NASA-University Conference on Manual Control ,1970 **Computer Chess Compendium** D. LEVY,2013-06-29 For many years I have been interested in computer chess and have collected almost every learned paper and article on the subject that I could find My files are now quite large and a considerable amount of time effort and expense has been required to build up this collection I have often thought how difficult it must be for many computer chess enthusiasts to acquire copies of articles that they see referenced in some other work Unless one has access to a good reference library the task is almost impossible I therefore decided to try to make available in one volume as many as possible of the most interesting and important articles and papers ever written on the subject Such a selection is naturally somewhat subjective and I hope that I will not offend authors whose works have been excluded In particular I have decided to exclude any material which has appeared in the Journal of the International Computer Chess Association ICCA or in its precursor the ICCA Newsletter The reason is simply that the ICCA itself is in the process of compiling a compendium containing the most important material published in those sources For further information on ICCA membership and publications the reader is invited to contact Professor H 1 van den Herik or Dr Jonathan Schaeffer University of Limburg Computing Science Dcpaitment Department of Computer Science University of Alberta 6200 MD Maastricht Edmonton Netherlands Alberta Canada T6G 2HI **Annual**

T. Fraser,F. C. Haber,G. H. Müller,2012-12-06 The First Conference of the International Society for the Study of Time was held at the Mathematisches Forschungsinstitut at Oberwolfach in the Black Forest Federal Republic of Germany from Sunday 31 August to Saturday 6 September 1969 The origin of this conference and the formation of the Society goes back to a proposal due to J T Fraser that was discussed at a conference on Interdisciplinary Perspectives of Time held by the New York Academy of Sciences in January 1966 It was unanimously agreed that an international society should be formed on an interdisciplinary basis with the object of stimulating interest in all problems concerning time and that this object could best be attained by means of conferences held at regular intervals J T Fraser was elected Secretary S Watanabe Treasurer and I was elected President It was agreed at my suggestion that the organization of the first conference of the newly formed Society be left to a committee of these three officers on the understanding that they would invite authorities on the role of time in the various special sciences and humanities to form an Advisory Board to assist them One of the main difficulties in seeking support for an interdisciplinary conference is that most foundations confine their interest exclusively either to the sciences or to the humanities
