Pêcheries Ouest Africaines Philippe Cury, Claude Roy, 1991 **Dynamique et usages de la mangrove dans les pays des rivières du Sud, du Sénégal à la Sierra Leone** Marie-Christine Cormier-Salem, 1994 La mangrove est un objet de recherche privilégié C est aussi l objet d enjeux politiques économiques et sociaux Cet ouvrage fait la synthèse de nombreux travaux pluridisciplinaires sur cet écosystème riche et complexe

The Gulf of Guinea Large Marine Ecosystem J.M. McGlade, P. Cury, K.A. Koranteng, N.J. Hardman-Mountford, 2002-08-15 The Gulf of Guinea volume is part of a series on the Large Marine Ecosystems This volume combines the latest research on the Gulf of Guinea from scientists working primarily in the region and from Europe It covers the dynamics of the oceanic and coastal waters of the region the major biological resources pollution in the marine environment and the socio economics and governance of marine fisheries A significant number of new data sets including some which have been repatriated from outside the region are now made available through this publication The combination of the various chapters underlines the interlinkages that exist between the interannual and seasonal dynamical behaviour of the oceanic offshore waters and the living marine resources along the coast and the direct effect they have on the livelihoods of the populations living throughout the Gulf of Guinea The volume is intended for those who have a general interest in the region as well as those who work professionally in the field It will also be of immense value to resource managers and policy makers as a demonstration project on how research can help solve the pressing problems of economic and food security in coastal regions

Ecosystem Approaches to Fisheries Villy Christensen, Jay Maclean, 2011-03-03 Inspired by the work of the renowned fisheries scientist Daniel Pauly this book provides a detailed overview of ecosystem based management of fisheries It explores the complex and interdisciplinary nature of the subject by bringing together contributions from some of the world s leading fisheries scientists managers and conservationists Combining both research reviews and opinion pieces and reflecting the breadth of Pauly s influence within the field the book illustrates the range of issues associated with the implementation of the ecosystem approach and the challenge of long term sustainability Topics covered include global biodiversity the impact of human actions on marine life the implications for economic and social systems and the role of science in communicating and shaping ocean policy to preserve resources for the future This book provides a complete and essential overview for advanced researchers and those just entering the field

Benguela: Predicting a Large Marine Ecosystem Vere Shannon, Gotthilf Hempel, Coleen Moloney, John D. Woods, Paola Malanotte-Rizzoli, 2006-08-17 This is a book which examines much of what we know and also what we don t know about the Benguela Current Large Marine Ecosystem and its inherent variability Building on recent work and exciting findings about the predictability of the Benguela and other coastal upwelling ecosystems the book takes a look towards the future and highlights the difficulty of making predictions in such a complex and variable region The book illustrates what scientists and managers from developed and developing countries can achieve by working together and it

lays a solid base upon which to build wise management and ensure sustainable use of the ecosystem Essential reading and a valuable reference work on the Benguela Current Large Marine Ecosystem Covers what we know about variability in the Benguela and its impacts Provides information on forecasting in the Benguela and offers insight in what is predictable and what is not Discusses key elements of a future integrated observing and forecasting system

The Global Coastal Ocean - Regional Studies and Syntheses Kenneth H. Brink, Allan R. Robinson, 2005

Marine fisheries, ecosystems and societies in West Africa - half a century of change Pierre Chavance, 2004

The Exploitation of Evolving Resources T. Kevin Stokes, Jacqueline M. McGlade, Richard Law, 2013-03-08

The impact of man on the biosphere is profound Quite apart from our capacity to destroy natural ecosystems and to drive species to extinction we mould the evolution of the survivors by the selection pressures we apply to them This has implications for the continued health of our natural biological resources and for the way in which we seek to optimise yield from those resources Of these biological resources fish stocks are particularly important to mankind as a source of protein On a global basis fish stocks provide the major source of protein for human consumption from natural ecosystems amounting to some seventy million tonnes in 1970 Although fisheries management has been extensively developed over the last century it has not hitherto considered the evolutionary consequences of fishing activity While this omission may not have been serious in the past the ever increasing intensity of exploitation and the deteriorating health of fish stocks has generated an urgent need for a better understanding of evolution driven by harvesting and the implications of this for fish stock management The foundations for this understanding for the most part come from recent developments in evolutionary biology and are not generally available to fisheries scientists The purpose of this book is to provide this basis in a form that is both accessible and relevant to fisheries biology

Complexity and Self-Organization in Social and Economic Systems Fukang Wang, Michele Sanglier, 2012-12-06

The Instituts Internationaux de Physique et de Chimie fondis par E Solvay and the Institute of Nonequilibrium systems of Beijing Normal University jointly sponsored a conference on The Complexity and Self organization in Socio economic Systems on October 17 20 1994 at Beijing China The purpose of the conference was to explore the complexity and evolutionary laws of socio economic systems through nonlinear dynamic systems and self organization theory The conference was chaired by Professor M Sanglier and Professor Fang Fukang and was introduced by the Nobel prize winner Professor I Prigogine and the vice director of the Chinese National System Reform Committee Mr Wu Jie The conference was held at an important time On the one hand the research in the natural sciences about the evolution of complex systems has made great progress modern scientific theories such as nonlinear dynamic system theory and self organization theory are becoming more and more mature and a series of methods dealing with these complex systems are being developed which enable us to understand and study non equilibrium uncertainty and instability On the other hand human societies around the world witness a general increase of connectedness interactivity and an increase of reaction speeds to decisions In this context the deterministic linear

way of thinking becomes more and more inadequate and this stimulates the development of non linear science **The Global Coastal Ocean** Allan R. Robinson, Kenneth H. Brink, 2005 In multidisciplinary efforts to understand and manage our planet contemporary ocean science plays an essential role Volumes 13 and 14 of The Sea focus on two of the most important components in the field of ocean science today the coastal ocean and its interactions with the deep sea and coupled physical biogeochemical and ecosystem dynamics Too Valuable to be Lost Álvaro Garrido, David Starkey, 2020-09-07 This collective book is a multidisciplinary approach on a key topic for our common future overfishing The focus is addressed to the Atlantic World considering the main oceanic geography in which this problem born in the early 20th century The volume offers a wide range of contributions from experts on the topic covering the most relevant areas of the Atlantic and explaining important case studies on overfishing recent history Written in a historical perspective the book looks for institutional regulatory solutions based on multilateral solutions and scientific advising Founders thought on the topic and the understanding s evolution of the overfishing problem are mainly considered This book is an accessible synthesis on overfishing history especially recommended for social scientists historians biologists decision makers and committed citizens **Review of the State of World Marine Fishery Resources** Food and Agriculture Organization of the United Nations. Marine Resources Service, 1994-01-01 This document provides a review commentary and tabulations of the main trends that have occurred in exploitation of fisheries resources since the 1970s largely as they are reflected in the FAO database on fishery landings supplemented with selected information from the fishery literature Reviews were prepared separately for the 15 main areas into which FAO divides the world s oceans for statistical purposes They are then compared from a global perspective to reveal relative trends by species and areas which are highlighted Several special topics are reviewed including tuna and tuna like species whales and dolphins and environmental issues in fisheries **Report of the Workshop on the Small Pelagic Resources of Angola, Congo, and Gabon, Luanda, Angola, 3-7 November 1997** K.
