrounding national, ethnic, European identity with respect to national football teams, supporters, and supporter movements. This book was published as a special issue of *Soccer and Society*.

Warning Design John Edworthy, 1996-03-12 Why don't we always obey warnings? In discussing a wide range of issues in behavioural research of warnings, this book takes the view that a warning is but one piece of information which we take into account in deciding what or what not to do. This view leads the authors to the positions that warnings should be matched in their urgency to the urgency of the situation they warn about. Auditory, visual, written, and symbolic warnings are discussed in detail.
