Delusions and the Madness of the Masses Lawrie Reznek, 2010-11-16 We all think that we can tell the difference between someone who is mad or whom psychiatrists call psychotic and someone who is sane But can we really tell who is mad and who is not Do we really know what madness is and how it should be recognized Have psychiatrists made a sensible distinction between the patient who believes that aliens are beaming messages to him from a foreign planet and the religious fanatic who believes God communicates to him via automatic writing Is there a difference between the paranoid patient who believes that the FBI is after him and the sizeable proportion of our normal population that believe that the US government orchestrated the 9 11 bombings Here Reznek hopes to shed light on the delusions of the masses those delusions that are common to everyday people living so called ordinary lives He provides an understanding of madness and the psychological processes that drive us to adopt delusions arguing that it is a mistake to view only schizophrenic patients as delusional while excluding large groups of society from such an analysis If we abandon the idea that whole communities cannot share a delusion we can come to a better understanding about why

colony of Australia which was prey to the disease in its early years and identifies a literature of scurvy in the works of such figures as Herman Melville Samuel Taylor Coleridge Francis Bacon and Jonathan Swift Masterful and illuminating Scurvy shows how the journeys of discovery in the eighteenth century not only ventured outward to the ends of the earth but were also an inward voyage into the realms of sensation and passion
