EBOOK: Raising Boys' Achievement in Secondary Schools Mike Younger, Molly Warrington, Ros McLellan, 2005-11-16

Boys achievement has attracted great attention in recent years in many countries. This comprehensive book based on sound research in schools provides practical insights into how the achievement of boys and girls can be raised. It reminds us that it is not all boys or no girls who underachieve. It demonstrates the respective roles of teaching and learning, school culture and social factors. No easy answers but excellent ideas backed by evidence from authoritative thorough researchers with a firm basis in schools. Judy Sebba, Professor of Education, University of Sussex. Teachers will find this book invaluable. It is based on quality research which actually evaluates the impact of the various strategies suggested for raising boys' achievement. What is more, in contrast to many of the more quick fix works in this field, the authors' discussion and analysis is measured and nuanced and supported by an in-depth understanding of the wealth of theory and research around gender and achievement. It provides a welcome and weighty contribution to an ever-controversial debate. Becky Francis, London Metropolitan University. In this important book, the authors evaluate different approaches and advocate practical evidence-based strategies which have the potential to promote boys as well as girls' achievements. The approaches are discussed within the context of inclusivity, acknowledging the diverse needs and interests of different boys and the invisibility and continuing disadvantage of some girls. The book begins and ends with reflections from students of their own school experiences and makes practical recommendations for the future. This book draws upon empirical research and work initiated as part of the DfES project on Raising Boys' Achievement. It brings together theoretical and practical issues and reflects upon the construction of the debate about boys' apparent underachievement from the perspectives of girls as well as boys. The authors critically explore notions of underachievement and value added and consider how useful the concept of the gender gap is in advancing the debates. Raising Boys' Achievement in Secondary Schools is key reading for undergraduate and postgraduate Education students, PGCE students, headteachers, senior managers within schools and local education authorities and policy makers.

Raising Boys' Achievement In Primary Schools Warrington, Molly, Younger, Mike, 2006-06-01

Within the context of empirical research undertaken by the authors during the course of a 4 year research and intervention project on Raising Boys' Achievement, the book will focus on approaches that are successful in raising achievement for boys and the reasons for that success. It will explore the whole aspect of boys' achievement and look at how primary schools are addressing the issue and the processes involved in schools working collaboratively and voluntarily to share good practice. Case study material will be used to illustrate the different contexts in which the strategies have been studied and of great importance is the incorporation of boys and girls' own perspectives on their educational experiences.

Analysing Underachievement in Schools Emma Smith, 2005-06-09

Underachievement in school is one of the most widely used terms in education today. As a discourse it has been responsible for influencing government policy, staffroom discussions as well as the pages of academic journals and the TES. It is also a subject which raises questions about what we expect from a fair and equitable education system. This book provides a critical analysis of two sides of the underachievement debate at each of the three levels of focus: international, the UK and the individual. On the one hand it will consider the crisis account of falling standards and failing pupils and on the other present an alternative account which urges a re-evaluation of the underachievement debate in order to consider who might be underachieving and why. Eliminating the Achievement Gap William Jeynes, 2019-10-04 The purpose of the *Eliminating the Achievement Gap* is to provide a resource for scholars and students into many of the most salient issues, trends and factors that are most effective in reducing the achievement gap. *Eliminating the Achievement Gap* is particularly unique because it will 1. utilize a meta-analysis to determine what factors contribute the most to reducing the achievement gap and 2. examine potential achievement gap reducing variables from across disciplines. These disciplines include education, sociology, economics, family science, psychology, public policy and educational psychology. The second emphasis is largely based on the meta-analysis because the results of the meta-analysis indicate that the best way to completely eliminate the achievement gap is to initiate a multidisciplinary approach to the achievement gap. It is the intention of this book to make scholars, educators, policymakers, parents and the general public more aware of the factors that best bridge the achievement gap so that they can take major steps to implementing comprehensive and multidisciplinary efforts. The more such efforts are inaugurated the more the achievement gap will be reduced. The nine chapters of this book are therefore divided into four parts to reflect this extent of this comprehensive approach. **EBOOK: Lads and Ladettes in School** Carolyn
