Unlocking the Brain: Volume 2: Consciousness Georg Northoff,2013-11-11 Neuroscience has made considerable progress in figuring out how the brain works We know much about the molecular genetic and biochemical underpinnings of sensory and motor functions Recent neuroimaging work has opened the door to investigating the neural underpinnings of higher order cognitive functions such as memory attention and even free will In these types of investigations researchers apply specific stimuli to induce neural activity in the brain and look for the function in question However there may be more to the brain and its neuronal states than the changes in activity we induce by applying particular external stimuli In Volume 2 of Unlocking the Brain Georg Northoff addresses consciousness by hypothesizing about the relationship between particular neuronal mechanisms and the various phenomenal features of consciousness Northoff puts consciousness in the context of the resting state of the brain thereby delivering a new point of view to the debate that permits very interesting insights into the nature of consciousness Moreover he describes and discusses detailed findings from different branches of neuroscience including single cell data animal data human imaging data and psychiatric findings This yields a unique and novel picture of the brain and will have a major and lasting impact on neuroscientists working in neuroscience psychiatry and related fields

Symphony no. 2 in D Minor, op. 24 ("Jullien") George Frederick Bristow, 2011-01-01 URL <https://www.areditions.com/r/ra-a072.html> George Frederick Bristow 1825-98 American composer, conductor, teacher, and performer was a pillar of the New York musical community for the second half of the nineteenth century. His participation in an important mid-century battle of words between William Henry Fry and the journalist Richard Storrs Willis, and concerning a lack of support for American composers by the Philharmonic Society, has unfortunately overshadowed his accomplishments as a composer, which were significant. Bristow is remembered today primarily for his opera *Rip van Winkle* (1855) and oratorio *Daniel* (1866), but he was also a skillful and productive composer of orchestral music, one of only a handful of American orchestral composers active at mid-century. Bristow wrote his *Symphony no. 2, Jullien* in 1853. It is a substantial work in four movements, scored for the standard orchestra of the early nineteenth century, and strongly influenced by the personal styles of Beethoven and Mendelssohn, whose works were performed regularly by the Philharmonic Society. The symphony is skillfully crafted, melodious, and an intrinsically worthy work of musical artistry. It was named to honor the French conductor Louis Jullien, who visited the United States in 1853-54 with an unparalleled orchestra. While in the United States, Jullien both commissioned and performed American works, including this symphony; his support served as the catalyst for the Fry-Willis battle. The introductory essay to this symphony examines Bristow's career, the composition of orchestral music in America at mid-century, and Jullien's role in the musical battle. The edition makes available for the first time an important work that has been undeservedly forgotten for over 150 years.
