Mattilda Bernstein Sycamore,2021-10-05 Every queer person lives with the trauma of AIDS and this plays out intergenerationally Usually we hear about two generations the first coming of age in the era of gay liberation and then watching entire circles of friends die of a mysterious illness as the government did nothing to intervene And now we hear about younger people growing up with effective treatment and prevention available unable to comprehend the magnitude of the loss But there is another generation between these two one that came of age in the midst of the epidemic with the belief that desire intrinsically led to death and internalized this trauma as part of becoming queer Between Certain Death and a Possible Future Queer Writing on Growing up with the AIDS Crisis offers crucial stories from this missing generation in AIDS literature and cultural politics This wide ranging collection includes 36 personal essays on the ongoing and persistent impact of the HIV AIDS crisis in queer lives Here you will find an expansive range of perspectives on a specific generational story essays that explore and explode conventional wisdom while also providing a necessary bridge between experiences These essays respond with eloquence and incisiveness to the question How do we reckon with the trauma that continues to this day and imagine a way out **Escaping the Shadows, Seeking the Light** Connie Brewer,1991 Healing childhood sexual abuse is a topic of growing concern and interest within the Christian community In this direct honest and compassionate book victims of childhood sexual abuse share their stories offering hope and healing through an understanding of God s nurturing love from back cover summary [The Lever of Riches](#) Joel Mokyr,1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation s creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval

Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential

Love, Beauty or Morality Alberto Castelli,2024-05-23 This book is moved by two main questions Is Love a matter of beauty or mortality In other words is love an ethical ideal Also modernity understood as the age of mechanical reproduction has shaped not simply our cities but our very same way of feeling How has our conception of love changed if it has in the past two centuries This book is to address these questions It is not to trace the evolution of the idea of love in Western culture from Plato to the present day It aims to bring to the surface different shades of love lingering at the heart of Western culture to rehabilitate the myth of love to its original credibility Our confused civilization has split love into sensual and moral aspects but to be aware of it is perhaps to defeat a dilemma that seems so unnatural This book is about how we make sense of our lives through love and how nineteenth and twentieth century literature records it

New Feminist Stories of Child Sexual Abuse Paula Reavey,Sam Warner,2003 Child sexual abuse is a multifaceted event interpreted in many different ways in many different contexts In New Feminist Stories of Child Sexual Abuse contributors try to untangle some of the complex ways in which stories of child sexual abuse are translated through and into personal professional and social politics The first section of the book explores the cultural and political landscape of child sexual abuse in Western and non Western contexts It examines the ways in which radical aspects of feminism can be undermined in Western cultures and how Westernised ideologies of childhood sex and gender have been used to structure

discussions about child sexual abuse across the world The second section traces the effects of these wider cultural and political narratives through the various contexts in which child sexual abuse is theorised and around which interventions in the lives of women are structured It provides insights into how traditional approaches to understanding harm can be challenged and reworked in practice using alternative therapeutic models based on feminist post structuralist agendas Reworking earlier feminist analyses New Feminist Stories of Child Sexual Abuse asks pertinent questions about how child sexual abuse is produced rather than merely represented in the ways we speak about it
